Welcome. It seems I've been saying that a lot lately. This is a brand new forum, and hopefully a new beginning for Emergency Communications in Essex County. Ideally this will become a place to work out the problems you see as stumbling blocks to a well functioning organization for EmComm. Many of the surrounding counties are in some stage of the same process. If you have ideas to help us along the way, let's hear them. If you are well versed in the Yahoo forum format and have ideas on how to make more use of what is here feel free to comment. There some organizational ideas that may be unfolding soon, and many real world activities that we will need to put together. All in due time. For now let's start talking, ironing out some details and exchanging information.

2. Thanks for the Help.

Ken Nieglos and Mike Hoeft deserve a thank you for sharing the text they prepared for the Passaic County ARES / RACES group. They were gracious enough to share the result their efforts with us and allow us to paraphrase and copy them freely. It has given us a jump start on this forum. Thank you both and all that assisted you.

3. Request for Information

Radio Club officers, ARES officers and RACES officers---
I am requesting that all Essex County groups forward a copy of your local organization its members and officers. This information is for my use only at this time. Please include mailing addresses, phone numbers and email addresses as well as any official titles. In the future we may use the database or other feature on this forum site to create and maintain this information. It is very important to our organizational structure at the county level.
If you know of any clubs or emergency radio communications groups not listed in the Essex County Radio Clubs doc. posted in the files section please let me know.

4. Thanks

Bob,

Thanks for the invitation and here I am.

As an intro to the group, I am a neighbor.

I am an EC in Bergen County.

In my day job I am a client. I am the Medical Reserve Corps Coordinator and the LINCS/HAN Coordinator for the Bergen County Department of Health Services.

73,

Jim Dockery, WB2HBZ

Jim,
You are quite welcome. Thank you for giving us some of your back ground. I hadn't been aware of most of your credentials. I hope you will continue to check in on us and lend your expertise to the conversations.

From: Robert Crifasi
Topic: 6 Message: 6

A link to Essex County SKYWARN has just been added to the Links section of the forum.

www.essexskywarn.org

Essex County SKYWARN sponsors a Monthly Training Net on the First Tuesday of each month at 7 p.m. If you are interested in becoming a net control station or are just interested in becoming involved in the Essex County SKYWARN progam, you may contact Stan Rogacki - WA2EXX, the Essex County SKYWARN Coordinator, via email at WA2EXX@essexskywarn.org.

7. Too many EmComm posts? Don't unsubscribe please.

Yahoo group: EC_EmComm
Date: 2005-12-03 21:34:39 UTC
From: Robert Crifasi
Topic: 7 Message: 7

All members:
I just received an email from a concerned member.
He would prefer not to find the number of emails in his inbox growing to large proportions. His complaint is understandable. This is common when logging on to forums please do not remove yourself from the forum for this reason. We need to keep in touch and continue to have that contact growing! There is a much more practical solution available. Please read the information below. It's easy enough for you to do yourself but if you'd like, let me know and I'll change your membership to one of the other options. If you choose the Special Notices, you should only receive EmComm activations or disaster alerts from me.

You have these options for your message delivery for each group:
☐ Individual Emails
Messages are delivered one at a time to your email inbox. This is the best option if you want to keep up on the latest posts immediately. Email attachments, if included in a message and allowed by your moderator, will be sent directly to you.
☐ Daily Digest
Messages are delivered in batches of 25 or daily, whichever comes sooner. This is the best option if you want to receive fewer mail messages and don't need up-to-the minute posts in your inbox. Email attachments are not available in digests.
☐ Only Special Announcements
This means you will receive email messages only when the group moderator posts a "Special Announcement" message. This is a good option if you want to pass on day-to-day discussion for very busy groups but do want to receive important updates from the group moderator. Keep in mind that usage by each moderator will vary. (The moderator may choose to never use this feature, in which case you would never receive email messages, or may choose to use it frequently.)
☐ No Mail / Web Only
This option puts email message delivery on hold, for example while you are on vacation. If message archives are available, this option also permits you to read messages at the Yahoo! Groups web site. Note that message archive options are determined by each moderator, and that some groups have no web message archives.
To set any of these options, go to My Groups and choose from the drop-down list of message delivery options for your group.

Bob-
I just saw your last email to the group.

You asked if I ever joined forums. Well, the answer is yes. And do you know what messages I have seen more than any other? Members asking how to "opt out" and begging the moderator to remove them from the group. Don't count on too many guys from our club having even moderate computer skills or accessibility. Better to keep their activity "passive" by their having access to important messages right there in their inbox, than expecting them to do anything "active"

I would think guys would want to know more than just activation or disaster activities. I would. I hope there is some middle ground here- but I seem to be losing confidence...

Best regards,

Al

Al,
I had decided to handle this "offline" but since you posted to the group, I'll answer you in kind. You are selling your club members short. You'll find many of them are forward thinking and willing to take on the challenge of pushing a few buttons. They are after all Hams and unafraid of technology aren't they? Unsubscribing is not the moderators choice, and is the members choice. There is no need to beg. There are alternatives to completely removing one's self from the group that have already been offered to you, and in addition could be done for you if needed. Your willingness to discuss this in the open is just what I had hoped to see on the forum. I had hoped however, to see discussion about Emergency Communications not the structure of the forum software. It seems counter productive to voluntarily join a discussion group only to complain about the nature of it. There are alternatives which would satisfy your needs. Please try them before you go. Either way it's your choice.

Having said that... Is there anyone in Essex County (or elsewhere) with issues about Emergency Communications in (or relevant to) Essex County?

10. Winter Storm Watch for parts of NNJ Section - Freezing Rain/Ice

Yahoo group: EC_EmComm
Date: 2005-12-15 03:34:10 UTC
From: Robert Crifasi
Topic: 10 Message: 10

Be advised that the predicted upcoming storm event (Thursday into Friday of this week) carries with it the potential for Freezing Rain and Ice Accretion in some areas of NNJ....Freezing Rain occurs when rain falls on surfaces that are themselves below freezing and coats them with an ice buildup.

Items vulnerable to ice buildup include power and telephone lines which can come down due to the weight of the ice and cause local and even widespread outages, which may result in a need for ARES activations. Before the onset of the storm is the time to check/charge your communications systems battery/backup power items.

Below is one of the Winter Storm Watches issued by NWS Mt Holly NJ early this AM (NNJ counties under the Watch include Sussex, Morris and Warren at this time)....please monitor your local sources for further Watches and Warnings over the next 24-48 hours....also be advised that in areas where the rain does not freeze or fall as snow, there is an expectation for as much as 1-1.5 inches of liquid precipitation to accompany this event...this could lead to some urban and street flooding due to the frozen ground not being able to absorb the water....should more definitive info come out from either NWS Mt Holly or NWS Upton for the NNJ Section...I will forward it along.

George Sabbi
ARES DEC SKYWARN - NNJ Section
Email: KC2GLG@...

URGENT - WINTER WEATHER MESSAGE..
NATIONAL WEATHER SERVICE MOUNT HOLLY NJ
454 AM EST WED DEC 14 2005

...ANOTHER WINTER STORM ON THE WAY WITH THE POTENTIAL FOR
SNOW...SLEET AND FREEZING RAIN...

NJZ007-008-PAZ060>062-142015-
/O.NEW.KPHI.WS.A.0003.051215T1900Z-051216T1700Z/
WARREN-MORRIS-BERKS-LEHIGH-NORTHAMPTON-
INCLUDING THE CITIES OF...WASHINGTON...MORRISTOWN...READING...
ALLENTOWN...BETHLEHEM...EASTON
454 AM EST WED DEC 14 2005

...WINTER STORM WATCH IN EFFECT FROM THURSDAY AFTERNOON THROUGH
FRIDAY MORNING...

THE NATIONAL WEATHER SERVICE IN MOUNT HOLLY HAS ISSUED A WINTER
STORM WATCH...WHICH IS IN EFFECT FROM THURSDAY AFTERNOON THROUGH

FRIDAY MORNING.

SNOW CHANGING TO A WINTRY MIX OF SLEET AND FREEZING RAIN...THEN POSSIBLY ALL RAIN IS EXPECTED LATE THURSDAY INTO FRIDAY.

LOW PRESSURE FROM THE CENTRAL GULF STATES IS EXPECTED TO MOVE NORTHEAST TO THE VIRGINIA COAST BY THURSDAY NIGHT. THIS LOW IS THEN FORECAST TO INTENSIFY AS IT CONTINUES TO MOVE NORTHEAST ALONG THE COAST TO NEW ENGLAND BY FRIDAY NIGHT.

PRECIPITATION FROM THIS SYSTEM IS EXPECTED TO BEGIN AS SNOW THURSDAY AFTERNOON. HOWEVER, AS WARMER AIR SLOWLY MAKES ITS WAY NORTH,
SNOW IS EXPECTED TO MIX WITH SLEET AND FREEZING RAIN THURSDAY NIGHT BEFORE CHANGING OVER TO RAIN LATE THURSDAY NIGHT. UNFORTUNATELY, WITH SO MUCH COLD AIR LOCKED INTO THE AREA, A PROLONGED PERIOD OF FROZEN PRECIPITATION RESULTING IN SIGNIFICANT ICE ACCUMULATIONS ACROSS THE REGION IS POSSIBLE THURSDAY NIGHT. WHILE IT IS TOO EARLY TO PREDICT EXACT AMOUNTS, SEVERAL INCHES OF SNOW IS POSSIBLE, ALONG WITH A QUARTER INCH OR MORE OF ICE ACCUMULATION ON EXPOSED SURFACES. A WINTER WEATHER WATCH HAS THEREFORE BEEN ISSUED FOR THURSDAY AFTERNOON THROUGH FRIDAY MORNING.

SNOW MIXING WITH AND CHANGING TO SLEET AND FREEZING RAIN COULD MAKE DRIVING VERY TREACHEROUS LATE THURSDAY AFTERNOON INTO THURSDAY NIGHT, AND POSSIBLY THROUGH FRIDAY MORNING IN THE HIGHER ELEVATIONS. IN ADDITION, TREES AND POWER LINES WILL BE EXPOSED TO INCREASED STRESS IF THE REGION EXPERIENCES A PROLONGED PERIOD OF FREEZING RAIN.

AS THE LOW PRESSURE SYSTEM RESPONSIBLE FOR THIS WINTER WEATHER MOVES NORTHEAST INTO NEW ENGLAND ON FRIDAY, NORTHWEST WINDS WILL BRING IN ANOTHER ROUND OF COLD WEATHER FOR THE WEEKEND.

A WINTER STORM WATCH MEANS THERE IS A POTENTIAL FOR SIGNIFICANT SNOW...SLEET...OR ICE ACCUMULATIONS THAT MAY IMPACT TRAVEL. CONTINUE TO MONITOR THE LATEST FORECASTS AS THIS EVENT UNFOLDS.

12. "I am looking for a few good men" (and women) to...

Yahoo group: EC_EmComm

From: Robert Crifasi
Topic: 12 Message: 12

"I am looking for a few good men" (and women) to work on some of the tasks that face us as a county organization. We are in need of a regular radio net. We need one person to start the ball rolling. One net a month would seem prudent; slow and easy and we can work up from there. Any suggestions for which night and time, let's hear them. Anyone interested in volunteering to be the NCS, or work on building the schedule and staffing it, let's hear from you as well. There are many tasks ahead of us. Some are obvious some not. No one person can not, and should not, do them all in isolation. It has been said here before, and will be said again, this forum has been created to discuss the ARES and RACES needs for this county. Shortly we should receive the ARRL listing for all licensed operators in Essex County. I will be making an effort to contact each one of them and invite them to become part of Essex County EmComm and this forum. Much of what needs to be done can be accomplished at home at you leisure, by phone, mail, email and oddly enough ham radio!

When the next disaster hits this area let's hope we can all turn to each other and honestly say "Job well done" not "somebody should have done something".

14. EmComm members as first responders and the ICS-100 online course

Yahoo group: EC_EmComm
Date: 2005-12-26 15:22:36 UTC
From: Robert Crifasi
Topic: 14 Message: 14

I am suggesting that each member of EmComm (ARES and RACES) take the ICS-100 course on-line.
This course is intended for all first responders. Your first reaction to this maybe "but we are Hams not first responders". On the surface that is correct and we should never assume we can or should take the same level of authority as police of firemen. However many of you may also be CERT, Red Cross or members of similar organizations. Even as members of ARES and certainly members of RACES (an extension of OEM) you will be working in close association with those that are considered formal first responders. In this capacity you will find you will qualify as a first responder under the broader use of the term as defined below. This course is an opportunity to learn the terms and concepts in use during a disaster. These concepts are used from daily emergencies through full disasters.

Now is the time to begin not when a disaster occurs.

http://training.fema.gov/EMIWeb/IS
The URL address above will take you there. Cut and paste it directly into the address field of your browser. If you need help try the resources offered on the web site first, but please let me know if I you need further assistance.

==========
From the National Incident Management System page of the NJ NIMS web site:
http://nims.nj.gov/factsheet.html#defsfirstresponder

Definitions of First Responder
The definitions of "First Responder" in HSPD-8 and the Homeland Security Act are much broader than fire, emergency medical, law enforcement and emergency management:
The term "first responder" refers to those individuals who in the early stages of an incident are responsible for the protection and preservation of life, property, evidence, and the environment, including emergency response providers as defined in section 2 of the Homeland Security Act of 2002 (6 U.S.C. 101), as well as emergency management, public health, clinical care, public works, and other skilled support personnel (such as equipment operators) that provide immediate support services during prevention, response, and recovery operations. (HSPD-8)
6) The term "emergency response providers" includes Federal, State, and local emergency public safety, law enforcement, emergency response, emergency medical (including hospital emergency facilities), and related personnel, agencies, and authorities.

(Homeland Security Act - 6 U.S.C. 101)

21. ARC NNJ Metro Chapter has 440

Yahoo group: EC_EmComm
Date: 2006-01-06 01:20:27 UTC
From: Kenneth T. Nieglos
Topic: 21 Message: 21

Members,

Just want to advise the group that I had the pleasure of Harold Eleke W2IBM the radio officer for the ARC Metro Chapter in Fairfield, NJ tonight. We installed a new dedicated 2m/440 dual band radio for the chapter house. They now have 440 to interface with Passaic County ARES/RACES (as well as Essex County via 2 meters or 440). Prior to this the ARC did not have dedicated 440 radio.
We hope every one had a great New Year.
Thank You from your northern neighbor,

Ken Nieglos / WX2KEN
Passaic County ARES DEC/RACES

Ken Nieglos,Thank you for your contribution to the Red Cross and Essex County. It's nice to have friends, especially when they are dedicated and demonstrate it in a meaningful way.

I hope to see as many of at the Red Cross DAT meeting that Harold announced. This is an important organization to our community and we should be prepared to lend our support in a disaster. After all it's their job to support us let's be there to help them succeed.

Due to misuse of this forum (you may have gotten a strange post) I am instituting stricter security. I'm sorry if you are inconvenienced in any way. Please feel free to talk to me directly if needed. If anyone contacts you indicating they are having difficulty accessing or joining the forum please contact me. All memberships must now be screened by a moderator. Thank you.

66. Emergency Management Communications plates

Yahoo group: EC_EmComm
Date: 2006-04-28 01:45:26 UTC
From: Robert Crifasi
Topic: 66 Message: 66

To all EmComm Members:

We are being given the opportunity to order

Emergency Management Communications plates.

These plates are like the fireman type plates that mount either above or below the license plate.

I have posted two pictures (front and back) in the photos section for you to get a look at them. The back shows the four mounting holes. All you have to do is complete the hole through reflective material.

The printing says "EMERGENCY MANAGEMENT COMMUNICATIONS". The plates are 4" high and 10" long. If you have any questions let me know. We are estimating that the plates would cost about $10.00 each.

If you have not filled out the information I have asked for, be sure it accompanies your request. If you have any questions please ask me.

These plates are for ARES/RACES members only.

Bob Crifasi KC2RFC

Topic: 66 Message: 67

Hey Bob,
It's Kenny Schmertz. . the jr. firefighter from North Caldewll FD . . wen i had taken the ham radio class and took the test, i missed passing by 3 questions, and the past few weeks i have been very busy, but now that things have slowed down, i plan on re-taking the test, and i definetly will join RACES, i would join now, but i'm guessing that i need to actually have my ham license.

if i don't actually need to have my ham license yet to join, then let me know how i can join.

Kenny

94. Hello again. It□s been a while I know.

Yahoo group: EC_EmComm
Date: 2006-08-08 11:58:10 UTC
From: Robert Crifasi
Topic: 94 Message: 94

To all Essex County Emergency Communications members:

Hello again. It's been a while I know. The road has been
a little bumpy for me this summer so far. Things are settling down for
me a bit and I hope to get them back on track. The Red Cross Ham Radio
team (name still to be announced), is alive and doing well. With Fred
Schlesinger as president many things are beginning to get accomplished.
This is a group that has been in existence approximately six months at
best. He has a strong team and responsive staff to work with and keeps
them on point. Nice job Fred and each of the team. I am aware of the
progress because I have had the time and opportunity to be present at
several of there meetings and Fred makes it a point to keep
communications open between us via email as well. I would appreciate it
if we could use this situation as an example and work on the contact
between my self as DEC and the representatives in the Essex County
clubs.

You may have also noticed Essex County SKYWARN was
activated a few times for the thunder storms and flash flood situations
that occurred over the last two months. Those of you interested in
SKYWARN make yourselves known to our county SKYWARN coordinator Stan
Rogacki and lend a hand during the next alert.

Our membership is slowly growing and I hope to work on the meeting I
mentioned a few weeks ago. I'd like to put it together by the end of
the summer at the latest. Suggestions for a date, time and location are
welcome. I would also like to work on a phone call up list. Most of us
have cell phones, those that do not at least have land line phones where
they can be contacted. Many of us do not monitor the radio (some rarely
speak on it). This being the case we will need a reliable and
confirmable method of contacting the entire team in time of emergency.
We will need to know, who is available to respond to the emergency site,
what equipment they have available, and what length of time they have
available. There is still much work to be done to organize the
information available on the forum. Any one wishing to help with the
organization of any of this, please contact me. I will be contacting you
all soon as this begins to come together. Some of you have applied for
RACES and or ARES cards. If you have not received them please contact me
via email. I don't mind being reminded.

95. Re: You too can be an NCS

Yahoo group: EC_EmComm
Date: 2006-08-08 13:30:16 UTC
From: Robert Crifasi
Topic: 92 Message: 95

Vivian,

Your question "What is NCS?" startled me at first.
When I posted the message you responded to I was sure anyone on this forum would know. Then I thought about it for a moment. Why would everybody know? It wasn't much more than a year ago I had little more than a clue what it meant. Since then I've taken the full series of ARRL ECC courses and several FEMA courses. This has caused me, in part, to forget that most of the world has not heard these terms and does not know what their importance may be to a radio operator in an emergency. Given that this is a new forum, welcoming new radio operators, as well as non-operators, your question is a very good one.

NCS very simply stands for Net (short for network) Control Station. When several radio operators gather on a frequency and begin a discussion, you will occasionally find two or more of them transmitting at the same time. This situation is usually called "doubling".
When this occurs the transmission usually is unintelligible and it is almost impossible to recognize who was transmitting. This being the case a great deal of confusion is generated. In attempting to reorganize the conversation and figure out who was saying what, more doubling may occur and escalate the problem. This is annoying in a casual conversation and absolutely unacceptable in an emergency situation. A method called rotation is often used in casual conversation, similar to passing a token. Each person takes a turn, and the order is adhered to for the length of the conversation. It is dynamic and as people sign in and sign out the order will change as stations are added and dropped. It is not always easy to remember the order especially when it is constantly changing. Though this method is an improvement to no order at all, an emergency situation calls for a greater degree of order and control.
There is also a need to prioritize transmissions as the emergency intensifies. A model for anything more involved than polite conversation evolved, called a Controlled Net, and has become a standard practice. It can be used in varying degrees of rigidity depending on the purpose of the Net and importance of the information involved. In an emergency situation there is little excuse for breaking protocol in a Controlled Net. The basic concept requires any and all stations wishing to communicate on the frequency first request permission to do so. One station is responsible for granting permission to transmit, that station is the Net Control Station. The scenario works much the same as a classroom. Any student wishing to speak must raise their hand to be recognized. A station in a Controlled Net calls the NCS by his (or her) call sign announces their own and waits for a response from the NCS. The classroom teacher recognizes a student and grants permission to speak.
The NCS will evaluate the situation based on priorities and recognize

the station with the highest priority. If one station requests to speak directly to a station other than the NCS, the control station may ask that the exchange be made on another frequency. This decision will be based upon the importance of the information, whether or not the Net can afford to wait before continuing and whether there would be any benefit in having the rest of the stations involved in the net hearing it.

The NCS is responsible for maintaining order and control of the transmissions during the net, as well as recording any important information. This is not as clear cut as it may seem on the surface. Tensions may rise during an emergency. Personality conflicts must be dealt with and ended, and the business of exchanging potentially life saving information, focused on. The NCS must conduct themselves in a crisp respectful manor, while managing not to be too officious. There is a good deal if detail left out here, but I think it should give you the basic idea.

Thanks for asking.

All EC Em_Comm members:

As you all know this forum was established to develop Emergency Radio Communications in Essex County. As part of that continuing effort I would like to make a request. I would like to establish contact with a representative of each Amateur Radio Club and Emergency Response Organization through out the county. As not all of those groups are tied into this forum I would appreciate if each of you that are would reach out to any of those organizations you may be a part of or aware of that are emergency response related. Give them my contact information on my behalf. I will be doing my best to contact as many of them as I can in the mean time. There are so many of them it's impossible for me to do this on my own in a reasonable amount of time. If you are interested please contact me either before hand or after making some of these contacts so that we are not duplicating effort. This will also allow me to follow up if needed. I am including my contact information below and can be reached on any of the methods listed. As always if you need to contact me please don't hesitate.

The general idea is to develop a list of contacts through out the county for when the "next emergency" strikes.

Remember it's not "if" but "when".

98. Emergency Communications Events

Yahoo group: EC_EmComm
Date: 2006-08-21 13:08:59 UTC
From: Robert Crifasi
Topic: 98 Message: 98

Hi All:

I've been made aware we have a few events coming up that
are directly and indirectly related to Emergency Communications.

National Preparedness Month:

During September, the ARRL will once again be among many organizations
and agencies across the country taking part in National Preparedness
Month. "The Ready Campaign," produced by the Ad Council in partnership
with the US Department of Homeland Security (DHS), is aimed at making
citizen preparedness "a priority for every city, every neighborhood and
every home" in the United States. The ARRL encourages you to consider
this year's Simulated Emergency Test and all preparations as well as
post exercise evaluations as a demonstration of both your readiness and
Amateur Radio's readiness. http://www.ready.gov/
<http://www.ready.gov/>

Essex County CERT Day:

Saturday September 30, 8:30 ☐ 1:30 pm

Essex County Police Academy

All Essex County and municipal CERT volunteers are invited to attend
this program that includes an overview and training classes/refreshers
in First Aid, Fire Suppression, Light Search and Rescue. Also on hand
will be a Fires & Wires demonstration from PSE&G. Breakfast and Lunch
will be served.

For more information contact Sam Carella at (973)284-4929

The 2006 Simulated Emergency Test (SET) Oct 7 ☐ 8

Amateur Radio Emergency Service (ARES), National Traffic System (NTS),
Radio Amateur Civil Emergency Service (RACES) and other public-service
oriented groups can be involved. The SET weekend gives communicators the
opportunity to focus on the emergency-communications capability within
your community while interacting with NTS nets. Although the main SET
weekend this year is October 7 -8, local and section-wide exercises may
be held throughout the fall season. Hams read the article in July, 2006
QST about last years SET to get an idea of what to expect.
<http://www.ready.gov/>

Be an active participant in the SET and join the nation in National
Preparedness Month.

Please contact me if you are interested in participating. I would like to keep account of any and all members involved. As more information becomes available I will disseminate it.

Bob Crifasi KC2RFC

106. ☐Evacuation route☐ What do these signs mean?

Yahoo group: EC_EmComm
Date: 2006-09-18 02:55:23 UTC
From: Robert Crifasi
Topic: 106 Message: 106

I know you've seen these signs but do you know what they mean? I didn't untill I read this. It's old but it still applies. Share this with your family and friends.

BoB Crifasi

==========

This way out: Finding direction in dire emergency

Wednesday, February 22, 2006
By CHRIS SAGONA
of The Montclair Times

Evacuation Route signs thread traffic westbound on Bloomfield Ave. Staff photo by Adam Anik.Does a sign give direction if no one knows what it means?

A blue sign with a white arrow hangs suspended on a traffic-signal gantry over Bloomfield Avenue in the township. The sign's only explanatory words are "Evacuation route."

But evacuate from what? A hurricane? A nuclear disaster?

And evacuate to where? Is the destination some underground hideaway?

And who is it exactly who wants everyone in Montclair to follow a white arrow up a hill on Bloomfield Avenue to a mystery location?

"We placed the sign there," said Essex County Sheriff Armando Fontoura, the county's coordinator for emergency management.

The Essex County Office of Emergency Management (OEM) is in charge of training the emergency responders who will be directing the public, providing emergency mutual aid, and deciding when and how to order an evacuation in the case of emergency.

"The sign on Bloomfield Avenue is a part of our emergency evacuation plan, which has been approved by the New Jersey Office of Emergency Management," said Fontoura. "Every municipality has a plan."

Essex County received $10,000 from a state police grant last year to erect the signs.

But where exactly does the arrow point?

"West, basically," Fontoura said. "Whether it's because of natural disaster, hurricane, a chemical spill or terrorist attack, we want people heading west because you get to higher ground, and when you

get past the first set of mountains you're provided with a [buffer], and the second gives protection too."

There is no specific destination, said Fontoura, noting the OEM prefers not to give out specific locations until encountering an actual emergency.

"You'll follow the signs in the direction posted, and along the way there will be other signs," said Fontoura. "All of the main thoroughfares in all municipalities have directional signs. Somewhere along the way there will be emergency personnel, such as a police officer, firefighter or an emergency volunteer, telling you where you should go, depending on what type of emergency it is."

Shelter locations are scattered, but many are schools, he said.

"We learned from Katrina," said Fontoura. "People were directed to one place. And it ended up being that there were far too many people there. Keeping in mind how densely populated New Jersey is, we are very conscious of the fact we don't want everyone ending up in traffic if there is an evacuation."

Although the Essex County Sheriff's Office is in charge of the county's emergency planning, management directives come from the state OEM, which in turn is under the federal OEM.

Mike Augustina of the State Police Headquarters for the New Jersey Office of Emergency Management, said the state OEM workers call the directional signs "blue dots."

Augustina said it's frustrating to realize people may not be aware of the signs' purpose.

"We spend a considerable amount of time assisting counties with public warnings," said Augustina. "They need to know how they get the warning and what to do. We are very proud of a Web site [www.stormready.noaa.gov] we have for our StormReady Program and wish people would check it out."

Augustina said that in an emergency it would be a knee-jerk reaction to simply follow the signs without being directed to do so.

"Suppose there is a chemical spill," said Augustina. "We might tell people to stay in their homes and close their windows. Going for the escape route could be the worse thing to do in case of something in the air that you don't want people exposed to."

Under the direction of the Essex County OEM, Montclair's Office of Emergency Management is headed up by Deputy Fire Chief Kevin Allen. Coordinators include Deputy Fire Chief Jarvis Hawley, Police Lt. Ken Miscia, and Township Manager Joseph Hartnett. The Township's Emergency Response Plan, a manual the thickness of three telephone books, is kept in the Municipal Building, 205 Claremont Ave., and lists

specific duties assigned to the Fire and Police departments in addition to the Montclair Volunteer Ambulance Unit and the Health Department.

For example, the Fire Department is in charge of helping with the evacuation of those who are disabled, in addition to fire and rescue, emergency lighting, and damage assessment.

The funding for the Montclair OEM comes from a Municipal Homeland Security Police Assistant Aid Grant, Hartnett said.

"You won't find any extraneous expenditures in our records like you hear about in some towns," said Hartnett. "Everything is accounted for, right down to the penny."

This year's grant of $140,000 was used for a new emergency dispatch center, OEM training and emergency first aid supplies, Hartnett said.

Montclair Health Department Educator Erica Abbruzzese said that the Health Department would be the responsible party in a scenario where the evacuation was a result of a bioterrorism attack or disease.

"We also become involved if there's a public health impact as a result of people leaving," she said. "An extended evacuation can bring disease. We've conducted tabletop exercises to prepare for such emergencies along with police, fire and the American Red Cross."

Abbruzzese said the most important part of a tabletop exercise is learning afterward what needs to be improved.

"The big-term use in emergency training now is `notionalize,' which is taking note of what we should have done differently," she said. "We realized, for example, that when there's a communicable disease out there, or an act of terrorism, we may not know at first. We learned from [Montclair Police Detective] Lt. James Carlucci to ask even more detailed questions so that we can better track how and where the person may have contracted the disease."

Abbruzzese said if the Health Department had an emergency message for residents, then it would be announced in a press conference, by radio, through reverse 911 calls, and would be posted on Montclair's Web site, www.to.montclair.nj.us.

"What you need to keep on hand in case of emergency may seem quite obvious, but we get a lot of phone calls asking about that," she said. "So obviously people need to know. We tell them to have ready a family kit: water for three days, a flashlight, batteries, and a radio."

It's also important to have a family plan, she said.

"Have a family member outside of the state who is designated as sort of a bulletin board in case you are separated from family members while

evacuating," Abbruzzese said. "With Katrina, we saw that in-state telephone lines were unavailable, but people could call out of state. If you choose one person ahead of time, that person can act as a sort of bulletin board and communicate to your extended family, who then can relay back to you where everyone is. You should also write down important phone numbers, including a pharmacy and your children's school or day care numbers. Make sure you have all the numbers together and make sure the contact person has them."

Abbruzzese noted the Web site, www.njhomelandsecurity.gov, offers further instructions for evacuation and emergency preparedness and family kits.

"It's in English and Spanish, and it states in layman's terms what we should all have handy," she said.

No matter what the scenario of an evacuation, the goal is restoring life to normal as quickly as possible, said Augustina. What he most wishes people would do is to take a look at the town's emergency plan and come up with a personal plan for the family in the case of evacuation.

"There have been kids who have done this in their schools," said Augustina, "And they've actually in some cases done a better job than the schools in making sure that everyone knows what to do. So really, all of us should be doing that what would happen if an emergency happened here and now no matter who you are or where you are. Are you really ready?"

Hello to all EC_EmComm members.
My name is Ron Blanchard KC2PSY.
I have taken the position of Emergency Coorinator for the the Essex county Central Region.
Thanks to the hard work of Bob Crifisi,major strides have taken place in the past couple of months.
We are now on the way to setting up a reliable system for Emergency Communications.
Im looking forward to getting to know our members in the near future.
Thanks to all.
Ron Blanchard

160. WV2ZOW/R, on 443.050 MHz, Joins W2UHF Repeater System Network

Yahoo group: EC_EmComm
Date: 2007-04-02 00:23:55 UTC
From: Tony L.
Topic: 160 Message: 160

The Morris and Essex Amateur Radio Club, Inc. is pleased to announce that WV2ZOW/R, located on the campus of Montclair State University and operating on 443.050 MHz with a CTCSS tone of 141.3 Hz, is now linked into the W2UHF repeater system.

The W2UHF repeater system consists of four linked amateur radio repeaters in the NYC metropolitan area, including 448.875 MHz in Verona, NJ (CTCSS 151.4 Hz).

The addition of WV2ZOW/R will provide W2UHF repeater system users with significantly improved coverage in areas just east of the First Watchung Mountain Range (Montclair, Glen Ridge, Bloomfield, Nutley, etc.).

Special thanks to Ken, W2KR (tech support), Mike, WV2ZOW (repeater trustee), and Dave, WA2SVM (site acquisition), for making the addition this repeater into our system possible.

All repeaters in the W2UHF system are owned and operated by members of the Morris and Essex Amateur Radio Club, Inc. There are no mandatory fees or dues required to use this system.

All repeaters in the W2UHF system are available for ARES, RACES, SKYWARN, and/or OEM use at any time.

217. Frequency List Posted

Members,

Please note that a new file has been uploaded to the EC_EMCOMM group and features a list of our repeaters, as well as other repeaters that are published and are in Essex County. This is by no means an exclusive list. If you know of any repeaters that are not listed and should be listed, or repeaters that are listed and are now off-air, please inform myself or Bob so that we can keep the list as up-to-date as possible.

I encourage everyone to take a moment to download and print this file for their own use.

Thank you in advance, 73's and Happy Holidays!

275. New Cell Phone Law

Yahoo group: EC_EmComm
Date: 2008-03-01 00:24:07 UTC
From: wb2jgz
Topic: 275 Message: 275

Starting tomorrow, the "new and improved" NJ cellphone ban takes effect. The link shown below points to a copy of the bill. Amateur radios have been exempted from this law. Hams who do mobile operation might want to print this out and keep it in their car just in case they encounter an uninformed police officer.

I was in Newark ~13:30 and had light rain. It has followed me up the
parkway and I am now in Clifton area. There has been virtually no wind to
speak of but it is now raining heavily, but I have seen worse. I just
spoke with Joe Peters in Pa. who reports rain soaking but nothing more.
He stated Delaware is expected to crest one-two feet over flood stage
~2:30 tomorrow morning. KC2PJR

KEVIN J. RYAN

DEPUTY DIRECTOR FREDERICK SCALERA

OEM/HOMELAND SECURITY

UPDATE

September 6, 2008

Issued at 1800 Hrs.

To: All Emergency Personnel

From: Armando B. Fontoura OEM Coordinator

Subject: Tropical Storm Hanna

The following is the latest storm information issued by the New Jersey Sate
Office of Emergency Management and the National Weather Service.

A Tropical storm warning has been issued for the entire state of New Jersey.
The previous rain fall totals have been reduced by ¾□ to 1□. That will

bring the possible rainfall totals to 3☐ to 5☐. The wind threat has been reduced to a maximum of 30 mph. Minor Flooding is still expected throughout our Region. Hide Tide has past and should not be an issue. In 3 -4 hours the center of the Hannah will be off of the coast. The storm will be ending in our Region between 2300 and 2400 hours.

The New Jersey State Office of Emergency Management opened and is operating at a Level 4 as of 0600 hours this morning. The New Jersey Urban Search and Rescue Task Force shall be deploying 1 operational team in the North and 1 operational team in the south.

The Essex County Office of Emergency Management opened their EOC @ 0900 hours this morning. Essex OEM will remain operational thru the entire event and recovery period. The Essex EOC will remain open until at least 2400 hours this evening.

Any Municipality opening an EOC or declaring a State of Emergency must notify Essex OEM as soon as you make any decisions on them.

Please monitor within your communities any events that may have tent operations in progress due to the wind from this storm.

If any community has any questions or concerns to this alert, please contact Essex OEM today by phone or e-mail for any further details.

The following is the contact information for Essex OEM. Please use our main phone lines for calls and any requests to the Essex Office of Emergency Management (phone # 973-395-2572 and fax #973-414-1506). If for any reason that number becomes unreachable or not answered, please call our Main dispatch phone # which is 973-621-4111.

Essex OEM will send updates out as they are received from the State of New Jersey and the National Weather Service.

This is also a reminder to please make any emergency preparations that can be done in advance within your community.

441. Essex County EmComm Hanna Wrap-Up Report 09/07/08

Yahoo group: EC_EmComm

Essex County EmComm

Hanna Wrap-Up Report

09/07/08

SITUATION REPORT # 4

NEW JERSEY STATE EMERGENCY OPERATIONS CENTER

Issued: September 6 2008, 0800 hours

Rainfall: 5 to 7 inches statewide

Winds (shore): 35 to 50 mph, gusting to 60 mph

Winds (inland): 25 to 40 mph, gusting to 50 mph

Storm Surge: 1.5 to 2.5 feet above normal high tides

High Tides: Early pm on the ocean, later pm on back bays

Flooding (coastal): Moderate Coastal Flooding

Flooding (inland): Minor to moderate (see attached map for locations)

Essex EOC due to open Saturday 9 am

==========

K2DEE manned the Essex County RACES station at the EOC

Monitoring the 220 band traffic with Trenton

WA2JSB 2Meter monitoring began 20:00 Friday 09/06/08 (KC2RFC)

WA2JSB 440 was monitored during the weather event as well (KC2KZK)

The NJLEECA (GMRS/Commercial) Radio System was monitored during the event

==========

SITUATION REPORT # 5

NEW JERSEY STATE EMERGENCY OPERATIONS CENTER

September 6 2008, 1200 hours

At 11:00 hours, the center of Tropical Storm Hanna was located at 36.6°N,
77.4°W or

about 180 nautical miles southwest of Cape May. A Tropical Storm Warning has been

issued for the entire Jersey Shore and Delaware Bay. A Flood Watch and Tropical

Storm Wind Warning is in effect for the entire state thru Saturday night. National

Weather Service Mt. Holly anticipates issuing a Flash Flood Warning. The rain is

expected to exit the state around between 10pm and midnight. There will be minor to

moderate flooding. The National Weather Service will provide more guidance on the

flooding later today.

Rainfall: 4 to 6 inches statewide

Winds (shore): 35 to 50 mph, gusting to 60 mph

Winds (inland): 25 to 40 mph, gusting to 50 mph

Storm Surge: 1 to 3 feet above normal high tide

High Tides: Early pm on the ocean, later pm on back bays

==========

Contact was maintained among the radio operators as reported

(K2DEE, KC2RFC, KC2KZK and NJLEECA Unit# 9050) during the event.

The status of the Essex County area and EOC was exchanged during radio traffic.

KC2KZK Checked in to report on the status of the WA2JSB 440 and K2DEE 220 repeaters

KC2OWQ Checked in with reports regarding the Morris County activity

KA2HJH Kept a constant flow of weather information available

KC2SVO Checked in with availability and the local situation in the Caldwell area

While neither Essex County RACES, nor Essex County ARES formally declared an activation,

both maintained standby communications during the event.

It should be noted that Essex County EmComm (RACES and ARES) are now included in the Essex County SITREP distribution.

David,
I called a general meeting recently, leadership showed up but none of the general membership seemed to have the time or interest to attend. It may be a while before I attempt that again. There seems to be a small group of new members that is growing. I may arrange a small meeting with them, you among them. I may not always be happy with the slow growth of this group but any growth is good.

Hi, Bob,

Why not schedule regular meetings (i.e., every fourth Tuesday or every third Saturday)? This will allow the more interested, proactive members to participate regularly and not allow the uninvolved to limit activity. Just a suggestion. Hope all is well!
See you on the radio!

Trash is turning into key power source for NJ
By DAVID PORTER, Associated Press Writer David Porter, Associated Press Writer –
1 hr 45 mins ago
AP – A methane gas collection pipe sticks out of the 1-E landfill in Kearny , N.J. , Monday, Oct. 6, 2008, with …
KEARNY, N.J. – Standing atop the 400-acre 1-E landfill, you get a panoramic view of the Meadowlands sports complex to the north and the New York City skyline to the east. You're also standing on a critical part of New Jersey 's, and the nation's, energy future.
Decades worth of household trash, construction waste and assorted refuse buried in the landfill is providing electricity to thousands of homes.
"It's like you're buying back your own garbage, but in a different form," said Tom Marturano, director of solid waste and natural resources for the New Jersey Meadowlands Commission, which owns and operates the 1-E site.
The Kearny site is among 21 landfills in New Jersey where methane gas produced by decomposing garbage is used as fuel to generate electricity, according to the state Board of Public Utilities.
That is almost as many as in the state of Texas , and more than the combined number in Georgia , Mississippi , Louisiana , Arkansas and Oklahoma .
Nationwide, the federal Environmental Protection Agency counts 455 landfills that use their methane to generate electricity and has targeted more than 500 more as potential candidates through its Landfill Methane Outreach Program.
One of New Jersey 's leading environmentalists envisions the state's landfills someday making more use of their sites by installing wind and solar power to supplement methane.
"We see landfills as potential New Age energy plants, because you can combine all three and create a steady source of power – and not everybody wants a windmill in their back yard," said Jeff Tittel, executive director of the New Jersey chapter of the Sierra Club.
Marturano cautioned that adding wind farms might take a while since landfill surfaces are constantly shifting, but the Meadowlands Commission already has plans to install 20 acres of solar panels on the southern side of the 1-E landfill.
Gov. Jon S. Corzine's Energy Master Plan for the state touts landfill methane gas as one of the key renewable energy sources that the state hopes will combine to supply 30 percent of New Jersey 's electricity consumption by 2020. According to the plan, New Jerseyans produce 6.7 pounds of trash per day, 50 percent more than the national average.

While wind and solar power are in their relative infancy in New Jersey — Corzine recently announced the state's first offshore wind power project — landfills in the state have been collecting methane gas and using it as fuel to generate electricity for more than two decades.
Mike Winka, director of the BPU's Office of Clean Energy, said new landfills in New Jersey are required to be designed to accommodate methane gas collection.
Existing landfills can produce methane long after they've been shut down.
For example, the freshest garbage in the Kingsland landfill, adjacent to 1-E, dates from 1987, according to Marturano. That means the half-eaten Big Mac you threw away at the end of the Reagan administration may be helping to light your neighbor's home today.
Marturano estimates the 1-E landfill can keep collecting methane for 20 more years or so. He said the energy produced by the four landfills in the Meadowlands district powers about 25,000 homes.
The Edgeboro landfill in East Brunswick , operated by the Middlesex County Utilities Authority, has been collecting methane since 2001 and currently generates about 13 megawatts of electricity, enough for about 13,000 homes for a year, according to Public Service Electric and Gas, the state's largest utility.
The Middlesex County agency uses the electricity generated by the Edgeboro landfill's methane to power the county's wastewater treatment plant in Sayreville . Last year, that saved the authority about $3 million, according to executive director Rich Fitamant.
Methane gas is produced by microorganisms that feed on organic matter in trash. The bacteria are not picky eaters and have adapted to feasting on wood, cardboard or plastic if food waste isn't available.
"It's evolution on a fast track," Marturano said.
Long tubes with perforated bases are drilled down into a landfill to collect the methane gas, which then is used as fuel to drive generators. Inactive landfills like 1-E are capped, usually with a plastic or rubber covering that prevents excess gas from escaping.
"People used to think of the landfills as wasted space," Marturano said. "But we're turning them from the juvenile delinquents of the district into productive members of society."

Happy New Year! (Almost)

There are some new members on the forum. I'm hoping to make contact with you guys in the next week. Email me and let me know what night in the next two weeks you might be available for a brief face to face meeting. I would like to make it during the week as my weekends (and yours I'll bet) are pretty full. We need new enthusiasm and leadership and I'm hopping you guys can provide some of it. As soon as I can gauge how many may be interested, I'll find an appropriate site, and get back to those that have responded. Let's make the coming year a good one for Essex County EmComm!

Please get on the net tonight.

From: Robert Crifasi
Topic: 483 Message: 483

I mentioned having a meeting last week. I would like to have two this week at my house. One of them on Thursday and one on Friday night at 7:00PM. They are intended for new interested members, but all are welcome. I am doing it this way because the numbers in the past have been small and I know there are many conflicting functions particularly at this time of the year. I want to do it in spite of those things because there are some new folks that have voiced interested and I want to get them involved. Anyone that would like to attend one of the meetings please contact me first. I need to know how many to expect for each night. My home is in West Orange and I will give directions when you contact me.

Subject: The museum station WB2JSM needs your help
To: k2lazm@gmail. com

Dear ARRL members,

For more than 35 years, the Hall of Science Amateur Radio Club (HOSARC) has demonstrated amateur radio to children at the Hall of Science Museum in Queens, NY. We have also trained hundreds of new hams at our free ham radio classes at the museum. We are now in jeopardy of being removed from the museum as amateur radio is no longer a priority exhibit at the museum, there is a change of leadership at the museum, and there are renovations going on at the museum .

To help maintain our demonstration station, I need ARRL's help. Specifically, I need ARRL to make mention of our plight on its "Amateur Radio News and Features" frontpage and post a link to our petition to stay in the museum. Our petition can be found at: http://tinyurl. com/6ljost

We need many thoughtful signatures on our petition before we meet with the new president of the museum to plead our case (hopefully in the first week in January). We need to show our new museum president (Dr. Margaret Honey) that amateur radio is still an important part of children's science education and that she can and should take advantage of the wonderful resource amateur radio can be to the museum.

Additionally, if the ARRL has any connections to New York City government officials, those connections would certainly come in handy when talking to the museum.

I look forward to hearing from you,
Tom Tumino, N2YTF

10 K2GVC Bill

11 KC2OWQ Mark

12 KC2SOU Ron

13 W2IBM Harold

I'm proud to say we had representation from Red Cross and most of
the area clubs (ARC2, IART, IRAC, NARC and WEARC). As well as our RACES
Radio officer (Ray).

I mentioned the fact that West Orange CERT will probably be joining us
for some of the exercises we may have this year. I will also be working
with other area EmComm groups to expand our access to training.

Ron (KC2SOU) mentioned there will be SKYWARN training being offered in
his area. He will get back with more info, and let us know if there is
room for more. I am aware that Leon (N0TAZ) is working on offering
SKYWARN training in his area. I was expecting him to fill us in but he
had signal problems later in the net.

As the Net officially closed Mike (WA2JSB) joined the conversation that
followed. Mike was pleased to hear the turn out for the net. Let's
keep it up guys. Great kick off for the year.

494. 'The most dangerous two miles in America'

Yahoo group: EC_EmComm
Date: 2009-01-10 04:09:02 UTC
From: Robert Crifasi
Topic: 494 Message: 494

Essex County Amateur Radio Operators:

Last week I was talking to a fellow ham operator. I was trying to impress upon him the need for a well organized, properly trained communications team, particularly in Essex County. This was his response: "I understand you feel there is a real need for the group you have been trying to put together. I just think you are becoming an alarmist. This is the suburbs, there is nothing in this area that would attract much attention or cause a large disaster!"

Read below:

==========

Anderson Cooper Blog 3600

Tuesday, August 15, 2006

Drive up and down the New Jersey Turnpike, and it's easy to see why this state is a potential playground for terrorists. There is a two mile stretch from Newark Airport to Port Elizabeth that terrorism experts have dubbed, "The most dangerous two miles in America."

"It's the consequence that frankly scares the pants off of us, when you think about what might happen in such a congested area," says New Jersey Homeland Security Director Richard Canas.

New Jersey is the most densely populated state in the country. And on this particular swath of land there are hundreds of potential terrorist targets -- chemical plants, rail yard, rail lines, refineries, an international airport, and the third largest port in the country, Port Elizabeth.

If a terrorist were to strike one of the many chlorine gas plants here, how much damage could he do?

==========

Care to guess which county contains those two miles? Enough said?

496. Information From the NNJ ARES Sectionwide Net

Yahoo group: EC_EmComm
Date: 2009-01-13 02:43:19 UTC
From: George Sabbi
Topic: 496 Message: 496

Several new and important EmComm related items were discussed on the NNJ ARES Sectionwide Net on Monday evening Jan 12 2009, among them

1. The new NNJ ARES Alert Status Chart (available online at www.hudson.arrl.org/nnj/ares). This chart was an outgrowth of the highly successful NNJ ARES Sectionwide Leadership Meeting held last December. More items will be forthcoming as were discussed and determined at that meeting by the ARES Leadership in NNJ including the use of the NNJ ARES Group for more communications to the full ARES Membership in NNJ. See www.hudson.arrl.org/nnj/ares for information on how to sign up for the List.

2. The new NJ Statewide SKYWARN Coordinators Net. This net is being done to afford the SKYWARN Coordinators, Deputies and Assistants to have a central communications point during a severe weather or other widespread weather related event. SKYWARN Coordinators, Deputies, Assistants as well as ARES DECs and ECs are requested to checkin on the weekly drills and during severe weather events. Testing of the system continues in an effort to establish as much statewide coverage as possible within NJ and perhaps including the NWS offices in Mt Holly and Upton NY.

More information on these and any NNJ Section ARES items, is available from your County ARES DEC

George,

I am so glad to see your support for the effort Leon is contributing to the NNJ SKYWARN organization. I have been watching it and am very enthusiastic about it. SKYWARN is a significant part of EmComm. I hope Essex County SKYWARN will do its share in stepping forward to move this effort ahead. We need this kind of leadership on the EmComm scene. This year promises to be a good one for EmComm in general. Let's all pitch in and make it happen.

500. New Jersey Skywarn Coordinators' Net

Yahoo group: EC_EmComm
Date: 2009-01-22 03:13:28 UTC
From: Robert Crifasi
Topic: 500 Message: 500

From: Leon Grauer, N0TAZ
Mercer County Skywarn Coordinator

Greetings,

The next New Jersey Skywarn Coordinators' Net will be this Saturday, January 25th, at 6:30 PM on the N2ROW linked repeater system. Repeater and EchoLink information can be found here: http://www.n2row.net/ <http://www.n2row.net/> . This Net is for New Jersey Skywarn Coordinators, Assistant Coordinators and Deputy Coordinators. New Jersey ARES, RACES, SATERN, ARC and municipal Emergency Coordinators and Assistant Emergency Coordinators are welcome to check in.

Those of you intending to check in to last week's Net noticed my absence. I apologize for not being able to run the Net, as I was on the road and way out of range of the repeater system. However, like all nets - particularly emergency and Skywarn nets - any Coordinator should act as Net Control when the scheduled NCS is not available. In previous e-mails, I have asked for someone to serve each week as a back-up Net Control Station. There have been no takers. The success of this Net and the intended emergency use of the ROW system cannot depend on one person.

Many have voiced enthusiastic support for this idea. Some have suggested different ideas about how and when the system should be activated. I agree with some suggestions and disagree with others, however, none of that matters if we cannot even manage to have a meaningful net once a week. Ultimately, the idea is for the system to be used not only for inter-county Skywarn communications, but also as a reporting mechanism and link between the Mt. Holly, NJ and Upton, NY NWS Forecast Offices. Again, great aspirations that will be meaningless if we do not all commit ourselves to making this Net a success.

Rich (N2ROW) has been kind enough to make this repeater system available for our use. He, Bob (KC2RFC) and George (KC2GLG) have done a great deal to publicize and support the Net. But, with Coordinators and Assistant Coordinators from eight (8) different counties receiving these announcements each week, we have had only 3 or 4 check-ins per week, including Net Control. That's really dismal - particularly for the most enthusiastic and involved group of all: Coordinators.

I am only trying to encourage full particpation, not criticize anyone. I believe that we all have the same goals in mind and, as we know all too well, good intentions and knowing how to push a PTT button just don't cut it when there is severe weather coming through and a

genuine need exists to notify other counties or the NWS in seconds. Some coordinators are writing me or calling me on the air and on the phone asking for the repeater frequencies closest to them. This means that some are not taking the time to go to the N2ROW website, review the repeater information and program their radios. I cannot assess which repeater works best for you. It is better that each Coordinator review the repeater information and program one, two or three (or more) into their radios to see which is best for their location. Maybe you want to keep more than one programmed in case one of them is not working properly or off the air for some reason. The radios I use in Northern New Jersey have several of the repeaters on the system programmed in. My radio at home has both the Bordentown and the Old Bridge, NJ repeaters programmed into it.

Enough said. Please, let's make this week's Net a success by having full participation. Currently, this list includes Coordinators from Burlington, Camden, Essex, Hudson, Mercer, Middlesex, Monmouth, Ocean and Somerset Counties. Please feel free to share information about the Net with Coordinators from the remaining New Jersey counties -- especially Morris, Bergen and Passaic.

Finally, if anyone is willing to serve as the back-up Net Control Station, please advise me NO LATER THAN Thursday night so that I may e-mail the script to you. I will not be able to do this on Saturday, as I will not be anywhere near a computer all day. I thank you for your support and look forward to your checking in to the Net this Saturday evening at 6:30.

The following weather update was provided by the Essex County OEM:

*The NJ Regional Operations Intelligence Center reports that the NJ
Office of Emergency Management is monitoring a weather event in
coordination with the National Weather Service. The NJROIC and NJOEM
will continue to monitor this event and provide updates as issued by NWS.*

* Snow beginning now from S progressing N by afternoon
* Light through dusk today, little accumulation
* Heavy snow after dark and through midnight
* Accumulations 4-8" north and west central
* 3-6" NE and SW
* 1-4" coastal
* Temps rise a bit after midnight to mix in sleet and freezing rain
* Possibility of 1/4" ice accumulation statewide except extreme NW
* North of I-195 mix may continue through PM rush hour tomorrow
* South of I-195 should change to rain in early afternoon
* Event ends from SE to NW after rush hour tomorrow night
* Winds and flooding not factors
* Next weather package around 4pm

NOTE: Where and when changeover to rain occurs still varying.
Tomorrow's evening rush hour may still be hazardous in many areas.

See attached map.

*The NJ ROIC and NJ OEM will continue to monitor this Weather Event
and provide updates as issued by the NWS.***

EC_EmComm Members tonight was another great net. Good things are happening and we discussed many of the bigger issues on the net tonight. We are in the planning stages of a table top exercise. Essex County EmComm Jackets are available for purchase (contact me). ARES Titles will be changing to fall in line with the rest of the country. I would like to see EC_EmComm represented at the upcoming local ham fests. There is an NJEPA seminar scheduled for May, please contact me if you are interested in going. We will be working on and exercising the call activation list. Please take this seriously and respond. There are new Alert codes in use for NNJ ARES I will post them here along with other NNJ ARES info. We will be building an event list for the county. This will be composed of County and Club events. Please contact me with contributions and to volunteer to maintain the list. The same will be happening for a frequency list.

510. 2009 Cherry Blossom Run

Yahoo group: EC_EmComm
Date: 2009-03-01 14:42:15 UTC
From: Ray Linke
Topic: 510 Message: 510

I think it's rather ironic that I should announce the date of the 2009 Cherry Blossom Run on the eve of potentially the biggest snowfall of the year ;)

The 2009 Cherry Blossom Run will be held in Branch Brook Park, Newark/Belleville, NJ on Sunday, April 5th. Once again as we have done since the early 1990's, Essex County RACES with the help of the local clubs and ARES has been asked to provide supplimental communications along the 6.2 mile (10K) route. We will need to assemble in the park no later than 8:30 am and we are usually finished by 12 noon. Parking is available inside the park as long as we arrive before the county police lock it down.

We will be using the W2QR 447.875 repeater as it provides excellent coverage over the entire park. We have a few extra 440 radios if you don't have one.

In the past the group has enjoyed a get together for breakfast prior to the race. I am certainly open to that if there is enough interest. Last year we met in Bloomfield quite close to the park and it worked out well and the food was good.

We need 7 -8 volunteers. Please let me know by email (k2dee@...) if you can join us and indicate if you would like to meet for breakfast.

Ray, K2DEE

Here are a few subjects that were discussed for the EC Ares/Races&Skywarn net.

The Cherry Blossom Run was a great success with 9 volunteers.
Thanks to all volunteers for your time. There was been a change in
title for Bob Crifasi (KC2RFC). His title will change from district
emergency coordinator to County Emergency Coordinator.

Please be advised, we are still looking for people to fill in
the municipal positions for the county.

Hope everybody has a nice Easter and/or Passover...

From: Robert Crifasi
Topic: 518 Message: 518

Members,

Ron KC2SOU is the first of several new appointments, please welcome him. He will be directing our Net Control team. We will be building a team of Net Control operators to give Ron some flexibility.

Other appointments will be announced in the next few weeks. Some appointees have stepped forward; others have been recruited. They will continue to be filled as appropriate candidates are found. We need a leader for each Municipality and a leader for each Unit within the county. The county will be divided into seven Units containing several Municipalities within each. There will be Staff Officers and Liaison Officers appointed as well. I have visited some of the clubs and expect to visit each of them. Many of the appointees are coming from the clubs others are coming from the members at large. Feel free to contact me if you feel you can assist in attaining this goal.

Bob KC2RFC

521. Interesting Surprises

Yahoo group: EC_EmComm
Date: 2009-04-18 15:45:56 UTC
From: Robert Crifasi
Topic: 521 Message: 521

We have our own call sign (KC2UZI system). We are listed with the FCC as Essex County Emergencyy Communications. Yes I know two Y's that is how it is listed. I'll work on that next week. We have also applied for a vanity call (NJ2ESX, NJ2EX or NJ2ES). I don't think we can have NJ2ESX because of FCC rules but I wanted to try just in case. NJ2EX should be the next choice. It is available and correct according to the FCC so that's the one I think we'll end up with. NJ2ES was put in the list as a backup. I also thought of NJ2SX it sounds like Essex when pronounced but looks like Sussex when written so I left it out of the list.

I will have some announcements about additions to our roster to make soon. Some may be interesting surprises, some have already been accomplished, and others are in the works.

522. ARRL NNJ Section ARES Report...

Yahoo group: EC_EmComm
Date: 2009-04-19 02:42:08 UTC
From: Frankie L.
Topic: 522 Message: 522

ARRL NNJ Section ARES Report

1st Quarter 2009

George Sabbi ☐ KC2GLG

ARRL NNJ Section Emergency Coordinator

ARES activities in the NNJ Section over the last few months have been active. Several groups have used the colder months to reinforce their personal and group training, with several groups holding formal classes as well as many individual ARES Members taking additional FEMA and ARRL EmComm Classes. On the formal training note, please be aware that the ARRL is soon moving towards a 2-tiered setup with its EmComm Classes. In the near future, what was a 3 level training program will be condensed into a 2 level program. More information is available from the ARRL at: http://www.arrl.org/news/stories/2009/04/07/10756/?nc=1 <http://www.arrl.org/news/stories/2009/04/07/10756/?nc=1> . Taking the ARRL EmComm courses, along with practicing and understanding the items covered in them, is a good basis for getting all ARES members on the same page operations-wise, which during an EmComm activation, can be vital to having smooth and consistent operations.

The NNJ Section ARES Leadership has recently successfully tested and implemented, an automated phone and electronic media alerting system, similar to a reverse 9-1-1 system. This affords NNJ Section ARRL Leadership the ability to quickly and efficiently contact local ARES Leaders, in the event of a wide area Amateur Radio related EmComm situation.

Several hospitals in the NNJ Section have already, or are now, implementing plans for formalized amateur radio support during times of communications emergencies. NNJ ARES Leadership throughout the Section is working directly with these facilities to setup not only complete operation plans for staffing the stations, but also overseeing onsite installations of equipment, including radios and antennas at many of the hospitals.

As the Spring and Summer seasons arrive at long last, please remember that its time for the severe weather potential to increase in and around the NNJ Section. The NWS Mt Holly NJ and the NWS Upton NY will both conduct SKYWARN Spotter Training Classes in various part so the NNJ Section. Starting this year (2009) the NWS Mt Holly NJ, as was previously implemented by the NWS Upton NY, will be asking all SKYWARN Spotters to renew their formal training, at least once every 3 years in order to be considered as a an active (listed in the SKYWARN Spotter Database) SKYWARN Spotter. Remember, there is no requirement for a

SKYWARN Spotter to be an amateur radio operator (but it does help) so, when there is a Class offered in your area, why not make it a full family activity? Information on local SKYWARN Spotter Classes is available online at: NWS Mt Holly NJ SKYWARN Program: http://www.erh.noaa.gov/er/phi/skywarn/index.html <http://www.erh.noaa.gov/er/phi/skywarn/index.html> and for the NWS Upton NY SKYWARN Program: http://www.erh.noaa.gov/er/okx/Skywarn/skywarn.html <http://www.erh.noaa.gov/er/okx/Skywarn/skywarn.html>

For more information on these, and other activities related to ARES in the ARRL NNJ Section, you can directly contact your local ARES Leader. Information on who they are, and how to contact them, is available on the NNJ ARES Webpage at: www.hudson.arrl.org/nnj/ares <http://www.hudson.arrl.org/nnj/ares> . You can also send me an email at: KC2GLG@... <mailto:KC2GLG@...t> with any ARES questions, comment or concerns and remember to always Stay Safe!

523. You□ve Been Activated for EmComm Support: Now What Happens?

Yahoo group: EC_EmComm
Date: 2009-04-19 02:44:23 UTC
From: Frankie L.
Topic: 523 Message: 523

You've Been Activated for EmComm Support: Now What Happens?

You have been activated for Emergency Communication Support: Now what happens? This question was recently asked by George Sabbi, KC2GLG, Section Emergency Coordinator for the 12 counties of northern New Jersey, served by the American Radio Relay League's Hudson Division ARES (Amateur Radio Emergency Services). "First, and foremost, do not respond unless you are told to respond," Sabbi stressed, "There is no self-deployment ever□this is known as free-lancing."

He was teaching a course to ham radio operators, hosted by the Ramsey Office of Emergency Management. The class was told that they were expected to bring their own radios, antennas, and coax for 2-meter and 70-cm operations, as well as extension cords, power strips and plenty of batteries. Additionally, message forms, message logs, pencils, pads of paper, markers, basic tools, non-perishable foods and water would initially be required.

The class was taught the importance of the Net Control Station□that individual manning the base station□and the Incident Command Post, again the public safety official responsible for the overall emergency. Message sending, which had been covered in a previous course, was highlighted as the main obligation of those amateur radio operators monitoring the ham radios and logging-in the data received.

The participants in the class included: Michael Adams, WA2MWT; Joyce Birmingham, KA2ANF; George Sabbi, KC2GLG; Richard Busch, KC2PYB; Craig Goldman, K2LZQ; Gil Piaquadio, Jr., KC2NLL; Stephen Adams, AB2XU; Robert Halpin, KC2LOK; William Deegan, KC2TBC; Karl Frank, W2KBF; Thomas Bennett, W2TAB; Noel Spears, N2OEL; George Halpin, WA2HFH; Ronald Bosco, WB2GAI; Linda Louie, W2BCR; Paul Hennion, KC2FMJ; Gordon Beattie, W2TTT; Avinash Mirchandani, KC2NDO; Louis Janicek, N2CYY; and Richard VanDerWall and James Houston, unlicensed.

Michael Adams, Ramsey OEM Coordinator, concluded, "As an ARES Responder, you and your team members are there to provide a reliable and functional amateur radio based communications support function for the site or agency that you are officially assigned to□good luck and keep in mind that your services are very much in demand."

The third and final course in the series will be taught on Sunday, April 19, at 2:00 PM, at the Ramsey Rescue Squad Headquarters. This session will feature new information while serving as a review for

the first two classes. If you missed one or both of the classes, you can make them up while preparing for a full-scale exercise to be held in May. For additional information and directions, please e-mail Michael Adams at wa2mwt@... <mailto:wa2mwt@...> .

Submitted by Michael Adams, WA2MWT

That's exciting, but kind of disappointing too. I kind of like KC2UZI. It sounds dangerous, haha.

I came across this guy's website with one of many online lists of repeaters in and around the NYC area. KJI has a D-STAR machine in Cedar Grove, apparently.
http://gilbertoperen.com/HP1GAP.html

This is only interesting because I hadn't seen it before, and just saw ones like these:
http://www.nationsdial.com/nk2u/
http://www.qsl.net/n2ffl/repeaterlist.htm

Good morning all,

Gene no longer uses his personal callsign on his D-Start repeater. The callsign is W2DGL. If I had to guess I would say that Gene chose the letters as in DiGitaL.

Here is the information:

Callsign:

W2DGL

City:

Cedar Grove

State:

NJ

Country:

USA

Website:

Gateway Registration URL:

Gateway Enabled:

YES

DSTARMonitor Enabled:

YES

ARRL Listed:

NO

Trust Server:

USROOT

Frequency Information

2 Meters (Usually "C" Node):

146.44500MHz +1.000

70 Centimeters (Usually "B" Node):

N/A

23 Centimeters Voice (Usually "A" Node):

1293.05000MHz -20.000

Note for 2 meter operation you need to enter the "C" node in the repeater callsign.

Regards,

Ray

Hello Brothers,

The CALL is cool as it is, but it might not fit with the ecomm idea..(LOL) I want to thank everybody with the help on the frequency list. I have a good list form a local ham, but I will work on it some more. It my be a good idea to have a "home " simplex frequency for us to use when we are on site. This will take sometime. but for now I am looking around 147.555 time will tell..

Just got back from vacation. I went camping for a week. I made a 80m dipole to have some fun at night or if the fishing was slow. Now what does that have to do with ecomm? I learned that I could talk to all my local club members(W2GLQ) and friends with no problem.(ABOUT 100 MILES) Lets remember VHF + UHF are great but they have limits as well...(please look into upgrading your license class if needed)

See you down the log

530. ☐Swine Flu☐ (H1N1) information

Yahoo group: EC_EmComm
Date: 2009-04-29 14:48:08 UTC
From: Robert Crifasi
Topic: 530 Message: 530

Essex County EmComm Members,

I'm sure you are all very much aware of the "Swine Flu" (H1N1) information being distributed. Like you I am receiving a great deal of redundant public information. The shear volume of it can tend to make us worry. This is a significant and serious situation. There is also information being distributed via the governmental and professional channels. What I am seeing there gives me encouragement that our leaders are on top of this one. It is not under control yet and may get worse before it gets better. However there are no efforts to minimize the appearance of situation. Preparations to deal with the evolving problem responsibly are in motion. Concurrently every effort is being made to understand it fully and bring it under control quickly if possible.

What does this all mean for Essex County EmComm? Best case scenario leads me to believe we will not take part in it at all. The situation indicates no immediate impact on the communications system. Even if the situation does escalate the communications system should still handle any increased load. I would see a need for EmComm support if the POD system were put into effect to distribute medication. We could be of some service to aid Law enforcement with traffic control communications. While we are not nearly as organized as we could be, we could do a responsible job as we stand. If any of you were involved with TOPOFF 3 you will remember portions of that exercise were directed to that issue specifically.

What is our best course of action at this moment for Essex County EmComm? Let's keep moving the effort ahead to build this organization. We need to put in place all the pieces for an effective activation. We are not there yet. But if we keep working on it in earnest we will get there. If we are called upon before we are totally ready, we will do the best we can, with what we have at the moment. We can never do more, we should never do less.

Stay responsibly informed and if possible try not to worry needlessly. Follow the health information you are receiving to increase your chances of staying well.

I agree. Just my two cents here. Often when a dangerous situation arises like this, the government will provide innoculations to people who work in government response roles. This goes with things like Anthrax and Blubonic Plague. Maybe we can find someway of being on the inside if the government decides that certain agencies need to get this?

OK Guys,
Its official!
Essex County Emergency Communications has its own vanity call sign.

NJ2EX

And now the FCC also knows emergency only has one "y" in it.

538. JCP&L will be performing aerial inspections

Yahoo group: EC_EmComm
Date: 2009-05-07 15:13:05 UTC
From: Robert Crifasi
Topic: 538 Message: 538

Essex County EmComm Members:

Please be advised that JCP&L will be performing aerial inspections of its overhead transmission lines in northern and central New Jersey beginning Tuesday, May 12 and concluding approximately Friday, May 22, weather permitting.

The patrols will be conducted by Haverfield Corporation.

During the inspections, customers may notice a helicopter hovering in areas near substations and transmission lines.

The helicopter call letters are N765KV (Black with Red stripes).

Rory Zach County OEM Coordinator

Yahoo group: EC_EmComm
Date: 2009-05-20 15:44:08 UTC
From: Robert Crifasi
Topic: 539 Message: 539

The New York City Police Department advises that a military aircraft flyover will occur today, Wednesday, May 20, 2009. The flyover is part of the Fleet Week festivities and will include four military planes flying over New York City at a low altitude. At approximately 1145 hrs., four F-18 Hornets will pass over the Verrazano Narrows Bridge at an altitude of 2000 feet. The aircrafts will then turn and follow the Hudson River north over the assembled fleet while decreasing their altitude to 1000 feet. When the F-18s reach Pier 90, they will climb to 2500 feet and higher, exiting New York City airspace over the George Washington Bridge.

542. NJ2EX , let get the call out there!!!!!

Yahoo group: EC_EmComm
Date: 2009-06-22 15:50:14 UTC
From: Ron B
Topic: 542 Message: 542

To all Essex County Members and Friends

I think it is time to get our call out on the AIR !!!
July 18-19 there is a VHF contest. It starts on Sat. at 2pm
and ends at sun 5pm. It would be great to get NJ2EX on the air
for at least a couple of hours. We could use this as our first
outing as an Ecomm group.I have a radio we could use and I want to
get a small 2m beam anyway so, if there are people who would be
interested in operating please let me know. I know a couple of
places we may want to try... I am open to all comments,
we can go for a couple of hrs on one day or two.

Remember this is not just for fun, its also to learn how to
become a good ecomm group, and put a station up and running..
If there is enough of a response I will put up a list of things we
will need.. I think it will be a lot of fun and we can learn a lot
as well even get laugh or too.. my email kc2sou@...

Subject: All NNJ ARES Leaders - Information From ARRL HQ on the 2009 SET exercise FW: 2009 Simulated Emergency Test

To: ARRL NNJ ARES Leadership

re: SET - Simulated Emergency Test 2009

Please mark down and start to circulate this information to your local Teams and Served Agencies: The 2009 ARRL SET (Simulated Emergency Test 2009) will take place on October 3-4 2009

(Note, as per the ARRL: "The SET weekend gives communicators the opportunity to focus on the emergency-communications capability within your community while interacting with NTS nets. Although the main SET weekend this year is October 3-4, local and section-wide exercises may be held throughout the fall season."

Like last year, I would like to again suggest and encourage that you and your local teams give full consideration to conducting a SET within your local jurisdiction or with neighboring jurisdictions. .

Having a local exercise, in addition to the wider-scope exercise, allows you to direct your team to practice activation with the things that are more likely to incur an amateur radio related EmComm event in your area.

Stay Safe and Stay Alert, be it for severe weather or any other potential amateur radio EmComm needing situations and let me know if you have any questions, etc on the SET event or anything ARES related!

Subject: 2009 Simulated Emergency Test

Hello, Section Managers and Section Emergency Coordinators.

(This message is going to both the ARRL SMs and ARRL SECs)

The 2009 ARRL Simulated Emergency Test will be held once again this fall season. October 3 and 4, 2009, is the main focal-point weekend for the SET. As in past years, you and your fellow Section Leaders and Emergency Coordinators may conduct local and section-wide exercises throughout the fall season. The point, of course, is to have the most effective exercise whenever it is held. .

September QST will also have an article that announces the 2009 Simulated Emergency Test. Best wishes on planning and conducting your 2009 SET!
Thank you.

Some of our members have mentioned an interest in the CERT program in the past so I am forwarding this information. I expect to attend myself. It should be a good time. It's nice to see the local CERT program beginning to take shape. By the we will eventually have our RACES Radio room and possibly our meetings at this site.

Bob KC2RFC

==========

TRI-COUNTY CERT/MRC DAY

(ESSEX, HUDSON, UNION COUNTIES)

DATE: SATURDAY, SEPTEMBER 26, 2009

TIME: 9:00AM-3:00PM

PLACE: RICHARD CODEY ARENA-(REAR LOT LEFT)

560 NORTHFIELD AVENUE

WEST ORANGE, NJ

ALL CERT/MRC MEMBERS, INSTRUCTORS, AND ANYONE WISHING TO JOIN ARE WELCOMED

AGENDA:

· POD TRAINING

· SHELTERING TRAINING

· H1N1/SWINE FLUE Q&A

· ESSEX COUNTY SHERIFF K-9 BOMB & SEARCH TRAINING

· CERT TRAILER DISPLAY

· UMDNJ MASS CARE UNIT DISPLAY

· PSE&G FIRE & WIRE SAFETY DEMONSTRATION

· NEWARK ESU DEMONSTRATION

· FIRE SUPRESSION TRAINING (FIRE PIT & EXTINGUISHING)

LUNCH WILL BE SERVED

On 09/05/09, last Saturday Essex County EmComm Leadership met. The meeting was held at the North Caldwell Firemen's Community Center. Thank you to the North Caldwell Fire Company for allowing us to use their facility. It felt like old home week for me, I spent many nights there as a volunteer fire fighter. It was a great meeting for us, Essex County EmComm. The group is really beginning to solidify.

Present were:

Frank Levine KC2AUP County Information Officer

Ray Linke K2DEE County RACES Radio Officer

Mark Curcio KC2OWQ Morris County RACES Liaison

Rich Moseson W2VU Bloomfield Municipal EC

Ron Boucher KC2SOU County ARES Radio Officer

Bill Fitzsimmons N2LMU MARS Liaison

558. NPM is here.....

Yahoo group: EC_EmComm
Date: 2009-09-27 05:10:52 UTC
From: Frank
Topic: 558 Message: 558

National Preparedness Month is here. Are you prepared for a radio emergency?

It's a good time to remind ourselves that, in an emergency, how well we use an available radio will largely determine the outcome. NPM is a good time to ensure that family and friends know how to use a radio correctly in an emergency. Share this information with them.

Remember that you must broadcast repeatedly your distress message:

WHERE exactly you are: (State/Prov.; Road; Mile marker; Nearest town; Landmarks; etc.)

WHAT is wrong: (Collision; Illness; Fire; Injury, etc.)

WHO is calling: (Call sign; Name)

EMCOMM or police monitors need to hear these details repeatedly so they can piece together your message if reception is poor. They must rely entirely on your radio skill since you may be unable to hear them ask for missing details. To get help, you must make it happen.

Once monitors know WHERE exactly, they can get help on the way. It is the most critical part of a distress message. WHAT helps them send the right help. WHO validates the call. Keep each broadcast identical so monitors can listen for a specific detail they need. Be sure the details you give are accurate.

Lives may depend on you. Be prepared.

Frank

559. THIS IS A DRILL MESSAGE

Yahoo group: EC_EmComm
Date: 2009-09-27 18:33:57 UTC
From: kc2rfc
Topic: 559 Message: 559

THIS IS A DRILL MESSAGE

Be advised that several additional developing weather related
situations, additional that is to the current rain that has now impacted
the greater NJ and other areas, including a Flood Advisory (see below
for the actual issued Bulletin by NWS Mt Holly) that was issued this
morning for areas to the South of the NNJ Section, for points within the
SNJ Section, could result in not only an impact on our Section, but
could also develop into an ARESMAT type request for assistance outside
of our local area.

The new DRILL situations developing now are that winds, possibly of a
moderate to even somewhat high nature could accompany the next round of
expected DRILL weather conditions later this week, and perhaps of even
more concern, is that along with the winds, possible rapidly falling
temperatures, perhaps near or even below freezing, are now being noted
as possible with the DRILL into the middle as well as possibly
continuing into the weekend of this coming DRILL week. Precautions
related to protecting your antennas, external feedlines, mounting
devices, etc as well as precautions for any related power outages, etc
that could develop due to impacts of the possibility expected DRILL wind
and even ice, should begin to be considered if this DRILL situation
future develops along these lines. All are requested to Stay Tuned for
later DRILL updates, etc, either from ARES Leadership, the NWS or from
local reliable media sources.

560. Newark Airport Drill Report - Saturday 09/12/09

Yahoo group: EC_EmComm
Date: 2009-09-28 13:23:31 UTC
From: kc2rfc
Topic: 560 Message: 560

Newark Airport Drill Report - Saturday 09/12/09

The drill ran quickly and efficiently and ended sooner than we expected.

Our original plans were to communicate with various units from the Airport site:

UMDNJ EOC

Red Cross Metro Head Quarters in Fairfield

Red Cross activities on the Airport site at the Family Assistance Center

Saint Barnabas Hospital

Essex County RACES site at South Mountain Arena

We were also invited on site, the day of the drill, to:

Shadow several key players in the drill

Operate the Ham radio equipment on the UMDNJ Command Vehicle

Due to the unexpected brevity of the drill our task list changed:

Expedient set up and tear down of the field radio transmitter station was accomplished

Several repeaters were exercised and checked for practical communications from the Airport tarmac

Several simplex frequencies were similarly tested.

Spot checks with mobile units

Spot checks with base units

In summary:

Several of our specific goals were not met but that did not detract from the fact that the drill was well run and very successful for us on other levels. Our general goals were accomplished.

The drill itself was the mitigation of a terrorist threat on a commercial airliner. FBI and PA (Port Authority) officials negotiated with the terrorists. A strike force in full battle gear stormed the commercial airliner. The simulated threat was stopped and the perpetrators taken into custody. The victims were removed from the aircraft. They were expeditiously triaged and transported by UMDNJ EMS and PA other medical support teams. The victims were live participants

complete with very convincingly simulated wounds.

EC EmComm Participants

On the tarmac:

Jim Mesterhazy KC2SKK

Mark Curcio KC2OWQ

Leon Grauer N0TAZ

Remote:

Ron Boucher KC2SOU

Ray Linke K2DEE

I have been in touch with Newark Airport Officials in regard to the drill. In our discussions I was specifically told that Essex County Emergency Communications would be contacted and invited back for next year's drill. This in addition to the practical tasks that were accomplished made for a very worth while event for us.

561. Newark Airport Drill Report 09/12/09 Addendum

CERT Event at South Mountain Arena 09/26/09

EC EmComm took part in the CERT Event held at South Mountain Arena this weekend.

It was a great event with some excellent demonstrations and some interesting classroom time as well. I have uploaded an album of pictures "CERT Event at South Mountain Arena. I'm sure you'll find some shots of very interesting subjects as well as a few familiar faces. I will add captions when I have a chance.

This was not specifically geared towards EmComm. It is relate via emergency response. We made some new contacts and met some old friends. It was a great event.

Subject: 2009 Simulated Emergency Test

Hello, Section Managers and Section Emergency Coordinators.

(This message is going to both the ARRL SMs and ARRL SECs)

The 2009 ARRL Simulated Emergency Test will be held once again this fall season. October 3 and 4, 2009, is the main focal-point weekend for the SET. As in past years, you and your fellow Section Leaders and Emergency Coordinators may conduct local and section-wide exercises throughout the fall season. The point, of course, is to have the most effective exercise whenever it is held.

September QST will also have an article that announces the 2009 Simulated Emergency Test. Best wishes on planning and conducting your 2009 SET! Thank you.

73,

Steve Ewald, WV1X

Supervisor, Field Organization Team

566. NNJ ARES SET 2009 DRILL MESSAGE #4 - NNJ ARES Alert Status Now Raised To DRILL M

Yahoo group: EC_EmComm
Date: 2009-10-01 00:51:15 UTC
From: kc2rfc
Topic: 566 Message: 566

THIS IS A DRILL MESSAGE Over the last week, DRILL weather conditions in the ARRL NNJ Section have included heavy rainfall, which has saturated the ground in many areas, making many trees and even utility poles vulnerable to the now occurring high winds, which are expected to continue over the next 2 days. In addition, precipitation is expected to return and then continue into the coming weekend, along with rapidly falling DRILL temperatures. This setup of DRILL expected weather conditions is such that infrastructure failures could occur, with falling trees and limbs possibly taking down power and communications systems (phone lines, etc). The rapidly falling DRILL temperatures, in conjunction with the expected continuing precipitation event, has resulted in the DRILL issuance of a possible DRILL Ice Storm situation. An Ice Storm, not only has the potential to affect power and phone lines, it also has concerns for all radio based communications systems (cellular, public safety and yes, even AMATEUR RADIO) as extensive Ice buildup on any or all of these systems can cause extensive DRILL damage (both antennas and feed lines are at risk). With these DRILL scenarios now in play, the NNJ ARES Alert Status, for all counties and for all ARES Members is now raised to DRILL MONITORING. Later developments and issuances from the NWS, on this still changing and still developing weather situation might further increase the Alert Status to higher levels. Please stay tuned for later updates! Please note the information concerning a recent (December 2008) very similar and very close to the NNJ Section, weather situation as reported on the ARRL Website and start thinking now about how you and your teams can be prepared, should similar Ice damage occur with this DRILL scenario. Consider that Repeater Antennas (for all services, including amateur radio) as well as home, EOC, any and all antennas, are highly likely to be possible the weakest points in such a scenario and considerations of alternate systems of communication and backup hardware should be considered before they are needed to be used. Excerpts from the article related to this DRILL message are: "...As a major ice storm -- accompanied by freezing rains, flooding and strong winds -- severely impacted New England on Thursday evening into Friday morning, ARES®, RACES, SKYWARN and MARS operators worked together to respond to calls for assistance from served agencies and to participate in the recovery phase of the storm. As the storm progressed into the weekend, ice accumulations up to 1.5 inches were common throughout a very large area of Western, Central and Northeast Massachusetts, as well as parts of New Hampshire and Maine." "At the height of the storm, almost 400,000 customers in Massachusetts lost power. Phone service, particularly landline service, was disrupted in some areas. New Hampshire was "also very hard hit by the storm," Macedo said. "That state reported even more power outages than Massachusetts." As of late Sunday evening, almost

140,000 were without power in Massachusetts with over double that number in New Hampshire. Southern New England received 2-4 inches of rainfall; isolated higher amounts caused river, stream and urban flooding. Strong winds in the region resulted in tree and wire damage, as well as coastal flooding along the shoreline. "...."major antenna damage with ice up to 1.5 inches thick -- by far the worst he's ever seen at his place, which gets more than its share of winter weather. Two of three 40 meter Yagis have been destroyed, and antennas on all bands -- 160-10 meters -- have been damaged or completely lost. So far, all of the towers are still standing, but there is some concern about trees coming down on guy wires."... Subject: [EC_EmComm] NNJ ARES SET 2009 DRILL MESSAGE #4 - NNJ ARES Alert Status Now Raised To DRILL M

THIS IS A DRILL MESSAGE

Over the last week, DRILL weather conditions in the ARRL NNJ Section have included heavy rainfall, which has saturated the ground in many areas, making many trees and even utility poles vulnerable to the now occurring high winds, which are expected to continue over the next 2 days. In addition, precipitation is expected to return and then continue into the coming weekend, along with rapidly falling DRILL temperatures.

This setup of DRILL expected weather conditions is such that infrastructure failures could occur, with falling trees and limbs possibly taking down power and communications systems (phone lines, etc). The rapidly falling DRILL temperatures, in conjunction with the expected continuing precipitation event, has resulted in the DRILL issuance of a possible DRILL Ice Storm situation. An Ice Storm, not only has the potential to affect power and phone lines, it also has concerns for all radio based communications systems (cellular, public safety and yes, even AMATEUR RADIO) as extensive Ice buildup on any or all of these systems can cause extensive DRILL damage (both antennas and feed lines are at risk).

With these DRILL scenarios now in play, the NNJ ARES Alert Status, for all counties and for all ARES Members is now raised to DRILL MONITORING. Later developments and issuances from the NWS, on this still changing and still developing weather situation might further increase the Alert Status to higher levels. Please stay tuned for later updates!

Please note the information concerning a recent (December 2008) very similar and very close to the NNJ Section, weather situation as reported on the ARRL Website and start thinking now about how you and your teams can be prepared, should similar Ice damage occur with this DRILL scenario. Consider that

Repeater Antennas (for all services, including amateur radio) as well as home, EOC, any and all antennas, are highly likely to be possible the weakest points in such a scenario and considerations of alternate systems of communication and backup hardware should be considered before they are needed to be used.

Excerpts from the article related to this DRILL message are:

"...As a major ice storm -- accompanied by freezing rains, flooding and strong winds -- severely impacted New England on Thursday evening into Friday morning, ARESR, RACES, SKYWARN and MARS operators worked together to respond to calls for assistance from served agencies and to participate in the recovery phase of the storm. As the storm progressed into the weekend, ice accumulations up to 1.5 inches were common throughout a very large area of Western, Central and Northeast Massachusetts, as well as parts of New Hampshire and Maine."

"At the height of the storm, almost 400,000 customers in Massachusetts lost power. Phone service, particularly landline service, was disrupted in some areas. New Hampshire was "also very hard hit by the storm," Macedo said. "That state reported even more power outages than Massachusetts." As of late Sunday evening, almost 140,000 were without power in Massachusetts with over double that number in New Hampshire. Southern New England received 2-4 inches of rainfall; isolated higher amounts caused river, stream and urban flooding. Strong winds in the region resulted in tree and wire damage, as well as coastal flooding along the shoreline.

"...."major antenna damage with ice up to 1.5 inches thick -- by far the worst he's ever seen at his place, which gets more than its share of winter weather. Two of three 40 meter Yagis have been destroyed, and antennas on all bands -- 160-10 meters -- have been damaged or completely lost. So far, all of the towers are still standing, but there is some concern about trees coming down on guy wires."....

569. Bike Race in Newark

Yahoo group: EC_EmComm
Date: 2009-10-02 02:59:07 UTC
From: kc2rfc
Topic: 569 Message: 569

From Leon N0TAZ EC EmComm Newark Unit EC:
Hi,
There will be a bike race in Newark on Saturday, October 17th. I have, on behalf of the Newark Amateur Radio Society, reached out to the race organizers about Amateurs providing communications support. I should hear an answer from them by Monday, October 5th. Expecting a "yes", I am reaching out to get volunteers. Ideally, I would like the involvement of local Amateur Radio organizations - - NJIT, Essex County Emcomm, Nutley Amateur Radio Society and others. We will need a significant number of operators, and I should be able to put a number to it by early next week. Participating in this event will give positive exposure to Amateur Radio and to the participating organizations. Providing communications support is excellent practical training for emergency communications service.

Please pass this e-mail on to any individual hams and ham radio organizations in and near Essex County and ask any interested persons to reach out to me at n0taz@... before Monday, October 5th.

This is a Drill Message:

Due to the current and impending situation I will be calling a local net in the morning for Essex County EmComm at 9:00AM (WA2JSB 146.415). Please check-in and exchange damage reports and requests for assistance. Feel free to check-in and make yourself known. As this is an emergency (DRILL) let me know what your situation is locally, whether it is under control or not, and if not what specific aid is requested.

The check-in net will be repeated at 3:00PM tomorrow afternoon (WA2JSB 146.415). The same or similar procedure will be followed at (Ron KC2SOU) net control's discretion.

I will be monitoring (WA2JSB 146.415) through the night and during the day (mobile or base). If you need to contact me please do so by any means (radio, email or phone), as usual during an emergency.

I noticed that some radio operators are taking the opportunity to post the messages KC2GLG is issuing in my absence; excellent work.

Subject: Bike Event Confirmed - October 17

Greetings,

I heard back from the organizers of the bike event in Newark and we're
confirmed for providing communications support for the event on SATURDAY,
OCTOBER 17th. I should be able to provide exact times and information about
the route tomorrow (Thursday). PLEASE pass this e-mail on TODAY to members
of any clubs you're affiliated with or to any individual hams who you think
may be interested in participating. The main course is 25 miles and there
is also a 5-mile course, so a substantial number of operators will be
needed. Please participate if you can.

585. New Jersey to Host First Statewide Medicine Disposal Day in the Nation

Yahoo group: EC_EmComm
Date: 2009-10-15 20:08:49 UTC
From: Frank
Topic: 585 Message: 585

New Jersey to Host First Statewide Medicine Disposal Day in the Nation
NEW JERSEY☐ Gerard P. McAleer, the Special Agent-in-Charge of the Drug Enforcement Administration's New Jersey Division (DEA), New Jersey Attorney General Anne Milgram, and Angelo M. Valente, the Executive Director of the Partnership for a Drug-Free New Jersey (PDFNJ), announced today, over 250 local police departments have signed up for Operation Medicine Cabinet New Jersey. This initiative is available for all New Jersey residents to properly dispose of their unused, unwanted and expired medicine. Operation Medicine Cabinet New Jersey is a statewide initiative that is the first of its kind in the nation. This statewide effort is being spearheaded by the DEA New Jersey Division, the New Jersey Office of the Attorney General and the PDFNJ.

Gerard P. McAleer stated, "We are very excited about the wide spread support and enthusiasm Operation Medicine Cabinet New Jersey is gaining in our coordinated efforts to bring public attention to this issue that is impacting our youth, our families, and our communities. Law enforcement is concerned with the alarming trend in the misuse and abuse of prescription drugs, with potential access to these drugs coming from the medicine cabinets of family and friends."

"This operation will reduce the availability of potent drugs that lead kids down a path to addiction,'' Milgram said. "We can't break a cycle of dependence if powerful prescription drugs are stashed in our own homes, tucked away in drawers and cabinets."

"With Operation Medicine Cabinet, we are calling on New Jersey residents to see their medicine cabinets through new eyes -- as an access point for potential misuse and abuse of over-the-counter and prescription medicine by young people," explained Valente.

According to McAleer and Valente, the 2007 study by the National Study of Drug-Use and Health, 70% of people who abuse prescription pain relievers say they got them from friends or relatives and the National Institute of Drug Abuse (NIDA), reports that upwards of 9 million people use prescription medication for non-medical uses. They noted that the 2007 Partnership for a Drug Free New Jersey (PDFNJ) Principals Survey found that half of the principals surveyed said that prescription drugs are abused more than twice that of ecstasy and cocaine by New Jersey Middle School students.

"What is equally disturbing, is that 47% of New Jersey parents of Middle School Students said they know a little or just about nothing about prescription drug abuse, according to the 2009 PDFNJ Parents Tracking Survey," explained Valente.

A multi-lingual and multi-media public service campaign to alert New Jersey residents of this public health problem and how to participate in properly disposing of these medicines' has been launched by the Partnership for a Drug-Free New Jersey. It is currently under way and will continue through the statewide day of disposal, on November 14, 2009. The campaign entitled "Grandma's Stash" is an expansion of last year's successful statewide public service campaign that was recognized by the National Association of Government Communicators as the outstanding media campaign in the country.

New Jersey residents looking for information on their local collection site should visit www.operationmedicinecabinetnj.com <http://www.operationmedicinecabinetnj.com/> . Local collection sites and contact information will be updated daily as new communities become part of this initiative.

Photo and interview opportunities are available upon request.

586. FW: NWS/NJ OEM Conference Call Summary

Yahoo group: EC_EmComm
Date: 2009-10-16 10:14:37 UTC
From: Bob Crifasi
Topic: 586 Message: 586

NWS/NJ OEM Conference Call Summary Thursday, October 15, 2009 4:48 PM

A Nor'easter storm is heading for New Jersey and the surrounding region. The information below was taken from an afternoon conference call with the NJ Office of Emergency Management (NJ OEM) and the National Weather Service (NWS), and is based upon current computer forecast models and is subject to change as the storm approaches the area.

Flooding:

A Coastal Flood Advisory is in effect for Cape May to Monmouth Counties from 5pm this afternoon until 11pm Friday. An onshore flow driven by high winds will persist through the next several tide cycles which will prevent back bay and tidal streams from draining completely during low tides. This combined with potential heavy rains during periods of high tide could result in moderate tidal flooding.

A Coastal Flood Watch is in effect for Essex, Union, and Hudson Counties with the likelihood that an Advisory will be issued later today for tonight and tomorrow.

Inland river and stream flooding does not appear to be an issue based on current forecast models, although any time there are heavy downpours, flash flooding could become a hazard.

Precipitation:

Heaviest rainfall amounts are expected in southern New Jersey and over the water, with moderate rainfall amounts expected inland and in northern New Jersey. Snow is expected in Sussex County totaling 1- 3 inches, especially in the higher elevations. A Winter Weather Advisory has not been issued at this time because the snowfall amounts are less than the advisory criteria.

Winds:

High Wind Advisories are in effect for south, central, and coastal New Jersey. Winds are expected to increase throughout this evening and continue into tomorrow evening. Sustained winds of 25 - 30mph will be seen with gusts of 45mph, and occasional gusts of 50 - 60mph are possible. in northern New Jersey, winds will be slightly less at 20 - 25mph, with gusts of 45mph possible.

SEOC Activation/Follow-up:

The State Emergency Operations Center (SEOC) will activate to Level 3 status as of 6pm this evening, and remain active for the duration of the event. UMDNJ OEM will continue to monitor this event and provide additional information as necessary. Relevant storm information has been posted to the

UMDNJ Portal and other message outlets.

587. Serious situation in Newark

Yahoo group: EC_EmComm

From: kc2rfc
Topic: 587 Message: 587

We currently have a serious situation in Newark.

There is an underground gas leak near Orange and Nesbitt streets.

NJT light rail has been shut down.

There is also a major fire at 13th street near Gould with people trapped inside.

There is a child trapped on the third floor.

The two events are unrelated.

This is not a drill.

Please check into 146.415 if you can. There is no activation at this time this is an advisory message only.

Subject: [EC_EmComm] Serious situation in Newark

We currently have a serious situation in Newark.

There is an underground gas leak near Orange and Nesbitt streets.

NJT light rail has been shut down.

There is also a major fire at 13th street near Gould with people trapped inside.

There is a child trapped on the third floor.

The two events are unrelated.

This is not a drill.

Please check into 146.415 if you can. There is no activation at this time this is an advisory message only.

Fred,

Thanks. N0TAZ (Metro UnitEC) is running the net from Newark. He is in communication with KC2SKK (North Unit EC).
We are just monitoring at this time. This is not an activation. Thanks for checking with me.

Hi,

I just got back from lunch. Here is the latest from NJ Transit:

Rail Update: Morris & Essex and Montclair-Boonton Line service is being restored, subject to delays. Earlier gas main leak has been resolved.

596. Bureaucratic Quagmire

Yahoo group: EC_EmComm
Date: 2009-10-23 02:30:38 UTC
From: kc2rfc
Topic: 596 Message: 596

Issuing this really puts a kink in all things EmComm. I don't see how they can start to enforce this if every ham involved in EmComm that acts as a liaison for a hospital (especially if employed by them) applies for this waiver.

How many waivers would that be?

The number of hams involved in EmComm

Times

The number of drills they are involved in a year

Investigating all this should put quite a dent in their budget. The topper is that the government agency conducting the drill is the one that should be requesting the waiver! So now we have one government agency requesting a waiver from another government agency on behalf of a volunteer(s). Oh boy what a bureaucratic quagmire they just created!

597. All EmComm Participants

All EmComm Participants:

I just received an email from Fred WW2VEH. The email
contained a copy of a petition just filed with the FCC regarding the
question of hams taking part in drills and their relationship to their
employer. It gives me hope that this legal "event" may
eventually be resolved.

I have added the file to our "Files" section. The title is
"FCC Petition" it is a PDF file. Please take the time to read it
thoroughly. It will affect our future as EmComm volunteers if accepted.
It also contains some very valid resource material.

Thank you very much Fred for providing this.

Hi - The public notice makes clear that only government entities - not individual hams - may apply for these waivers. Plus, Bill Cross in the Wireless Telecommunications Bureau has made it clear in an e-mail that these waivers are for one-time events, not for regular drills. He suggests using Part 90 (public safety) radios for regular drills that involve ham employees. There is an ARRL webinar on the topic Wednesday night. Anyone can sign up at <https://www1.gotomeeting.com/register/326759760>.

Rich,

I agree with you about the government entities applying for the waiver, but the individual ham would first have to request permission to take part in the drill, and then have participation granted by the entity before compiling a list for the waiver. This all takes time, and time is money out of the public coffers. It seems to be less effective than the solution the one petition suggests. The use of public safety radios is a great idea, except for one point; most of us don't have access to them.

Thank you for posting about the Webinar, I forgot to mention it. Please any of you that can arrange to take part, do so.

601. H1N1 Flu Chart...

Yahoo group: EC_EmComm
Date: 2009-10-31 14:20:19 UTC
From: Frank
Topic: 601 Message: 601

H1N1 flu is about to be upon us and we need to be on top of information regarding it.

Here is a comparison to the normal cold symptoms that was sent to me.

Know the Difference between Cold and H1N1 Flu Symptoms

Symptom

Cold

H1N1 Flu

Fever

Fever is rare with a cold.

Fever is usually present with the flu in up to 80% of all flu cases. A temperature of 100°F or higher for 3 to 4 days is associated with the flu.

Coughing

A hacking, productive (mucus- producing) cough is often present with a cold.

A non-productive (non-mucus producing) cough is usually present with the flu (sometimes referred to as dry cough).

Aches

Slight body aches and pains can be part of a cold.

Severe aches and pains are common with the flu.

Stuffy Nose

Stuffy nose is commonly present with a cold and typically resolves spontaneously within a week.

Stuffy nose is not commonly present with the flu.

Chills

Chills are uncommon with a cold.

60% of people who have the flu experience chills.

Tiredness

Tiredness is fairly mild with a cold.

Tiredness is moderate to severe with the flu.

Sneezing

Sneezing is commonly present with a cold.

Sneezing is not common with the flu.

Sudden Symptoms

Cold symptoms tend to develop over a few days.

The flu has a rapid onset within 3-6 hours. The flu hits hard and includes sudden symptoms like high fever, aches and pains.

Headache

A headache is fairly uncommon with a cold.

A headache is very common with the flu, present in 80% of flu cases.

Sore Throat

Sore throat is commonly present with a cold.

Sore throat is not commonly present with the flu.

Chest Discomfort

Chest discomfort is mild to moderate with a cold.

Chest discomfort is often severe with the flu.

604. Emergency Communication Webinar Tomorrow

Yahoo group: EC_EmComm
Date: 2009-11-05 05:37:09 UTC
From: Frank
Topic: 604 Message: 604

My name is David Friedman, KE7GOY, and I am an AEC with my local ARES□I'm also with RACES, Skywarn, NOAA Weather Spotter, Government Liaison/ESF-6 American Red Cross and an Animal Rescue & Response Team. Busy as that sounds, I am also a technical consultant to a company called Depiction (depiction.com). They make mapping, resource location, volunteer tracking, scenario prediction, repeater location/coverage, NOAA weather, etc. software that has major implications in emergency communications and management.

The last couple of weeks, I've been giving webinars with the folks at Depiction, and they've been so successful that we've expanded them into an ongoing series. Thursday, November 5 at 1 PM EST/10 AM PST, we will be doing a brand new webinar entitled "Make it Work! Using Depiction for Your Emergency Planning and Response." If you work with Amateur Radio Operators□or anyone involved in emergency management and communications□who would be interested in seeing the specifics of how they can use this new technology, please pass on my invitation.

Also on our calendar, for Thursday, November 12, at 1 PM EST/10 AM PST, we'll be presenting "Depiction and Amateur Radio EmComm Overview," a general look at what is possible with Depiction. This is the webinar that was watched by hundreds of participants from across the country last week, and it draws heavily on my own experience using the software. I've used Depiction during hurricanes Gustav and Ike, California wildfires, Midwest floods and tornados, and in Washington state during several winter disasters. Again, this webinar is of interest to anyone involved in emergency management and communications, so please do attend, and pass this on to anyone you think may be interested.

One last thing□I am told by Depiction staff that they will be offering a special 25% off coupon to webinar attendees. Just one more reason to stop by!

Thanks for your time,

David Friedman, KE7GOY
Monroe, WA

To: 'Henderson, Dan N1ND'
Cc: 'VoIP_American_Red_Cross_Communicators_Net@yahoogroups.com'
Subject: RE: FCC PUBLIC NOTICE RE HAM EMPLOYEES AS VOLUNTEERS

Dave

Thank you for your response (See below). You are indeed a brave man and I admire that.

You are regulatory information manager, So please excuse my ignorance in thinking you have any authority. Or that my lawyer on retainer to my organization of which I am a dues paying member might be interested in hearing my opinion of his interpretation of Part 97.

I understand that you are staff. Staff has to know how the members feel.

This is a crazy situation, and the ARRL has not been helpful in this at all. Heaven protect us from commercialization! The way we are going, there will be no amateur airwaves to so protect.

Kindly provide me with the names and phone numbers of the Board of Directors of the ARRL and I will be only too happy to post them all over and see if I can get people to call them. And give them a call myself.

The law is the law, that is true. As a lawyer, I can tell you that the law evolves best when somebody uses their head. The crazy interpretation that charity representation on a drill is different if it is an employee of the charity or an unpaid volunteer is new. As is any interpretation that says that an employee of a charity cannot do public service with his or her amateur license in a drill if it involves communication simulating a disaster scenario because the employer derives some sort of ethereal "benefit" from it, or the employee, who is probably getting paid anyway, whether or not he has a mic in his hand, has some "pecuniary interest in the transmission"

What sense does that make in the real world? Perhaps the FCC might do well to rethink this idiotic opinion.

And as to the ARRL, they appear to be supporting and encouraging this lunacy. How does that protect our bandwidth? Doesn't it make us look silly and petty?

Wouldn't it be better to have amateur radio recognized as a part of a disaster response by these non-profits? As a volunteer amateur licensee involved in EMCOMM, I can tell you that is difficult enough absent the assistance of the FCC lawyers and the assistance I am apparently receiving from my trade association.

Wouldn't it make sense to drill these organizations so they, (Staff and volunteers alike) know how to use the radio in the proper situations?

What are the chances that a cash strapped FCC, that does virtually no enforcement on the ham bands as it is, is going to deploy its resources to write waivers for government agencies wanting to include nonprofit staff on the drill? Not to mention the odds that some government bureaucrat designing a drill will consider the matter enough to request the waiver in advance of the drill?

And the ARRL, and it's stepchild, ARES, a-non-government agency, can't talk to non-profit staff on it's SET. And as a non-governmental agency, can't even ask for a waiver under the FCC opinion.

How exactly does this promote the inter-operability aspect of amateur radio? Wouldn't the response to Katrina have been better if local relief agencies had amateur equipment and staff trained to use it in an emergency, instead of dropping radios in their lap and saying "Go to it boys". "Let me explain what CTSS means."

Let's get serious here, ARRL, what are you doing to protect me from this outrage?

I would be happy to explain to your Board of Directors who are supposed to be promoting licensing new hams in our dying hobby populated by an overabundance of older Americans and lots of other communication choices for younger Americans that it is indeed counter-productive to those aims to dissuade staff members of charities like the American Red Cross from getting licenses by effectively banning them from the air when they are practicing their craft to prepare with other hams for an emergency. Or by creating new interpretations of arcane rules that make absolutely no sense in the real world.

We all agree that no business, no matter how noble the purpose, should use amateur licenses as a substitute for a commercial license. No one wants t listen to employees on the clock ordering lunch on the ham bands for the office. Perhaps I am not much of a lawyer but I would have no problem drafting an opinion that makes a proper distinction. Maybe we should pay our lawyer to do that too.

Subject: RE: [VoIP_American_Red_Cross_Communicators_Net] FCC PUBLIC NOTICE RE HAM EMPLOYEES AS VOLUNTEERS

Hi Fred

Thanks for the comments.

I am willing to talk to anyone but calling ARRL HQ staff like me will not get you anything but an ear to listen. Staff are not involved in making the kind of policy decision you are seeking. ARRL policy is made by the ARRL Board of Directors. Members with concerns over ARRL policy should be contacting the ARRL Directors in their Divisions over policy matters.

Also please note that Mr. Imlay is an attorney in private practice - he is retained by the ARRL, not a League employee. Calling HQ and asking to speak to him won't get you anywhere - he doesn't live or work in CT.

Thanks and 73

Subject: RE: [VoIP_American_Red_Cross_Communicators_Net] FCC PUBLIC NOTICE RE HAM EMPLOYEES AS VOLUNTEERS

Bill Wallace has asked me to reconsider dropping my membership with ARRL over this issue with the argument that ARRL is necessary to Protect the spectrum, and that the proper course is to use my influence as a long time ARRL MEMBER to try and convince them that they are on the wrong side, and that they, of all people, should understand the danger in the FCC's pronouncement.

Otherwise, ARES motto, WHEN ALL ELSE FAILS, will have to add an asterisk, (*unless you have the temerity to drill to test and hone your capabilities and effectiveness of amateur radio in a simulated disaster and happen to also work for a charitable organization that helps people, in which case you should keep your mitts off the micn , even off hours, like on Sunday night.)

Catchy, Huh?

Stupid too,

I have reconsidered, and will give persuasion a try.

I will be calling ARRL in Newington today, and try to speak to ARRL General Counsel Chris Imlay, W3KD, and ARRL Regulatory Information Manager Dan Henderson N1ND, and have a little talk with them.

Perhaps you might have the time to make a call as well, and let them know that this FCC opinion is one that you want ARRL to lobby against.

dissuade staff members of charities like the American Red Cross from getting licenses by effectively banning them from the air when they are practicing their craft to prepare with other hams for an emergency. Or by creating new interpretations of arcane rules that make absolutely no sense in the real world.

We all agree that no business, no matter how noble the purpose, should use amateur licenses as a substitute for a commercial license. No one wants t listen to employees on the clock ordering lunch on the ham bands for the office. Perhaps I am not much of a lawyer but I would have no problem drafting an opinion that makes a proper distinction. Maybe we should pay our lawyer to do that too.

Subject: RE: [VoIP_American_Red_Cross_Communicators_Net] FCC PUBLIC NOTICE RE HAM EMPLOYEES AS VOLUNTEERS

Hi Fred

Thanks for the comments.

I am willing to talk to anyone but calling ARRL HQ staff like me will not get you anything but an ear to listen. Staff are not involved in making the kind of policy decision you are seeking. ARRL policy is made by the ARRL Board of Directors. Members with concerns over ARRL policy should be contacting the ARRL Directors in their Divisions over policy matters.

Also please note that Mr. Imlay is an attorney in private practice - he is retained by the ARRL, not a League employee. Calling HQ and asking to speak to him won't get you anywhere - he doesn't live or work in CT.

Thanks and 73

Dan Henderson, N1ND

Subject: RE: [VoIP_American_Red_Cross_Communicators_Net] FCC PUBLIC NOTICE RE HAM EMPLOYEES AS VOLUNTEERS

Bill Wallace has asked me to reconsider dropping my membership with ARRL over this issue with the argument that ARRL is necessary to Protect the spectrum, and that the proper course is to use my influence as a long time ARRL MEMBER to try and convince them that they are on the wrong side, and that they, of all people, should understand the danger in the FCC's pronouncement.

Otherwise, ARES motto, WHEN ALL ELSE FAILS, will have to add an asterisk, (*unless you have the temerity to drill to test and hone your capabilities and effectiveness of amateur radio in a simulated disaster and happen to also work for a charitable organization that helps people, in which case you should keep your mitts off the micn , even off hours, like on Sunday night.)

Catchy, Huh?

Stupid too,

I have reconsidered, and will give persuasion a try.

I will be calling ARRL in Newington today, and try to speak to ARRL General Counsel Chris Imlay, W3KD, and ARRL Regulatory Information Manager Dan Henderson N1ND, and have a little talk with them.

Perhaps you might have the time to make a call as well, and let them know that this FCC opinion is one that you want ARRL to lobby against.

Bob

I posted that about a week before Yahoo put it through,

Somehow it got stuck in Yahoo's ether.

Since that time, the situation has changed. Basically, at this point, I am waiting for a response from the FCC, who have verbally agreed that salaried members of a charity can participate in a net if they are representing their ham club, not their employer.

If so, then, as long as they can train and the equipment can be tested, the FCC opinion, although unfortunate, will not stop us from preparing for a disaster.

So far no response in writing from the FCC, who realize that they really have a distinction without a difference at this point.

Fred,
Now, taking the sequence of events of the last few weeks and Yahoo's poor timing It seems we are on the same page. I'm sure more will unfold but it seems that some of what we were seeing was crafted to start a bit of furor. It seems to have worked (on me as well). Now that more of the facts are coming into clearer focus I'm taking more of a "wait and see" attitude. In the long run only history will give us a fuller picture. I'm not sure we'll have all the facts then either.

Date: 2009-11-09 03:33:25 UTC
From: EC_EmComm@yahoogroups.com
Topic: 358 Message: 610

Enter your vote today! A new poll has been created for the
EC_EmComm group:

Over the past couple of net meetings, a question was raised about the time the nets are scheduled since not everybody has the same schedule and some members miss the net. So it was decided that we sent out a poll and see how the membership feels about moving the net time..

o Move it up 1 hour.
o Move it back 1 hour.
o Naa. Keep it the same.

To vote, please visit the following web page:
http://groups.yahoo.com/group/EC_EmComm/surveys?id=2566987

Note: Please do not reply to this message. Poll votes are
not collected via email. To vote, you must go to the Yahoo! Groups
web site listed above.

Thanks!

611. TONIGHT: ARRL NNJ Section ARES Net, 2nd Monday each Month at 8:00 PM

Yahoo group: EC_EmComm
Date: 2009-11-09 17:49:20 UTC
From: kc2rfc
Topic: 611 Message: 611

TONIGHT:

The ARRL NNJ Section ARES Net is held on the 2nd Monday of each Month at 8:00 PM local time (Note: following certain Holidays, should they occur on the 1st Monday of a Month, such as Labor Day, the NNJ ARES Net will be called immediately following the conclusion of the Morris County NJ RACES Net)

This Net is on the WS2Q 2 meter Amateur Radio Repeater
146.895 Mhz, Negative 600 Khz Input Offset, PL 151.4

All NNJ ARES DECs, ECs, AECs and all ARES Members are asked to Checkin when their County and Appointment in the ARES Program is called by Net Control.

Any and all Amateur Radio Operators, who have 2 meter privledges, who are interested in the ARES Program in NNJ, and/or EmComm in general, are welcomed to checkin as well.

The answer is no single radio.

We as hams strive to be prepared constantly- but how many of us have backup antennas, radios, batteries, etc. In our go-kits?

Truthfully, in my opinion, I would choose a portable radio with these features:

1. Multiband capability.
2. 100 percent field programmable
3. Weatherproof or Water resistant at a minimum.

For a more extended operation, a mobile radio with battery connections and solar or other alternative charging is ideal.

Just my 2 cents.

Lucas, KC2KZK.

Not to put too fine a point on it, the Yeasu FT-897 is THE EmComm radio. :) I have two stations set up using that radio as a base. One at home and one at that other controversial place, my office (shhh). Both have a car jump start battery as backup power on trickle charge. Both using the Arrow dual band UHF/VHF J-pole antenna. I do need to do some work on getting the internal batteries squared away. I keep a charged HT with me at all times with two back up batteries and a Double A cell pack. There's more but that is enough to peg me as a radio Geek without going any further.

I agree with Ron. Actually, looking at my calendar, Sunday the 13th in
the AM and early PM is the only time I have this month....

However, if it turns out that we have a significant snow fall, I will be
out plowing for the city...

Frank..

Hi,
If no one has a better idea, I would suggest we meet in Dec 12th Saturday.

We could do a morning or lunch meeting at a the We could do a fire house.

Afterwards we could reconvene at a dinner , other place as convince
dictates, for breakfast /lunch
Regards,
Jim M.

From: Bob
Topic: 629 Message: 629

All Essex County Emergency Communications Members,

There will be a brief meeting on Sunday December 13th at
12:00PM. The place will depend on the number attending and will be
announced this week. Please contact me if you intend to come so I can
keep the number of attendees in mind. If you are not a member yet and
are interested in getting involved plan to attend.

635. Meeting for Sunday Dec 13th 12:00PM CANCELED

Yahoo group: EC_EmComm
Date: 2009-12-11 13:56:15 UTC
From: Bob
Topic: 635 Message: 635

All EC EmComm Members,

Due to the timing, and the way the plans are shaping up we
are going to cancel the meeting announced for this weekend, Sunday
December 13th at 12:00PM. We will reschedule it for a date after the
first of the year with more lead time. In the mean time I will be
working on some of the goals I have stated previously and invite your
reactions to them when posted here.

SNOW WARNING
SPECIAL WEATHER STATEMENT
HARRISON WEATHER CENTER OPERATIONS
FORECAST OPERATIONS DIVISION / EMAIL - hwcwx@...
NOAA - NATIONAL WEATHER SERVICE OFFICIAL COOPERATIVE WEATHER STATION
FRIDAY DECEMBER 18, 2009
FORECASTER: MONDARO

FIRST SIGNIFICANT SNOW STORM APPEARS LIKELY SATURDAY NIGHT

IF TRAVELING SOUTH ON SATURDAY YOU WON'T HAVE TO GO FAR BEFORE
HITTING SNOW IN THE CENTRAL AND SOUTHERN REGION FROM ABOUT MID DAY ON
GIVEN THE LATEST FORECAST INFORMATION. THERE IS GOING TO BE A LOT OF
DRY AIR ALOFT SO I THINK IT'S GOING TO TAKE MOST OF THE DRY TO GET
THE SNOW TO REACH THE GROUND AND I WON'T BE SHOCKED IF IT WAITED
UNTIL THE EVENING HOURS TO START SNOWING HERE IN THE TRI COUNTY AREA.

THE FOLLOWING THINKING IS BASED ON THE LATEST INFORMATION AT THE WEATHER
CENTER GIVEN THE TRACK AND THE INTENSITY OF THE STORM SYSTEM, IF THE
TRACK SHIFTS IT WILL AFFECT THE AMOUNT OF SNOW WE ARE CURRENTLY
FORECASTING; OUR CONFIDENCE ON THE FORECAST IS GOOD AT THIS TIME.

WE EXPECT THE SNOW TO BEGIN BETWEEN 3PM TO 6PM ON SATURDAY EVENING WITH
THE SNOW BECOMING HEAVY AT TIMES, ESPECIALLY OVERNIGHT SATURDAY INTO
SUNDAY MORNING, IT WILL ALSO BECOME WINDY WITH BLOWING AND DRIFTING OF
THE SNOW, THERE IS A SLIGHT RISK OF A THUNDERSTORM. LOOK FOR 4 TO 8
INCHES OF SNOWFALL BY SUNDAY MORNING AT SUNRISE WITH THE STORM POTENTIAL
OF 6 TO 10 INCHES BY THE TIME THE STORM TAPERS DOWN TO FLURRIES BETWEEN
9AM TO 12 NOON ON SUNDAY,

POST STORM WEATHER LOOK FOR MAINLY CLEAR SKIES FOR MONDAY, TUESDAY AND
WEDNESDAY WITH AFTERNOON TEMPERATURES IN THE 30S AND MORNING LOW
TEMPERATURES IN THE 20S.

ANY MELTING SNOW DURING THE DAY WILL REFREEZE ON SURFACES THAT HAVE NOT
BEEN TREATED OR PROPERLY DRIED.

FORECASTERS HERE AT THE HARRISON WEATHER CENTER WILL CLOSELY MONITOR
THIS DEVELOPING WINTER STORM.

639. EmComm MONITORING status

From: Bob
Topic: 639 Message: 639

Good Afternoon all,
As I'm sure you are all aware by now we have a significant snow
storm on the way. The reports I have seen range from 2 to 10 inches.
Nothing we haven't seen before. However it still requires a degree
of caution when driving and deciding to drive at all. It has already
begun in southern New Jersey and we should see it later this afternoon.
NNJ ARES has officially been in a MONITORING status for the last 12 hrs.
I am moving us, in Essex County, to that status as well as well. The
"Alert Status" chart has been posted here.
Please monitor WA2JSB and check in as needed if you see any problems.
There is no net currently. I will be monitoring the repeater throughout
the day. Please feel free to contact your Municipal EC, Unit EC, or
myself if needed. I can be reached by all of our usual methods.

Happy Holidays

Hi Bob,

Guess you already know that I was not part of the net because of plowing.
We have the contract with Jersey City, and was there for 21 hours.
Therefore, I was not able to be part of the net with everybody. I would like to
try to put together something in a small box that will house a radio and
small speaker that would be small enough for portable use. This way, I can
put it in a truck on the front seat or something.

Any word on the jacket with the info I mailed to you last week?

Frank...

IAEM Discussion Group:
Our local Ham Radio support group has posted the information below in regard to the Haiti earthquake:

FYI -

SATERN HF nets are now active in response to the earthquake in Haiti. Please give these frequencies a wide berth.

14.235 MHz (Daytime Primary)
7269 kHz (Evening Primary)
3977.7 kHz (Night Primary)

Additional:

The Maritime Mobile Service Net is also active on 14.300 with some earthquake traffic.

For those who want to listen there are state-side HF stations that are streaming the audio on the internet - http://14300.net/avlinks.html <http://14300.net/avlinks.html>

From: Bob
Topic: 648 Message: 648

Dear Partners in Emergency Management: The following is a message from FEMA headquarters supported by the New Jersey Office of Emergency Management. Please adhere to FEMA's guidance related to the disaster in Haiti and feel free to contact NJOEM with any questions comments or concerns regarding the matter. Message from FEMA: Initial reports from Haiti in the wake of yesterday's earthquake are concerning and troubling. During times like these, the emergency response community always stands ready to assist those in need. FEMA Administrator Craig Fugate is reminding our response community that assets should not self deploy to affected areas. The United States Department of State has the lead for foreign disaster assistance, and US assets should deploy only if tasked to do so by the State Department. The most urgent need that the response community can fulfill at this time is supporting ongoing disaster relief fundraising efforts. We will continue to update guidance as the situation unfolds. Thank you for your support. Major Dennis McNulty Commanding Officer New Jersey Office of Emergency Management Division of State Police

QST de W1AW
Special Bulletin 2 ARLX002
>From ARRL Headquarters
Newington CT January 13, 2010
To all radio amateurs

SB SPCL ARL ARLX002
ARLX002 IARU Region 2 Requests Frequencies Be Kept Clear After
Massive Earthquake Strikes Haiti

On Tuesday, January 12 at 4:53 PM Haiti time (2153 UTC), a magnitude
7.0 earthquake hit 10 miles (15 kilometers) west of Port-au-Prince,
the island nation's capital. Communications in and out of Haiti have
been disrupted. No word has been received as of yet from any of
Haitian Amateur Radio operators. The ARRL encourages US amateurs to
be aware of the emergency operations on the following frequencies:
7.045 and 3.720 MHz (IARU Region 2 nets), 14.265, 7.265 and 3.977
MHz (SATERN nets), and 14.300 MHz (Intercontinental Assistance and
Traffic Net). The International Radio Emergency Support Coalition
(IRESC) is also active on EchoLink node 278173.

IARU Region 2 Area C Emergency Coordinator, Arnie Coro, CO2KK, is
coordinating a multi-national response by hams. There are organized
nets on 7.045 and 3.720 MHz; amateurs are asked to monitor the
frequencies, but to also keep them clear of non-essential traffic.
Amateur Radio operators should also be aware that emergency traffic
pertaining to the Haitian earthquake is expected on the SATERN
frequencies of 14.265 MHz, 7.265 MHz and 3977 MHz, according to
SATERN's leader, Major Pat McPherson. The Salvation Army is
accepting health and welfare traffic requests on its Web site.

"As late as 9:45 PM local time (0245 UTC), we have not been able to
contact any amateur or emergency services stations in Haiti," Coro
said in an e-mail. "Amateurs from Cuba, the Dominican Republic,

Puerto Rico and Venezuela are monitoring the 40 meter band frequency. We are still keeping watch on 7.045 MHz, hoping that someone in Haiti may have access to a transceiver and at least a car battery to run it," but so far. no HH stations have checked in.

Tuesday's quake was felt in the Dominican Republic, which shares the island of Hispaniola with Haiti, and in Eastern Cuba, but no major damage was reported in either place.

The January 13 edition of The Daily DX reported that the Rev John Henault, HH6JH, made contact late Wednesday morning with the Intercontinental Assistance and Traffic Net (IATN) on 14.300 MHz; this is the IARU Global Center of Activity frequency for emergency communications. He said that he was safe, but had no power and no phone service. He was operating on battery power and hoping to get a generator running later in the day. The edition also noted that Pierre Petry, HH2/HB9AMO -- who was in Cap Haitien (about 140 km north of Port-au-Prince) is "okay"; Petry is in Haiti working for the United Nations World Food Program. Later today, he will be traveling to the capital.

The UN's 9000 peacekeepers in Haiti -- many of whom are from Brazil -- were distracted from aid efforts by their own tragedy: Many spent the night hunting for survivors in the ruins of their headquarters. "It would appear that everyone who was in the building, including my friend Hedi Annabi, the United Nations' Secretary General's special envoy, and everyone with him and around him, are dead," French Foreign Minister Bernard Kouchner said Wednesday, speaking on French radio. UN peacekeeping chief Alain Le Roy would not confirm that Annabi was dead, but said he was among more than 100 people missing in the rubble of its headquarters. He said only about 10 people had been pulled out, many of them badly injured. Fewer than five bodies had been pulled from the rubble, he said.

The United Nations said the capital's main airport was "fully operational" and that relief flights would begin on Wednesday, January 13.

The situation in Haiti is still chaotic. More information will be posted as soon as possible. Information is being validated and shared between many amateur groups and news sources as it unfolds.

651. Please Help Provide Radio Communications!

Yahoo group: EC_EmComm
Date: 2010-01-15 17:43:33 UTC
From: Bob
Topic: 651 Message: 651

Greetings,
We are all aware of the horrible devastation caused by the earthquake this past Tuesday and several aftershocks that have followed. Both landline and cell phone systems in Haiti are down due to this event and, thus far, no Amateur stations out of that country have been heard. It is my understanding that a contingent of Amateur Radio operators from the Dominican Republic will arrive in Haiti on Friday. I do not know if they will operate from one location or whether they will serve any shelters, government agencies or relief organizations. We should find out tomorrow.
I am writing to ask that each operator receiving this e-mail volunteer, to the extent possible, to serve as a radio operator for the Haitian community. We will be setting up at least one operating location in Newark and, depending upon the number of responses we receive, other locations. Our goal is to both pass Health and Welfare traffic and, to the extent needed, serve any government agencies or non-government agencies in our area that need our communications services in connection with relief efforts. The intention is to operate on a 24-hour basis for at least one week, and assess to what extent our operation should continue beyond that point. Operators of all license classes are welcome and encouraged to participate, as there will be operations on VHF, UHF, EchoLink and CQ100, in addition to HF.
I am in touch with community leaders and churches in the Haitian community so that we can readily inform them of our operations. Our objective is to commence operations on Saturday morning, January 16th.
I am reaching out to secure operating locations. If you can serve as an operator, please respond to this e-mail with the following information:
* Your name, call sign and FCC license class * Any radio equipment, accessories and antennas that you can provide * The days and hours that you are available to operate * Whether you have training or experience in passing traffic (If you do not, you are still encouraged to participate). * Any NIMS/ICS or ARRL training that you have had
* If you speak or understand French or French Creole fluently

There is a total void in communications currently and we can provide an important public service by operating in an organized fashion at publicized locations. I hope that each person on this list will make whatever sacrifice necessary. Your efforts may save lives and will surely provide comfort to our neighbors.

From: Bob
Topic: 652 Message: 652

PLEASE PASS THIS ALONG TO YOUR LOCAL CONTACTS AND TEAMS!!!!!! As on noon on Friday, amateur radio communications into Haiti has not been a viable situation. This is due to a couple hard and of necessity coldly stated facts. The first, there were few amateur radio operators, and of those, few had active stations located in Haiti before the event, either as citizens of Haiti as well as those amateur radio operators who were there as portable operations (from the UN, NGO's ,etc) and of course, the other main reason, is the loss of local infrastructure needed to to run any of those previously active stations as well as the most sad to state item, that perhaps there has been a loss of the operators themselves as a result of the earthquake. It is possible that the current lack of active amateur radio operations may change, that is, it is possible that some level of operations might be established by some who might be able to re-locate into the affected areas, or into nearby areas and open communications links. In that possible situation, there may become a situation wherein Health and Welfare types of communications via amateur radio, may become more viable. I must be noted though, that this may not happen in the very short term, but may happen in the mid-term and if it does, operations such as are indicated below could then be of service and need. Therefore, please consider becoming a part of the advance preparations that are now underway and being setup and operated by the Newark Amateur Radio Society as noted below. Individuals, or groups, wishing to volunteer their services should make direct contact with Leon Gauer - N0TAZ, President of the Newark Amateur Radio Society (n0taz@newarkamateurradio.com <mailto:n0taz@...>). Thanks goes out to all of you in advance for your attention to this matter. Lastly, the International Red Cross remains a key contact point for all family and friends looking for information on the situation as well as people as noted below: Anyone with webaccess, can use the link below to get or request specific Info, including being able to see the actual listings of people filed with the International Committee of the Red Cross and to add their own search information related to people in the affected region here:

653. Newark - Haiti EmComm

Yahoo group: EC_EmComm
Date: 2010-01-16 15:06:04 UTC
From: Bob
Topic: 653 Message: 653

Greetings,

We are making tremendous progress thanks to the concern and cooperation and those on this list. Bob (KC2RFC) and George (KC2GLG), thanks to your efforts, close to a dozen more operators have contacted us about volunteering. Manpower is NOT going to be one of our problems!

Thanks to Peter (WW2I),who sacrificed time with his family to spend a few hours after work setting up an antenna and being sure that the HF station was operating properly. Since there are some issues, he and Matt (KC2SEK), will be working tomorrow to put up additional antennas and to do whatever else is necessary to ensure that we have a good and reliable station.

Please continue monitoring the IRESC net on EchoLink node 278173, or on one of the IRESC "Listen-Only" nodes. Also, for those in Northern New Jersey, you can monitor or participate in the IRESC net through the Cirri Memorial Repeater, KC2JES, 441.250 MHz, + offset, PL 127.3. There is also an informal net and periodic simulcasting of the IRESC and SATERN nets on CQ100 at 14.265.

We will begin putting a schedule together as soon as there are more amateur stations operating in Haiti. For now, we are doing the necessary technical and community work to make this an effective operation. Currently, there are few operators and they are on the air only sporadically. But there is hope!! See the exceprt from Frank's e-mail below.

Please keep in touch throughout the weekend. You guys are the vital link to making this work. The combined resources and efforts of Paul (N9RSQ), Frank (KB2OOJ), Peter (WW2I) and the rest of this group, has led to reliable information being shared and networks being set up to ensure that we are all well informed and that we have a well manned and properly operating station when needed. The importance of this teamwork cannot be overstated.

Frank (KB2OOJ), has a repeater in Elizabeth, NJ, that is almost always connected to repeaters in Puerto Rico, as well as some other locations. These Puerto Rico repeaters can be a vital link to us here in Northern New Jersey with the people of Haiti. Frank sent an e-mail that contains some other useful information. You may want to make note of some of this information. It is posted below:

Hello Leon, i just spoke with Eladio (HI3AW) on the Echolink Network who informed me that hopefully tomorrow morning a group of Dominican HAMs are going to fire up a repeater in "Lomas Las Petacas" (apprx 6,990 feet) in south-west of the Dominican Republic on frequency 146.970MHz (-) PL 100.0. Eladio informed me that HAMs in Port of Prince should be able to hit this repeater with walkie-talkies with just 4-5 watts. Lets hope that they can be able to get this repeater going tomorrow. I bet you that if they are able to get this repeater going, then you will see a dozen or more of Amateur Radio Operators from the Dominican Republic on Echolink over the weekend. Unfortunately, up until now we've only seen a handful connected on Echolink at any single time. Lets hope this changes because they are indeed in the best possible location to be able to provide us with one of the best gateways of communications to Haiti.

Also, I heard Franco (YV5NSF) tell Eladio that there will be three Venezuelan rescue groups which many of them are also HAMs who will be arriving at Haiti this weekend and that they also expressed the need to operate any Amateur Repeater in the Dominican Republic which can provide them with coverage around the Port of Price immediate area. Eladio confirmed that this repeater which they will be attempting to fire up tomorrow should be able to provide service to that area.

Last, this is the link o fthe most common stations that conenct with me from Puerto Rico and also from the imemdiate areas aroudn here. Hope this information can help out.

Slight correction. We have been in contact directly to Haiti from our Disaster Operations Center in Fairfield. There are some communications, though limited. This continues as long as batteries/fuel for generators are/is available. Please note this was over internet not radios.

655. Operators - Update #1 for Sunday Jan. 17

Yahoo group: EC_EmComm
Date: 2010-01-17 12:49:15 UTC
From: Bob
Topic: 655 Message: 655

Good morning,

Once again, I thank each of you for volunteering to serve as operators. Our location is waiting for us. We are awaiting the establishment of stations in Haiti that will be passing Health and Welfare information. The good folks at IRESC expect operators to be set up sometime between today and Tuesday. Once we know they're up and running, I will reach out again so that we can set up an operating schedule for each volunteer.

In the meantime, you can monitor this link for a simulcast of HF activity re the disaster: http://www.ustream.tv/channel/voip-radio <http://www.ustream.tv/channel/voip-radio>

Daytime nets to monitor are SATERN 14.265 (USB), and the Maritime Net 14.300 (USB).

The IRESC Net is operating around-the-clock on EchoLink Node 278173 (please select the "Listen Only" mode when you are not transmitting, so as to avoid inintended transmissions which are easy to do on the computer).

You may also listen to a simulcast of the IRESC Net on the Cirri repeater, as to my prior e-mails.

Please reach out if you have any questions, concerns, comments or suggestions. We'll have a schedule together soon enough and look forward to everyone serving at that time.

658. HF Frequencies for Haiti Return to Normal...

Yahoo group: EC_EmComm
Date: 2010-01-26 18:41:20 UTC
From: Frank
Topic: 658 Message: 658

Please be advised:

From the ARRL Website: http://www.arrl.org/?artid=9398
<http://www.arrl.org/?artid=9398>

"HF Frequencies for Haiti Return to Normal Use (Jan 24, 2010) --
Considering the improving communications situation in Haiti, Dr Cesar
Pio Santos, HR2P, IARU Region 2 EMCOR, announced the release of HF
frequencies, including 7.045 and 3.720 MHz, for normal use. "We thank
the world radio amateur community for their support in keeping these
frequencies clear during the past days." "

Additionally, our NNJ Section SATERN Liaison Richard Montgomery - N3DV
reports that SATERN operations on 14.265 Mhz have moved to a Monitoring
Status, (DELTA II Alert Status) as of 1800z on 1/22/2010.

This will most likely be the final Update on this situation, unless
additional requests or information from ARRL HQ is sent out for
forwarding, updating, etc.

The Thanks of all involved, on all levels, during the last 10 plus days
goes to all who stood by or made initial preparations for further
response. Please continue to keep situationally aware of this continuing
situation as well as keep those directly or indirectly affected in your
thoughts and prayers.

As of the 2 PM teleconference with NWS, Maj. McNulty has decided that the State EOC will activate to a level 3 at 1800 hours Friday. We do not anticipate using the SEOC RACES/ARES radios at this time. However, I encourage all qualified SkyWarn observers to check into their respective regional repeaters and MONITOR before speaking.

The SEOC Operations Room will be monitoring EMRAD channel 28 on the trunked radio system, and of course we will utilize ETeam. An ETeam event has already been created under the "Operations" category.

Here is a URL that was provided by NWS Mt. Holly which depicts the forecast snowfall.

664. Newark Area Hams Honored for Haiti Efforts

Yahoo group: EC_EmComm
Date: 2010-02-09 11:40:49 UTC
From: Bob
Topic: 664 Message: 664

Greetings,

On WEDNESDAY, FEBRUARY 17, 2010, there will be a special joint presentation sponsored by the Newark Amateur Radio Society and the NJIT Amateur Radio Club. The purpose of this event is to honor and thank all of the people and organizations who worked so hard to provide communications on behalf of victims and family members affected by the earthquake in Haiti on January 12, 2010. We are extending a special invitation to members of Essex County Emcomm and the NJ Transit Amateur Radio Club to attend.

This event will be held on the campus of NJIT in Newark. A time has not yet been set, but I expect it to commence somewhere between 4:00 and 5:00 PM. You will be notified of the specific location and the time in advance. Talk-in will be on the K2MFF (NJIT) repeater, 147.225 MHz, + offset, PL 141.3.

Thank you!

From: Ray Linke
Topic: 665 Message: 665

Be advised that early on Wednesday morning 2/11/2010, the NWS Mt Holly NJ and NWS Upton NY both placed areas within and near the ARRL NNJ Section into a Blizzard Warning condition. Therefore, at this time, the Essex EMCOMM Alert Status is raised to MONITORING!

Monitoring - A Heightened State Of Awareness Is Requested Of All Essex EMCOMM leadership and members.

NNJ Section Counties included in the Blizzard Warning as of 5: 30 AM are: Essex, Hudson, Hunterdon, Middlesex, Monmouth, Somerset and Union

All other NNJ Section Counties (Bergen, Morris, Passaic, Sussex and Warren) are in a Winter Weather Warning as of 5:30 AM

Please be alert for later changes in this Status

667. Recognition for Newark Area Hams: Haiti Effort

Yahoo group: EC_EmComm
Date: 2010-02-16 03:02:25 UTC
From: Bob
Topic: 667 Message: 667

Greetings,
On WEDNESDAY, FEBRUARY 17, 2010 at 5:00 PM, there will be a joint program sponsored by the Newark Amateur Radio Society and the NJIT Amateur Radio Club, to recognize those Amateur Radio operators in our area who were instrumental in setting up communications to support the people of Haiti and their loved ones in New Jersey after the January 12, 2010 earthquake. It will be held on the NJIT campus in Newark, in the ECEC Building, Room 202.
Talk-in will be on the NJIT repeater, 147.225 MHz, + offset, PL 141.3.

This will be a short program, so please arrive early. Plenty of photos will be taken, so you may want to dress to impress. It will be great for us to all meet one another.
HOW TO GET THERE:
Room 202 in the ECEC building. This building is on the northwest corner of Warren St and Summit St. It is just south of and attached to Faculty Hall via a pedestrian bridge. Come out of the elevator in ECEC on the 2nd floor and make 2 right turns. If taking the pedestrian bridge from Faculty Hall, the room is on the left side after crossing the bridge.

LEON GRAUER - N0TAZ

669. Newark-Haiti Communications Effort Awards

Yahoo group: EC_EmComm
Date: 2010-02-18 01:53:03 UTC
From: Bob
Topic: 669 Message: 669

Goood evening,
The program this evening was a success in more ways than one. A number of people and organizations who were instrumental in supporting the Haiti communications effort were recognized by the Northern New Jersey Section of the ARRL Hudson Division and by the Newark Amateur Radio Society. The organizations who were a part of this effort included Northern New Jersey ARES, Essex County Emcomm, the NJIT Amateur Radio Club, the NJ Transit Amateur Radio Club and the Newark Amateur Radio Society. Several individuals supported the effort by volunteering to serve as operators. Those in attendance whose efforts were recognized were:
KC2SEK - Matthew (NJIT/Essex County Emcomm)
KC2RFC - Bob (ARRL/ARES/Essex County Emcomm) KB2OOJ - Frank
KA2PVT - Eric (NARS) KC2OVM - Greg (NJIT) KB2ZSG -
Carl (NJ Transit) K2HAV - Adam (NJIT) WW2I - Peter
(NJIT) KB3RWL - Sam (NARS) N0TAZ - Leon (NARS/Essex
County Emcomm)
Also present was Bill Bishop, representing the Newark Office of Emergency Management.
Honorees who were not present will receive their certificates in the mail within the next week. The silver lining in the cloud of the Haiti disaster is that the Amateur Radio community in and around Newark - - both organizations and individuals - - came together to provide an essential service and, more basically, we did something that Newark's Amateur Radio community has not done for decades: Meet one another!
We will send out notices advising when NARS will be meeting. We hope that many of you will join and become a part of what has quickly become a vibrant Amateur Radio organization. We hope that each of the organizations will keep us all abreast of their meetings and other activities so that we may support them. Most of all, I ask that we all support Essex County Emcomm through participation and in any other ways that may be needed. Please keep in mind that Frank, KB2OOJ, and Bob, KC2RFC, are both involved with separate projects for providing Amateur Radio communications into and out of Haiti for what we all know will be a very long recovery period. Please provide whatever assistance you can, whether in the form of operating, donating equipment or making a financial contribution. More information on these efforts will be sent to the list as it becomes available.
Again, thank you for your work and support in this important project.

Topic: 673 Message: 673

WINTER STORM WARNING IN EFFECT FROM MIDNIGHT TONIGHT TO NOON EST FRIDAY
FOR SUSSEX-WARREN-MORRIS-HUNTERDON-SOMERSET-MIDDLESEX-MERCER-CAPE
MAY-MONMOUTH-SALEM-GLOUCESTER-CAMDEN-BURLINGTON-OCEAN-CUMBERLAND-ATLANTI\
C-ESSEX-HUDSON-UNION-BERGEN-PASSAIC COUNTIES. A LOW PRESSURE SYSTEM
DEVELOPING OFF THE SOUTHEASTERN COAST WILL INTENSIFY TONIGHT AND MOVE
NORTHWARD ALONG THE EASTERN SEABOARD THROUGH THURSDAY. AS THE LOW
PRESSURE SYSTEM REACHES ITS STRONGEST POINT, IT IS EXPECTED TO MOVE
WESTWARD AND BACK ONTO LAND NEAR LONG ISLAND, NEW YORK ON THURSDAY, AND
REMAIN NEARLY STATIONARY THROUGH FRIDAY. PRECIPITATION IS EXPECTED TO
BEGIN LATER THIS EVENING, AND COULD START OUT AS EITHER RAIN OR A
MIXTURE OF RAIN AND SNOW. HOWEVER, PRECIPITATION WILL CHANGE OVER TO ALL
SNOW OVERNIGHT TONIGHT AND LAST THROUGH THE EARLY PART OF FRIDAY. THE
HEAVIEST SNOW IS EXPECTED TO BE THURSDAY INTO THURSDAY NIGHT WITH TOTAL
SNOW ACCUMULATIONS RANGING FROM 8 TO 12 INCHES IN THE SOUTHERN PART OF
THE STATE, AND 12 TO 18 INCHES ACROSS THE CENTRAL AND NORTHERN PARTS OF
THE STATE. THIS IS THE TIME WHEN THE STORM WILL BE AT ITS STRONGEST AS
WELL, WHICH WILL LEAD TO STRONG WINDS UP TO 30 MPH. THESE STRONG WINDS
WILL LIKELY LEAD TO BLOWING AND DRIFTING SNOW, AS WELL AS SCATTERED
POWER OUTAGES. THE SNOW COULD BE A HEAVY, WET SNOW, SIMILAR TO THE
LAST STORM, WHICH MAY HAVE AN EFFECT OF TREES AND BUILDING OVERHANGS.
SHOVELING SNOW WILL BE DIFFICULT WITH THIS STORM. ANYONE VENTURING OUT
TO SHOVEL SNOW IS ADVISED TO USE CAUTION WHEN SHOVELING SNOW AND TAKE
FREQUENT BREAKS. A WINTER STORM WARNING MEANS SIGNIFICANT AMOUNTS OF
SNOW...SLEET...AND ICE ARE EXPECTED OR OCCURRING. STRONG WINDS ARE ALSO
POSSIBLE. THIS WILL MAKE TRAVEL VERY HAZARDOUS OR IMPOSSIBLE. LATEST
SNOWFALL ACCUMULATION PREDICTIONS: ESSEX - 15"+ UNION - 15"+
SOMERSET - 15"+ MIDDLESEX - 13"+ CAMDEN - 12"+

In conjunction with NNJ ARES Essex County EmComm Alert Status is now raised to MONITORING

==========\

== Based on the latest Winter Storm Warnings, issued on Wednesday afternoon by both the NWS Upton NY and the NWS Mt Holly NJ, the ARRL NNJ Section ARES Alert Status is now raised to MONITORING. With the potential for significant snow, of the wet/heavy kind, which can build up on utility lines as well as tree limbs that could fall on the same lines, with possible interruptions or failures of those power and communications related infrastructure items, as such, all ARES Members need to be aware of any local situations requiring Amateur Radio based EmComm support. Local ARES Leadership will make determinations, based on local needs and conditions, to further raise the Alert Status, if Served Agencies and partners request assistance, etc. Information on contacting your local ARES Leader, as well as the compete NNJ ARES Alert Status Chart is available here: http://www.hudson.arrl.org/nnj/ares <http://www.hudson.arrl.org/nnj/ares> Information, updated as things change, from the NWS, concerning possible expected Snowfall amounts is available at the links noted below: Bergen, Essex, Hudson,Passaic and Union Counties (NWS Upton NY County Warning Area): http://www.erh.noaa.gov/er/okx/stormtotalprecip.php <http://www.erh.noaa.gov/er/okx/stormtotalprecip.php>

Hunterdon, Middlesex, Monmouth, Morris, Somerset, Sussex and Warren (NWS Mt Holly NJ County Warning Area) http://www.erh.noaa.gov/phi/StormTotalSnow/index.php <http://www.erh.noaa.gov/phi/StormTotalSnow/index.php> Please Stay Safe and Stay Alert throughout this and all events!

677. IARU Region 2 Request for Clear Frequencies - Chili Earthquake

Yahoo group: EC_EmComm
Date: 2010-02-28 16:06:52 UTC
From: Frank
Topic: 677 Message: 677

IARU Region 2 and Radio Club de Chile Request Amateurs to Keep Emergency Frequencies Clear (Feb 27, 2010) -- A massive 8.8 magnitude earthquake hit Chile today at 0634 UTC, triggering a potential tsunami. IARU Region 2 and the Red Chilena Nor Austral de Servicio (RECNA) have suggested Amateur Radio operators monitor the following emergency communications frequencies for traffic pertaining to the earthquake and tsunami: 3.738, 3.750, 7.050, 7.100, 14.200, 14.350, 21.200, 21.350, 28.300 and 28.500 MHz. IARU Region 2 Area Emergency Coordinator Jorge Sierra, LU1AS, reports that there is now traffic at frequencies of 40 meters from people seeking information from people in Chile: "We would appreciate if amateurs would leave free the frequencies used by RECNA, as well as the usual IARU Region 2 frequencies on in 20, 40, and 80 meters." In addition to the above frequencies, you may also want to listen to the worldwide emergency communication Center of Activity frequencies: 14.300, 18.160 and 21.360 MHz. Other suggested monitoring frequencies are 3.720, 7.045 and 7.060 MHz. Hawaiian Amateur Radio operators on the lookout for a possible tsunami are monitoring 7.088 and 3.888 MHz. -- Thanks to Radio Club de Chile's (RCC) Emergency Coordinator Aldo Oppici, CE3WAD, and W2VU, KI6SN, K3ZO, PY2ZX, PY5YA and El Grupo Argentino de Radiotelegrafia for the information. Please follow later updates at: http://www.arrl.org

To all EC EmComm Hams. found this info take a look...

In February 2010, the American Hospital Association (AHA) filed a request with the FCC for a blanket waiver of Section 97.113(a)(3) of the Commission's Rules "to permit hospitals seeking accreditation to use Amateur Radio operators who are hospital employees to transmit communications on behalf of the hospital as part of emergency preparedness drills." On March 3, the FCC issued a Public Notice -- WP Docket 10-54 -- seeking comments if the Commission "should grant AHA's request for a blanket waiver of Section 97.113(a)(3) to permit amateur operators who are hospital employees to participate in emergency drills that are conducted by hospitals for accreditation purposes and that are not government-sponsored." Section 97.113(a)(3) specifically prohibits amateur stations from transmitting communications "in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer."

Given the public interest in facilitating government-sponsored emergency preparedness and disaster drills, the Wireless Telecommunications Bureau and Public Safety and Homeland Security Bureau have provided a process for requesting a waiver of Section 97.113(a)(3) to permit named Amateur Radio operators to participate in specified government-sponsored drills by transmitting messages on behalf of identified employers. The waiver must be requested prior to the drill, and employees may not transmit amateur communications on their employer's behalf unless the waiver request has been granted by the FCC.

According to AHA, waiver relief should be available for these non-government-sponsored exercises "because it is in the public interest to ensure that hospital communications operate effectively during emergencies." The FCC noted that in its blanket waiver request, the AHA also stated that requiring separate waiver requests would be administratively burdensome on hospitals and the Commission. "AHA thus requests a blanket waiver for hospitals seeking Joint Commission accreditation, until such time as the Commission adopts a final order in response to a forthcoming Notice of Proposed Rulemaking that will seek comment on potential changes to Section 97.113(a)(3)," the FCC said.

"AHA states that hospitals seeking accreditation from the Joint Commission (formerly the Joint Commission on Accreditation of Healthcare Organizations) must prepare an emergency operations plan setting forth how the hospital will communicate during emergencies, and establish back-up communications links (which, among other means

of communications, may include amateur radio stations) to communicate essential information if primary communications systems fail," the FCC pointed out in its Public Notice. "AHA states that hospitals seeking accreditation also are required to test their emergency operations plans twice annually."

As such, the FCC has opened up the matter for public comment. Not only are comments in favor of or against the issue of amateur operators -- who are hospital employees -- to participate in emergency drills conducted by hospitals for accreditation purposes that are not government-sponsored welcomed, the Commission is also seeking comments addressing "whether, if blanket relief were to be granted, there would be some benefit from requiring hospitals to provide notice to the Commission concerning emergency drills they perform, and what such notice should entail."

Comments are due by Friday, April 2; reply comments are due no later than Monday, April 19. All filings should reference the docket number of this proceeding, WP Docket No 10-54. In the Public Notice, the FCC noted that this proceeding has been designated as a "permit-but-disclose" proceeding in accordance with the Commission's ex parte rules: "Parties making oral ex parte presentations in this proceeding are reminded that memoranda summarizing the presentation must contain the presentation's substance and not merely list the subjects discussed. More than a one- or two-sentence description of the views and arguments presented is generally required."

Instructions on how to paper file or file electronically are listed in the Public Notice.

So what do you think....

12th Annual New Jersey Emergency Preparedness Conference

May 3-7, 2010

Tropicana Hotel and Casino Atlantic City, New Jersey

The early bird deadline is quickly approaching

Register on or before March 15, 2010 to receive the early bird discount
and guarantee your 2010 conference bag. Enjoy the same low price with
many added benefits this year!
THIS YEAR'S SCHEDULE OF EVENTS:

May 3 -5: Conference Training conducted by professionals active in the
Emergency Management Field. Sessions range from ½ day to 3 days in
length
May 5: Golf Outing ☐ Join us for a 9:00am shotgun start at Harbor
Pines Golf Club
May 5 - 6: Visit over 100 Exhibits ☐ The Exhibit Hall is open
Wednesday evening and all day on Thursday
May 5 -6: Breakout Sessions conducted covering multiple topic tracks and
many aspects of emergency preparedness
May 7: The Sprint Nextel Emergency Response Team (ERT) will be hosting
their Rapid Deployment Solutions Conference at the NJEPA Conference

NEW THIS YEAR

*
Breakout sessions begin on Wednesday afternoon and run through Thursday
this year
*
A variety of new training courses have been added for 2010
*
Join Sprint Nextel's Emergency Response Team for live operational
demonstrations of their Rapid Deployment Solutions on Friday May 7th,
2010. Breakfast and Lunch are included. This conference includes a live,
over☐the☐air, tactical demonstration with attendee
participation. The Team will conduct a tactical deployment exercise
where they will demonstrate (with infrastructure, equipment and
personnel) how Sprint's specialized expertise can restore all forms of

communications even in the most remote and overwhelmed conditions. You may see the detailed agenda and slide-show at the following link:
http://www.njepa.org/main/sprint.asp
<http://www.njepa.org/main/sprint.asp>
*
You must RSVP for this part of the conference, and you can do that by clicking on this Friday session in the conference agenda when you register. If you've already registered, just go back into your registration and add this session to your agenda.

REGISTRATION INSTRUCTIONS AND INFORMATION

Click here <http://www.njepa.org/main/conference.asp> to view 2010 Conference Details.

For additional information on Sponsoring or Exhibiting at the conference, click here <http://www.njepa.org/main/sponsor.asp> .

To register for a Sponsorship Opportunity or Exhibitor Booth, click here <http://www.njepa.org/main/registration/sponsorReg.asp>

To attend this year's conference please click here <http://guest.cvent.com/i.aspx?4W%2cM3%2c78edc8c8-06dc-4404-a463-4424162\2de6c> to register.

686. Time for the annual "Newark Classic" run

Yahoo group: EC_EmComm
Date: 2010-03-12 04:30:12 UTC
From: Bob
Topic: 686 Message: 686

It's that time! Time for the annual "Newark Classic" run. It will be held on SUNDAY, MARCH 21, 2010. There will be a 13 mile course and a 5 mile course.

We need communications volunteers and LOTS of 'em. So please sign up by replying to this e-mail. I will have specific event and set-up times in the next day or two.
If you are willing to volunteer, please reply to this e-mail no later than this Friday, March 12, 2010, and provide:
Your Name Your Call Sign Your Phone Number
Thank you.

687. Sunday's (March 21), Newark Distance Classic Run

Yahoo group: EC_EmComm
Date: 2010-03-18 00:16:12 UTC
From: Bob
Topic: 687 Message: 687

Greetings,

We're down to the wire, as Sunday is almost here. We still have only a total of 6 radio operators signed up and we still need a total of 20 for this Sunday's (March 21), Newark Distance Classic Run. It consists of a 5K and 13K run. The staging area is at Rutgers' Golden Gym at the corner of Washington Street and Warren Street. Operators should arrive no later than 8:00 AM, and the event should conclude by 1:00 PM.

This event is not as big as the NYC Marathon or the MS-150, but it is much larger than most runs and walks. Events like this one provide hams with valuable "hands on" training for real emergencies.

If you can make it, please reply to this e-mail immediately, as I want to send out the manual to everyone on Thursday. If you belong to any local ham radio clubs, please forward this e-mail to members in case any are interested in participating. Anyone wishing to volunteer should contact me, Leon Grauer/N0TAZ, directly at n0taz@NewarAmateurRadio.com <mailto:n0taz@...> . <mailto:n0taz@NewarAmateurRadio.com>

<mailto:n0taz@...>

From: Bob
Topic: 689 Message: 689

Northern NJ Red Cross is putting together a response for the local flood situation for this Friday Saturday and Sunday

It's for disaster assessment which is going around and figuring out how many families are affected by the flood. So they can get assistance. Triggers all kinds of Federal and private assistance help

We should have high power 2m radios in the vehicles. Around here we will probably be using 146.895

In Ridgewood, probably BARA's Paramus repeater

Teams go out in the am and quit around 3 pm

If you are interested Email, me.

We will probably be on the ws2q repeater for the duration.

Fred ww2veh

Yahoo group: EC_EmComm
Date: 2010-03-27 12:20:23 UTC
From: Ray Linke
Topic: 49 Message: 693

In the "nothing like waiting until the last minute" department, I just received a phone call asking for our participation in the 2010 Cherry Blossom Run which will be on Sunday, April 11th.

I will be away on business; however if anyone would like to volunteer to provide communications as we have done for the last 20+ years, please let me know.

Generally we gather by 8:30 am at the Field House in Branch Brook Park and the race is concluded by noon. Parking permits to park inside the park will be available as long as you arrive prior to the county police locking down the course

In the past it has always been enjoyable to gather as a group for breakfast as well..

Please contact me if you have any questions and let me know if you are available to participate. We need 7 -8 people to do the job well.

Thanks

Ray - K2DEE

701. Walk for Babies 04/25/10

Yahoo group: EC_EmComm
Date: 2010-04-22 14:03:41 UTC
From: Bob
Topic: 701 Message: 701

Good Morning,

We need at least eight (8) more radio operators for the Walk for Babies in Mercer County Park this Sunday, April 25th, from 8:00 AM to about 12:00 noon. So far, we have just five volunteers and that's inadequate. If we don't get commitments from at least eight (8) more operators, we will have to cancel our participation, which would mean that the event would go on, but without communications support.

Please sign up if you can and please forward this e-mail to members of any radio organizations to which you belong, especially any in the Central or Southern NJ areas, or in the Philadelphia area.

We need people to sign up NO LATER THAN 12:00 noon on Thursday, April 22nd. If we do not have an adequate number of operators by then, we will have to cancel our participation. I hope that we can do this and provide meaningful support for this event.

Thank you.

Topic: 742 Message: 743

Here is the egg recall for New Jersey.

If you're not sure either toss the eggs, return them to the store and have them verify plant number and date on the end of the carton, or if you cook them, cook them hard. No loosely cooked eggs. I prefer returning them if they show up with a plant number below.

As noted in the NJ recall notice, regardless of the company named in the list below, some of them repackage items. Simply look for the plant number and Julian date.

There was another egg recall announced yesterday and info may be found on this site http://www.fda.gov/Safety/Recalls/ucm223452.htm

This site http://www.recalls.gov/recent.html will help you find other recalls.

73, Jim WB2HBZ

NJLINCS Health Alert Network

Public Health Update

Distributed by the New Jersey Department of Health and Senior Services

Subject: Egg Recall Due to Salmonella Contamination

Date: 8/20/2010; 16:11:35

Message#: 101690-8-20-2010-PHUP

Contact Info: Alan L. Talarsky, NJDHSS/CEHS/Food and Drug Safety Program
Phone: 609-588-3123; Email: at2@...

Attachments: None

Please review the following message from Alan Talarsky, Environmental Scientist 1, Food and Drug Safety Program, DHSS regarding the following Class 1 Recall issued by the U.S. Food and Drug Administration:

Wright County Egg of Galt, Iowa is expanding its voluntary recall (original recall date: August 13, 2010) of specific Julian dates of shell eggs produced by their farms because they have the potential to be contaminated with Salmonella. Salmonella is an organism which can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Healthy persons infected with Salmonella often experience fever, diarrhea, nausea, vomiting and abdominal pain. In rare circumstances, infection with Salmonella can result in the organism getting into the bloodstream and producing more severe illnesses

such as arterial infections, endocarditis or arthritis.

Eggs affected by the expanded recall were distributed to food wholesalers, distribution centers and foodservice companies in California, Arizona, Missouri, Minnesota, Texas, Georgia, Washington, Oregon, Colorado, Nevada, Iowa, Illinois, Utah, Nebraska, Arkansas, Wisconsin and Oklahoma. These companies distribute nationwide. It has not yet been determined whether these eggs were distributed into New Jersey.

Eggs are packaged under the following brand names: Albertsons, Farm Fresh, James Farms, Glenview, Mountain Dairy, Ralphs, Boomsma, Lund, Kemps and Pacific Coast. Eggs are packed in varying sizes of cartons (6-egg cartons, dozen egg cartons, 18-egg cartons, and loose eggs for institutional use and repackaging) with Julian dates ranging from 136 to 229 and plant numbers 1720 and 1942.

Dates and codes can be found stamped on the end of the egg carton or printed on the case label. The plant number begins with the letter P and then the number. The Julian date follows the plant number, for example: P-1720 223.

Prior Recall

Eggs under the August 13, 2010 recall are packaged under the following brand names: Lucerne, Albertson, Mountain Dairy, Ralph's, Boomsma's, Sunshine, Hillandale, Trafficanda, Farm Fresh, Shoreland, Lund, Dutch Farms and Kemps. Eggs are packed in varying sizes of cartons (6-egg cartons, dozen egg cartons, 18-egg cartons, and loose eggs for institutional use and repackaging) with Julian dates ranging from 136 to 225 and plant numbers 1026, 1413 and 1946.

There have been confirmed Salmonella enteritidis illnesses relating to the shell eggs and traceback investigations are ongoing.

As a precautionary measure, Wright County Egg also has decided to divert its existing inventory of shell eggs from the recalled plants to a breaker, where they will be pasteurized to kill any Salmonella bacteria present.

Consumers who believe they may have purchased these shell eggs should not eat them but should return them to the store where they were purchased for a full refund. This recall is of shell eggs only. Other egg products produced by Wright County Eggs are not affected. Consumers with questions should visit www.eggsafety.org or call Wright County's toll-free information number (866-272-5582), which contains a message outlining recall instructions for consumers.

The NJDHSS Food and Drug Safety Program is asking local health departments to check for recalled product during routine inspections. If the affected product is found, it is best to notify the person in charge and/or management of the recall and ensure that affected products are removed from shelves. Local health departments can also advise consumers to check their refrigerators for these egg products.

If any requests for assistance are received from FDA, the Food and Drug Safety Program will contact you. For additional information regarding warnings and recalls, please click on the weblink below.

TCPAT2
BULLETIN
HURRICANE EARL ADVISORY NUMBER 30
NWS TPC/NATIONAL HURRICANE CENTER MIAMI FL AL072010
500 PM EDT WED SEP 01 2010

...DANGEROUS AND LARGE HURRICANE EARL POSES A THREAT TO THE MID-ATLANTIC COAST...WATCHES AND WARNINGS EXTENDED NORTHWARD THROUGH MASSACHUSETTS...

SUMMARY OF 500 PM EDT...2100 UTC...INFORMATION

LOCATION...26.3N 73.3W
ABOUT 235 MI...380 KM E OF GREAT ABACO ISLAND
ABOUT 630 MI...1010 KM SSE OF CAPE HATTERAS NORTH CAROLINA
MAXIMUM SUSTAINED WINDS...135 MPH...215 KM/HR
PRESENT MOVEMENT...NW OR 320 DEGREES AT 17 MPH...28 KM/HR
MINIMUM CENTRAL PRESSURE...941 MB...27.79 INCHES

WATCHES AND WARNINGS

CHANGES WITH THIS ADVISORY...

A TROPICAL STORM WARNING HAS BEEN ISSUED FROM THE NORTH CAROLINA/VIRGINIA BORDER TO SANDY HOOK NEW JERSEY...INCLUDING DELAWARE BAY SOUTH OF SLAUGHTER BEACH AND THE CHESAPEAKE BAY SOUTH OF NEW POINT COMFORT.

A HURRICANE WATCH HAS BEEN ISSUED FROM WOODS HOLE TO SAGAMORE BEACH MASSACHUSETTS...INCLUDING MARTHAS VINEYARD AND NANTUCKET.

A TROPICAL STORM WATCH HAS BEEN ISSUED FROM SANDY HOOK NEW JERSEY TO WOODS HOLE MASSACHUSETTS...INCLUDING BLOCK ISLAND AND LONG ISLAND SOUND.

A TROPICAL STORM WATCH HAS BEEN ISSUED FROM NORTH OF SAGAMORE BEACH TO THE MOUTH OF THE MERRIMACK RIVER MASSACHUSETTS.

SUMMARY OF WATCHES AND WARNINGS IN EFFECT...

A HURRICANE WARNING IS IN EFFECT FOR...
* BOGUE INLET NORTH CAROLINA NORTHEASTWARD TO THE NORTH CAROLINA/VIRGINIA BORDER INCLUDING THE PAMLICO AND ALBEMARLE SOUNDS.

A HURRICANE WATCH IS IN EFFECT FOR...
* NORTH OF THE NORTH CAROLINA/VIRGINIA BORDER TO CAPE HENLOPEN DELAWARE.
* WOODS HOLE TO SAGAMORE BEACH MASSACHUSETTS...INCLUDING MARTHAS VINEYARD AND NANTUCKET.

A TROPICAL STORM WARNING IS IN EFFECT FOR...
* FROM CAPE FEAR TO WEST OF BOGUE INLET NORTH CAROLINA.
* FROM THE NORTH CAROLINA/VIRGINIA BORDER TO SANDY HOOK NEW JERSEY...INCLUDING DELAWARE BAY SOUTH OF SLAUGHTER BEACH AND THE CHESAPEAKE BAY SOUTH OF NEW POINT COMFORT.

A TROPICAL STORM WATCH IS IN EFFECT FOR...
* SANDY HOOK NEW JERSEY TO WOODS HOLE MASSACHUSETTS...INCLUDING BLOCK ISLAND AND LONG ISLAND SOUND.
* NORTH OF SAGAMORE BEACH TO THE MOUTH OF THE MERRIMACK RIVER MASSACHUSETTS.

A HURRICANE WARNING MEANS THAT HURRICANE CONDITIONS ARE EXPECTED SOMEWHERE WITHIN THE WARNING AREA. A WARNING IS TYPICALLY ISSUED 36 HOURS BEFORE THE ANTICIPATED FIRST OCCURRENCE OF TROPICAL-STORM-FORCE WINDS...CONDITIONS THAT MAKE OUTSIDE PREPARATIONS DIFFICULT OR DANGEROUS. PREPARATIONS TO PROTECT LIFE AND PROPERTY SHOULD BE RUSHED TO COMPLETION.

A HURRICANE WATCH MEANS THAT HURRICANE CONDITIONS ARE POSSIBLE WITHIN THE WATCH AREA. A WATCH IS TYPICALLY ISSUED 48 HOURS BEFORE THE ANTICIPATED FIRST OCCURRENCE OF TROPICAL-STORM-FORCE WINDS...CONDITIONS THAT MAKE OUTSIDE PREPARATIONS DIFFICULT OR DANGEROUS.

A TROPICAL STORM WARNING MEANS THAT TROPICAL STORM CONDITIONS ARE EXPECTED SOMEWHERE WITHIN THE WARNING AREA WITHIN 36 HOURS.

A TROPICAL STORM WATCH MEANS THAT TROPICAL STORM CONDITIONS ARE POSSIBLE WITHIN THE WATCH AREA...GENERALLY WITHIN 48 HOURS.

INTERESTS IN NORTHERN NEW ENGLAND AND SOUTHEASTERN CANADA SHOULD MONITOR THE PROGRESS OF EARL.

FOR STORM INFORMATION SPECIFIC TO YOUR AREA...INCLUDING POSSIBLE INLAND WATCHES AND WARNINGS...PLEASE MONITOR PRODUCTS ISSUED BY YOUR LOCAL NATIONAL WEATHER SERVICE FORECAST OFFICE.

DISCUSSION AND 48-HOUR OUTLOOK

AT 500 PM EDT...2100 UTC...THE LARGE EYE OF HURRICANE EARL WAS

LOCATED NEAR LATITUDE 26.3 NORTH...LONGITUDE 73.3 WEST. EARL IS MOVING TOWARD THE NORTHWEST NEAR 17 MPH...28 KM/HR. THIS MOTION IS EXPECTED TO CONTINUE TONIGHT WITH A GRADUAL TURN TO THE NORTH ON THURSDAY. ON THE FORECAST TRACK...THE CORE OF THE HURRICANE WILL APPROACH THE NORTH CAROLINA COAST BY LATE THURSDAY.

MAXIMUM SUSTAINED WINDS HAVE INCREASED TO NEAR 135 MPH...215 KM/HR...WITH HIGHER GUSTS. EARL IS AGAIN A CATEGORY FOUR HURRICANE ON THE SAFFIR-SIMPSON HURRICANE WIND SCALE. SOME FLUCTUATIONS IN INTENSITY ARE LIKELY TONIGHT AND THURSDAY...BUT A GRADUAL WEAKENING TREND IS ANTICIPATED THEREAFTER.

EARL IS STILL A LARGE HURRICANE AND GROWING. HURRICANE FORCE WINDS EXTEND OUTWARD UP TO 90 MILES...150 KM...FROM THE CENTER...AND TROPICAL STORM FORCE WINDS EXTEND OUTWARD UP TO 200 MILES...325 KM.

LATEST MINIMUM CENTRAL PRESSURE REPORTED BY AN AIR FORCE RECONNAISSANCE PLANE A FEW HOURS AGO WAS 941 MB...27.79 INCHES.

HAZARDS AFFECTING LAND

WINDS...TROPICAL STORM FORCE WINDS ARE EXPECTED TO REACH THE NORTH CAROLINA COAST WITHIN THE WARNING AREA BY THURSDAY AFTERNOON WITH HURRICANE FORCE WINDS OCCURRING BY LATE THURSDAY. TROPICAL STORM FORCE WINDS WILL LIKELY REACH THE COAST FROM VIRGINIA NORTHWARD TO NEW JERSEY BY EARLY FRIDAY.

STORM SURGE...A DANGEROUS STORM SURGE WILL RAISE WATER LEVELS BY AS MUCH AS 3 TO 5 FEET ABOVE GROUND LEVEL WITHIN THE HURRICANE WARNING AREA. ELSEWHERE...STORM SURGE WILL RAISE WATER LEVELS BY AS MUCH AS 1 TO 3 FEET ABOVE GROUND LEVEL WITHIN THE TROPICAL STORM WARNING AREA. NEAR THE COAST...THE SURGE WILL BE ACCOMPANIED BY LARGE AND DESTRUCTIVE WAVES.

RAINFALL...ACCUMULATIONS OF 2 TO 4 INCHES...WITH ISOLATED MAXIMUM AMOUNTS OF 6 INCHES...ARE EXPECTED OVER PORTIONS OF EASTERN NORTH CAROLINA INCLUDING THE OUTER BANKS.

SURF...LARGE SWELLS FROM EARL WILL CONTINUE TO AFFECT THE BAHAMAS AND THE EAST COAST OF THE UNITED STATES THROUGH FRIDAY. THESE SWELLS WILL LIKELY CAUSE DANGEROUS SURF CONDITIONS AND RIP CURRENTS.

NEXT ADVISORY

NEXT INTERMEDIATE ADVISORY...800 PM EDT.
NEXT COMPLETE ADVISORY...1100 PM EDT.

779. Our new Home at WOFAS is now tentative.

Yahoo group: EC_EmComm
Date: 2010-12-09 21:30:54 UTC
From: Bob
Topic: 779 Message: 779

Well Guys,

It looks like the fickle finger of fate has turned in our direction once again. Our new home at WOFAS is in serious jeopardy. The town of West Orange has informed West Orange First Aid Squad that they (WOFAS) must clear out their equipment from the second floor of the Head Quarters building. It seems that WO Town intends to use or re-structure the space for an EOC. We are not sure at the moment what the full impact will be for WOFAS and in turn us. I found this information out today as I was trying to confirm our Quarterly Meeting schedule for 2011. At worst it may mean that we can kiss our new found home goodbye. At the very least meeting there for January is now tentative. I will set up an alternate meeting place for January, possibly NCFD Recreation Hall. I will keep you all up to date as I receive any new information.

782. Be somebody!

Yahoo group: EC_EmComm
Date: 2010-12-13 15:36:58 UTC
From: Bob
Topic: 782 Message: 782

EmComm Members:

There is plenty of room for more leadership within the group. We have many established positions that have yet to be filled. There are many more ad hoc positions that may need to be established along the way. If you need clarification on what positions are available and what the duties are please ask. If you do not feel qualified to accept a position, think again. Your interest and performance would be the keys to doing an outstanding job. Remember this when you consider accepting one of these tasks 1) the task is not currently being done, 2) you can learn the new skills required and 3) if it becomes too large a task we can find more people to work with you.

To have the size group that will perform well on the county level, we still need to grow. The reason being, during a true disaster many of the members may be occupied with the needs of their own families. This is not only expected but commendable. You can not be expected to perform well when you are worried about your own needs or the well being of your loved ones. Those concerns must come first. That being the case the number of members available to respond to a disaster or emergency situation will be reduced. The larger the situation, the fewer the members available to respond.

This is precisely why we need a substantial number of members. To sustain a larger organization we also need a larger pool of leaders. This means both assigned and potential leaders. We need one person in each established position to take command of the assigned task. We also need members to support the lead position. Members that have the skills and understanding of the leader's responsibilities, and that could (and would be willing to) take command if needed.

If you have ever wondered, or have been asked, why bother volunteering time to help other people? This reason may not have occurred to you. I mentioned earlier that you may not be available because you and or your loved ones may be in need during a disaster. I can tell you from experience, it's a wonderful feeling, regardless of whether you are in need or tending to the needs of others, having the organization you have contributed to and helped build, respond to the situation. There will be many at the time thinking "Somebody should be doing some thing to help!" Be somebody!

WRRL HF NETS
(ALL SERIOUS EMCOMM OPERATORS WELCOME)

â□□ REGIONAL EMCOMM NETS:
Pacific (and Mountain) Time Zones: PTZNN (Jefferson Noon Net/JNN)
daily at 1200 PTZ on 7204/± kHz (7214 and 3911± kHz alternate)
Central (and Eastern) Time Zones: CTZNN (Lincoln Noon Net/LNN)
Mondays, Wednesdays and Fridays at 1200 CTZ on 7183± kHz
The LNN and the JNN are for operators who want to learn and/or practice proper ('phone) net operating procedures and standardized traffic handling skills. Stations in the MTZ (band conditions permitting) can potentially participate in both of these nets, and thereby provide a relay circuit between the east coast and the west coast on 40 meters three times a week! It is anticipated that the LNN will eventually become a daily circuit.
â□□ WRRL STATION MAP - NEW GRAPHICS, CHECK IT OUT!
Map showing the location of WRRL stations can be viewed at:
http://www.wrrl.org/map <http://www.wrrl.org/map>

NATIONAL EMCOMM TRAFFIC SERVICE (N.E.T.S.) Freq's on Bottom..

The NATIONAL EMCOMM TRAFFIC SERVICE uses designated watch and calling frequencies. Public service amateur radio operators everywhere are invited to monitor these frequencies whenever possible. But when disasters or other incidents occur, Emcomm operators are asked to warm up their radios and "light up" the NATIONAL EMCOMM TRAFFIC SERVICE..."24/7". Active operators know which bands are most likely to be "open" depending upon the time of day, season, etc.

During disasters and for other emergencies, the frequencies are "open nets". When traffic becomes heavy, they will become "command and control" frequencies with a net control station "triaging" traffic and directing stations with traffic to another (traffic) frequency. (At least 5 kHz away.) Proper net procedures are essential.

NETS does not maintain regular schedules and does not handle routine "make work" messages such as birthday greetings, "your license is about to expire", "book messages", etc. NETS is intended to supplement and fortify other networks by providing a vehicle for Emcomm operators to originate, relay and deliver legal radio message traffic (I.e. - "first class mail") of any precedence, at any time, from and to anyone and anywhere--especially during disasters or other crises. NETS stations will cooperate and use other networks that are known to be capable of accurately and efficiently handling RADIOGRAMS.

NATIONAL EMCOMM TRAFFIC SERVICE (NETS) WATCH ☐ MONITOR ☐ CALLING ☐ TRAFFIC FREQUENCIES
All listed frequencies (except 60 meters) are nominal. Actual nets may be up or down as much as 20 kHz
SSB:
☐ 1982 kHz

☐ 3911 kHz RADIO RESCUE (SSB and CW)
☐ 5332 kHz "Up" to other 60M channels as necessary. 50W maximum ERP. (Activated during actual incidents.)
☐ 7214 kHz
☐ 14280 kHz
☐ ALASKA ONLY: 5167.5 kHz (USB emergency traffic only)

CW:
☐ 1911 kHz
☐ 3540 kHz
☐ 3911 kHz RADIO RESCUE (SSB and CW)
☐ 7111 kHz
☐ 10119 kHz

☐ 14050 kHz
☐ ALASKA - 3540/7042/14050 kHz
☐ GULF STATES (LA, MS, TX, AL) - 7111 kHz 1100Z-2300Z / 3570 kHz
2300Z-1100Z

During EMERGENCIES: 7111 kHz daytime, 3570 kHz nighttime.

(Times approximate depending on band conditions and changes in
sunrise/sunset.)

VHF/UHF FM
☐ LOCAL EMCOMM SIMPLEX - 146.55 MHz
☐ RED CROSS EMCOMM SIMPLEX - 147.42 MHz
☐ NATIONAL CALLING SIMPLEX - 146.52 MHz

Frequencies listed may be on or near other established net frequencies.
As a matter of operating courtesy, always move up or down a few kHz to
avoid QRM when a frequency is in use.

789. Official NWS Snowfall Links - RE: [EC_EmComm] Latest weather post from Sun into Mon..

Frank and All

I find this site useful http://www.erh.noaa.gov/okx/em2_winter.php

Got this link from George Sabbi.

NWS is not predicting as much snow, at least out in Clinton where my QTH is, but we will find out in a day or so.

As always, prepare for the worst. Mounted my plow and gassed the snow blower yesterday.

Merry Christmas from The Red Cross radio group, www.arcsquared.org

To all members,

As we close out our 2010 year, we look forward to yet another growing year. I'd like to take a moment to wish you and your families every bit of happiness this Holiday Season and prosperity in the New Year.

As we start to schedule our Spring 2011 events, I look forward to continuing being the groups Information Officer and to keep the relationship we all have in the coming year.

If you are going out tonight, please be safe.

Happy New Year everybody...

From: Bob
Topic: 798 Message: 798

I am pleased to be able to send this announcement.

We will be holding the first Quarterly Meeting at the WOFAS HQ in West Orange.

It is still unsure if this will be the case for the rest of the meetings for this year.

The schedule of meetings should remain in tact regardless but that is not for sure either.

We may have to be flexible until things firm up one way or the other.

Below is the schedule as it stands for this year's nets and meetings.

Essex County Emergency Communications

2011 Nets and Quarterly Leadership Meetings

All Nets will be on the First Tuesday of each month at 9:00 PM.

All meetings will be held during the first month of each quarter

at 9:00 AM on the Saturday following the Net

Unless otherwise specified.

January Net 4th Meeting 8th

February Net 1st

March Net 1st

April Net 5th Meeting 9th

May Net 3rd

June Net 7th

July Net 5th Meeting 9th

August Net 2nd

September Net 6th

October Net 4th Meeting 8th

November Net 1st

December Net 6th

820. New Ice Age and other news!

Yahoo group: EC_EmComm
Date: 2011-01-28 20:07:04 UTC
From: Bob
Topic: 820 Message: 820

All members,

I hope you are all getting through our new Ice Age. I would like to congratulate Frank KC2AUP for his outstanding effort in keeping us all informed of the weather events as they approach. Fortunately there have been no reported emergencies that needed our attention or activation. It seems that the situation at WOFAS has stabilized to some degree and leadership may be able to meet there in the future. There are new developments a foot for SKYWARN. NWS, George Sabbi KC2GLG, and Stan Rogacki WA2EXX have consorted to shake things up and put some energy back in the program in Essex County. There may be a training session announced shortly as part of that effort. Stay tuned. The Essex County EmComm website (essexcountyemcomm.org) is progressing under the skilled hands of Tom Waxmonsky KB2TOM.

Ray Linke K2DEE has informed me of some interesting information that came to him through his County RACES network. There is a group called New Jersey Public Health Amateur Radio Consortium (NJPHARC). We are researching the group and working on becoming a collaborative part of their activities in Essex County.

We need to move ahead on the order for shirts and jackets. I have a few and if there any more get them in to me soon. Just before I send the list to Murphy's I will confirm your order with you. This should happen next week. If I have an order from you and you don't hear from me by the end of next week, contact me. Otherwise you will "miss the boat".

Don't forget our Net is next Tuesday. I would like to hear everybody out there on the airwaves.

836. A NOTICE TO: ALL Amateur Radio Operators

Yahoo group: EC_EmComm
Date: 2011-02-23 02:12:11 UTC
From: Bob
Topic: 836 Message: 836

A NOTICE TO:

EC EmComm Members and

ALL Amateur Radio Operators

I just received the information below and it requires immediate attention from each of us. The ARRL is fighting to protect our frequencies. These are frequencies that we use in the hobby daily and rely on during emergency communications. Please do this for yourselves and the greater good of the Hobby. Read below and follow the directions. The next message is also directed at providing information that will demonstrate who the ARRL represents. It will also show that we can and do operate on the frequencies we are trying to protect for use during emergencies and the benefit of our communities.

Bob Crifasi KC2RFC

ACTION NEEDED -

2/22/2011

ARRL Asks Members to Write in Opposition to HR 607

http://www.arrl.org/news/arrl-asks-members-to-write-in-opposition-to-hr-\
607
<http://www.arrl.org/news/arrl-asks-members-to-write-in-opposition-to-hr\
-607>

"ARRL is asking its members to contact their US representatives in opposition to the sections of HR 607 that could affect the Amateur Radio Service allocation at 420-440 MHz. HR 607 is a direct threat is a direct threat to our limited spectrum and the ARRL encourages all amateurs to appropriately voice their opposition to this bill."

A Sample Letter for addressing this matter is at:
http://www.arrl.org/sample-letters <http://www.arrl.org/sample-letters>

PLEASE NOTE:

Letters MUST go to the ARRL representative in Washington (Chwat and Co)...NOT directly to your local Representative in Congress. Due to how postal mail is now physically processed to Congress, post 9/11, delays in timely deliver, sometimes of months or more, can be incurred. The ARRL representative will hand deliver letters on this matter to the appropriate locations/people Full Contact info for Chwat and Co is at:
http://www.arrl.org/contacting-chwat-and-co
<http://www.arrl.org/contacting-chwat-and-co>

PLEASE encourage all on your teams, as well as all amateur radio operators, to WRITE letters on this direct threat to our frequencies, as is requested at the links above!

-----Original Message-----
Sent: Tuesday, February 22, 2011 3:03 PM
Subject: ARES on-line registration form [FSD-98] has been updated.

To: ARRL Section Managers and ARRL Section Emergency Coordinators.

The Amateur Radio Emergency Service ® (ARES ®) on-line
registration form [FSD-98] has been updated.

The reason for updating this form is to take better advantage of the
on-line form and the capability of the records system that receives and
stores this registration information. With this ARRL will be able to
develop better and more accurate statistics concerning ARES membership
and its capabilities.

The information gathered on this form is intended for ARRL use only.

The ARES registration information that is gathered in the online form will be used to produce reports that will be made available to Section leadership. The system to produce these reports is currently in development. When it is ready we will let you all know.

Here is a summary of the differences between the former on-line ARES registration form and the new form.

- There are separate "fields" for the person's first and last names.

- There is now a separate drop-down box that asks the registrant to indicate his or her ARRL Section and license class

- The forms now asks, "What types of emergency power do you have at your home station?" and provides a check-off box for each choice.

- In addition, the ARES registration form now asks each applicant to check-off the specific kinds of training the registrant has taken. The form has a check-off box for ARRL Amateur Radio Emergency Communications courses, Federal Emergency Management Agency courses, National Weather Service (SKYWARN) courses, and the American Red Cross courses that the registrant has completed.

We here at HQ hope the information gathered from this ARES registration form will be helpful. It will serve as a supplementary way to sign up ARES members in your section.

The records system that receives and holds this registration information could also serve to build a record of ARES registrants around the country. In this regard, we would be able to gain better and more accurate statistics on the ARES membership.

Therefore it is critical that all ARES members complete the form so that they are properly recorded as an ARES volunteer. We realize that some Sections may have their own online ARES sign up page or may be using the paper forms it is still important to sign up on this form as well. If you signed up prior to the new website being implemented you will need to sign up again as this information was not transferred over to the new system. This is also a great opportunity to update your information. The new form may be found at http://www.arrl.org/ares-registration-form <http://www.arrl.org/ares-registration-form> .

Thank you very much for efforts and interest.

Subject: 2011 floods ALERT

All

An update on the flooding.

Although there is flooding now, it is basically a small operation for us. We have supplied some cots to some municipalities, and done some other things to help surrounding communities to the Passaic river.

However, rain is predicted for tomorrow and according to DA It looks like the flooding may get bad by Friday or Saturday. The NWS is just now posting forecasts for Thursday's storm and its affect on the rivers.

Still too early to tell whether or not this will turn into a mess like last year, but it is more than a possibility at this time. Or we may dodge a bullet.

Please be aware that we will need to support DA like last time and will need radio operators.

I will send another email when and if the situation worsens. Please pass along this update and ask Ham operators to please stay in touch as if this becomes a 2010 redux it will be more than a week of Ham radio operations.

Thanks all

850. Alert Level Normal/Stand Down (So Far)

Yahoo group: EC_EmComm
Date: 2011-03-08 20:37:11 UTC
From: Bob
Topic: 850 Message: 850

Leadership and Members please take note. Local flooding in some areas is reported. More rain on the way :

All NNJ ARES Leaders and key EmComm contacts are being kept in the direct loop of NWS issuances to its OEM and Key Partners (NWS Weather Briefings, etc) in regard to an expected significant rain, followed by significant flooding, event this week.

At this time, Tuesday afternoon, 3/8/2011...the NNJ ARES Alert Status remains at Normal/Stand-down, however, it is expected that within 24 hours, this will change, with the Alert Level being raised to at least the MONITORING for the entire NNJ Section, and possibly higher in some counties/jurisdictions. More info on the NNJ ARES Alert Status is

here: http://www.hudson.arrl.org/nnj/ares
<http://www.hudson.arrl.org/nnj/ares>

You will be advised when or if the Alert Level changes, and kept updated on local to NNJ Section situations regarding any Amateur Radio responses or deployments in support of our local Served Agencies, etc.

Let me know if you have any questions, etc

George Sabbi

851. Alert Status: Normal

Yahoo group: EC_EmComm
Date: 2011-03-09 01:27:59 UTC
From: Bob
Topic: 851 Message: 851

Essex County EmComm Leadership and Members:

I have been receiving updates on the situation within the county.

These updates are coming from several sources: NNJ SEC George Sabbi, EC EmComm Liaison Lucas DeLosh, and Fred Schlesinger of Red Cross ARC2, as well as others.

Some parts of the county are already flooding. Although the situation is bad for those affected, if left to its own it would subside and the water would recede. Unfortunately that may not happen. The forecast is for more heavy rain this week.

The Red Cross has extended cots to some of the municipalities for those already affected. They may be opening up shelters to cope with those displaced if the water continues to rise.

I have also been made aware that there is radio equipment, of at least one of the county's municipal fire departments, that is being threatened by the rising water levels. There is no immediate problem. However there is enough concern to give us a heads up to the idea that we may needed to aid with radio communications if the situation degrades seriously.

Currently SEC George Sabbi has the county in Normal alert mode, with the request that we stay aware of the impending situation. We will follow suit. Now would be a good time to check your Go-Kits and batteries and get everything up to full charge.

Remember: It's not If but When.

I work as a security guard at night and last night they put me at a business that is located on McBride Ave in Little Falls. This location is right next to the Passaic River and the river is now overflowing into the parking lot. The business is really scared of this next rainfall.

857. Essex EmComm Alert Status: Monitoring

Yahoo group: EC_EmComm
Date: 2011-03-09 22:47:43 UTC
From: Bob
Topic: 857 Message: 857

Essex County EmComm Leadership and Members:

Fairfield residents are evacuating due to the expectation of increased flooding.

Rivers in Little Falls have beached their banks.

Essex County is officially on Flood Watch.

NNJ SEC George Sabbi has raised the NNJ Alert Status to Monitoring.

We are facing significant rain fall in the next two days.

With all these factors in mind Essex EmComm is raising its Alert Status to Monitoring.

858. N.J. Gov. Christie declares State of Emergency

Yahoo group: EC_EmComm
Date: 2011-03-10 01:45:27 UTC
From: Bob
Topic: 858 Message: 858

N.J. Gov. Christie declares state of emergency for flood-prone areas as new storm nears Published: Wednesday, March 09, 2011, 8:19 PM TRENTON <http://www.nj.com/politics> ☐ From Trenton to Little Falls, government officials and emergency management workers are putting out alerts and getting equipment in place for potential flooding from the latest rain storm that is converging on the Garden State. Among the actions:

☐ Gov. Chris Christie declared a state of emergency today and called on the National Guard to help out in areas at risk of flooding.

☐ In Little Falls, the Office of Emergency Management distributed sandbags and evacuation information to residents living near the Passaic River.

☐ In Woodbridge, the mayor's office sent out alerts asking homeowners and business owners on flood-prone streets to move their cars to higher ground.

☐ In Lincoln Park and Pequannock, emergency officials are getting fire boats ready for possible rescues.

859. FW: Ham Radio operators wil be needed by Red Cross to assist in the disaster response.

Yahoo group: EC_EmComm

Cc: 'ed.pavlick'; 'Charles Maltbie'; jhr888@...
Subject: Ham Radio operators wil be needed by Red Cross to assist in the
disaster response.

All From the weather forecast, it is apparent that the Red Cross will
require ideally 6 radio operators to support disaster Assessment operations.

Ideally, the operator should come with their own mobile radio and magnetic
mount antenna although the chapter does own several radios configured for
this purpose.

We will probably be operating on either the Morris County OEM repeaters,
146.895 or 145.370

Or perhaps the Ramapo Mountain's 146.490 repeater

Red Cross radios are pre-programmed with at least these frequencies
http://www.arcsquared.org/Documents/NEW%20MOBILE%20RADIO%20LABEL%20updated.x
ls

And now to the most important question of when. Disaster Assessment begins
as the waters begin to recede and we can get into flooded areas. I believe
that the earliest that large scale operations would begin would be Sunday,
although some DA will happen on Friday. And it will in all likelihood
continue to next week.

Basically you will be communicating information to someone in the chapter
house at a computer who can then relay that information to the people who
are making maps of the nature and location of the damage. Until this is
done, we are unable to help flood victims so this is a very important
function.

If you or anyone in your organization has availability this weekend or into
next week, please contact me.

Thanks.

Our Alert Status is still Standing By

The Red Cross needs radio operators to support on going Disaster Assessment operations. It will in all likelihood continue into next week.

While there is no communications emergency and nothing heroic for us to do at the present; there is a possibility for some good experience. It presents the chance to work with another agency we need to interface with during times like these. There are moments that boredom could be a problem when responding to operations at a lower tension level. The upside is that there are many moments where more attention can be afforded to newer operators.

However unlikely, even if we did know all there is about emergency operations, we could always stand to gain a better understanding of the agencies that we may serve when full blown disaster strikes.

If you are available this week or into next weekend, please contact KC2RFC for possible deployment.

870. Cherry Blossom Run

Yahoo group: EC_EmComm
Date: 2011-03-29 19:37:34 UTC
From: Ray Linke
Topic: 870 Message: 870

In the "better late than never" category, Essex County Parks finally got around to asking for radio assistance for this year's Cherry Blossom Run being held at 10 am in Branch Brook Park on Sunday, April 10th.

I told them it was pretty short notice but that I would at least ask our group if there would be enough manpower to make it work. The magic number is seven people.

Please reply by return email if you are available and would like to participate. We will most likely be using the 447.875 MHz repeater.

883. National Terrorism Advisory System...

Yahoo group: EC_EmComm
Date: 2011-04-21 23:31:11 UTC
From: Frank
Topic: 883 Message: 883

Secretary Napolitano Announces Implementation of National Terrorism Advisory System

NEW YORK - Secretary of Homeland Security Janet Napolitano announced the implementation of the Department of Homeland Security's (DHS) National Terrorism Advisory System (NTAS) - a robust terrorism advisory system that provides timely information to the public about credible terrorist threats and replaces the former color-coded alert system.

The New Syetem has only 2 levels and replaces the previous 5 color levels....

· "Elevated Threat": Warns of a credible terrorist threat against the United States

· "Imminent Threat": Warns of a credible, specific, and impending terrorist threat against the United States

As part of the announcement, Secretary Napolitano will release a public guide outlining the new system to the American public, along with an example of an NTAS Alert that would be issued to the public if the government were to receive information about a specific or credible terrorist threat.

"The terrorist threat facing our country has evolved significantly over the past ten years, and in today's environment - more than ever - we know that the best security strategy is one that counts on the American public as a key partner in securing our country," said Secretary Napolitano. "The National Terrorism Advisory System, which was developed in close collaboration with our federal, state, local, tribal and private sector partners, will provide the American public with information about credible threats so that they can better protect themselves, their families, and their communities."

Under NTAS, DHS will coordinate with other federal entities to issue detailed alerts to the public when the federal government receives information about a credible terrorist threat.
NTAS alerts provide a concise summary of the potential threat including geographic region, mode of transportation, or critical infrastructure potentially affected by the threat, actions being taken to ensure public safety, as well as recommended steps that individuals, communities, business and governments can take to help prevent, mitigate or respond to a threat. NTAS Alerts will include a clear statement on the nature of the threat, which will be defined in one of two ways:

* "Elevated Threat": Warns of a credible terrorist threat against the United States * "Imminent Threat": Warns of a credible, specific,

and impending terrorist threat against the United States

Depending on the nature of the threat, alerts may be sent to law enforcement, distributed to affected areas of the private sector, or issued more broadly to the public through both official and social media channels.

DHS encourages citizens to follow NTAS Alerts for information about threats and take an active role in security by reporting suspicious activity to local law enforcement authorities.

Hello All EC Ecomm's

I found this alert in my mail thought it would be good for us here,,

---

Please begin your initial Situational Awareness on Hurricane IRENE. NWS forecasts are indicating that there is a potential for a direct impact from this system on the NNJ Section perhaps as early as late Sunday (8/28) or Monday (8/29)

The official National Hurricane Center Tracking Forecast is available here:
http://www.nhc.noaa.gov/archive/2011/graphics/al09/loop_5W.shtml

If the official forecasts continue to indicate IRENE will impact the NNJ Section, we will begin in the next 24 to 48 hours to increase the NNJ Alert Status Levels as noted here:
http://www.hudson.arrl.org/nnj/ares/

NNJ ARES Leadership has been monitoring this event since Sunday and is being kept directly informed by updates from the local NWS Forecast offices along with their other OEM and EmComm partners. We have also notified ARRL HQ and Leadership of our now state of Situational Awareness as per our SOB

Thank you in advance for your attention to this developing situation.

George Sabbi

935. Start Preparing NOW!

Yahoo group: EC_EmComm
Date: 2011-08-25 00:29:53 UTC
From: Bob
Topic: 935 Message: 935

All Radio Operators,

Over the next two days:

1) Check all alternate power sources and make sure they are fully charged.

2) Insure all battery operated light sources are functioning.

3) Test your radios. Put in those frequencies and repeater parameters you have intended to.

4) Be sure your HT's are fully charged.

5) Consider taking down antennas with higher wind resistance, rather than losing them in high winds.

6) Test your sump pump if you have one.

7) Secure outdoor furniture.

8) Put aside some dry goods.

9) As the storm approaches watch this site and your email for activations and status announcements.

10) Watch the TV and internet weather reports.

11) Touch base with your local EC.

12) When the storm begins (if you haven't already) turn on your radio and monitor WA2JSB 146.415 for alerts or nets.

These are some ideas that you may have already thought of. You probably have more ideas of your own. Please point them out on this forum. It's not just for "official" announcements. It is also here for your discussions. Don't be shy.

Essex County EmComm,

Our Alert Status is now raised to Monitoring.

I know many of you have prepared for this situation over the last few days. Please stay safe and keep your family together. The next 24 hours may prove to be an unwelcome experience. With the right attitude and preparation we will weather this well. I will be manning one of two shelters West Orange has set up today. I will be reachable by radio, cell phone, text or email conditions permitting. Please feel free to contact me if you need to. Essex County is setting up a shelter at the arena. Please join us on WA2JSB repeater tonight when the net begins. EC's and EC EmComm officers start the net prior to any official announcement if needed.

Stay safe, stay calm and stay in touch.

Bob Crifasi KC2RFC

941. FLOOD WARNING

Yahoo group: EC_EmComm
Date: 2011-08-28 02:28:21 UTC
From: Frank
Topic: 941 Message: 941

THE NATL WEATHER SVC IN UPTON NY HAS ISSUED A

* FLOOD WARNING FOR URBAN AREAS & SMALL STREAMS IN.
HUDSON COUNTY IN NE NJ.
BERGEN COUNTY IN NE NJ.
ESSEX COUNTY IN NE NJ.
UNION COUNTY IN NE NJ.
PASSAIC COUNTY IN NE NJ.

* UNTIL 245 PM EDT SUNDAY

* AT 848 PM EDT.BANDS OF HEAVY RAIN CONTINUE TO CIRCULATE
ACROSS NE NJ. SO FAR UP TO ONE INCH OF RAINFALL HAS
FALLEN ACROSS THE WARNING AREA.& UP TO 8 INCHES OF RAINFALL IS
EXPECTED THROUGH SUN AFTERNOON.

EXCESSIVE RUNOFF FROM HEAVY RAINFALL WILL CAUSE ELEVATED LEVELS ON
SMALL CREEKS & STREAMS & PONDING OF WATER IN URBAN
AREAS, HIGHWAYS, STREETS & UNDERPASSES AS WELL AS OTHER POOR
DRAINAGE AREAS & LOW LYING SPOTS.

PRECAUTIONARY/PREPAREDNESS ACTIONS.

DO NOT DRIVE YOUR VEHICLE INTO AREAS WHERE THE WATER COVERS THE
ROADWAY. THE WATER DEPTH MAY BE TOO GREAT TO ALLOW YOUR CAR TO CROSS
SAFELY. MOVE TO HIGHER GROUND. WHEN ENCOUNTERING FLOODED ROADS, MAKE
THE SMART CHOICE. TURN AROUND. DON'T DROWN.

A FLOOD WARNING MEANS FLOODING IS OCCURRING OR IS IMMINENT. MOST
FLOOD RELATED DEATHS OCCUR IN AUTOMOBILES. DO NOT ATTEMPT TO CROSS
WATER COVERED BRIDGES, DIPS, OR LOW WATER CROSSINGS. NEVER TRY TO
CROSS A FLOWING STREAM, EVEN A SMALL ONE ON FOOT. TO ESCAPE RISING
WATER MOVE UP TO HIGHER GROUND.

TO REPORT FLOODING, HAVE THE NEAREST LAW ENFORCEMENT AGENCY RELAY
YOUR REPORT TO THE NATL WEATHER SVC FORECAST OFFICE.

951. A message from the CDC

Yahoo group: EC_EmComm
Date: 2011-09-09 12:49:27 UTC
From: Bob
Topic: 951 Message: 951

In anticipation to today's release of the movie Contagion, please note the communication below from the Centers for Disease Control and Prevention. This information includes talking points on the importance of public health in preparing for potential health emergencies. It also provides a website created by the CDC Foundation to help separate fact from fiction and to highlight the CDC's role in preparedness and response.

_____

Dear Colleague,

On September 9, Warner Brothers will be releasing the movie Contagion, a fictional drama that portrays CDC and other U.S. and international partners responding to an emerging infectious disease outbreak. We are reaching out to you in an effort to take advantage of this opportunity to provide accurate and potentially life-saving information to the public about how to prepare for a public health emergency.

When asked to respond to the inevitable question about the plot of the movie, "Could this really happen?" CDC is compelled to say, "Not only could it happen, CDC scientists are working 24/7 to find out if it's happening right now." The following websites are being highlighted to enhance your awareness, particularly during September (National Preparedness Month).

* CDC Preparedness Information http://emergency.cdc.gov/
<http://emergency.cdc.gov/>
* Emergency Preparedness for Individuals
http://emergency.cdc.gov/preparedness/
<http://emergency.cdc.gov/preparedness/>
* Flu Prevention Information
http://www.cdc.gov/flu/protect/preventing.htm
<http://www.cdc.gov/flu/protect/preventing.htm>

In addition, I hope the following information about CDC's role in emergency preparedness and response is helpful.

* CDC works with state and local health departments across the United States, as well as international partners around the world, to recognize disease patterns and improve the public health community's ability to respond to health threats.
* CDC and its partners play key roles in homeland security by maintaining the ability to detect and respond to outbreaks, as well as natural and man-made disasters, at home and abroad.
* CDC is a key source of evidence for health action ☐ monitoring

health, informing clinical and policy decision-making, and providing individuals the information they need to take responsibility for their own health.
* CDC supports state and local public health partners with training and guidance to ensure nationwide lab capacity for detecting and responding to health threats, as well as the capacity to address key risk factors leading to premature death, injury, and disease.
* CDC recognizes that state and local public health departments are the first responders when disease threats occur, and it is their initial investigations that help CDC quickly assist them.

With a sense of urgency do we take this opportunity to educate others about how CDC and the public health community work to keep America safe and how they can join in by being prepared themselves. To learn more about Contagion and how CDC protects America 24/7, visit the following sites:

* Contagion Official Website
http://contagionmovie.warnerbros.com/index.html
<http://contagionmovie.warnerbros.com/index.html> - Directed by Steven Soderbergh, the movie stars Kate Winslet, Matt Damon, Jude Law, Marion Cotillard, Gwyneth Paltrow, and Lawrence Fishburne
* Contagion and CDC
http://www.cdcfoundation.org/content/how-cdc-saves-lives-controlling-rea\
l-global-disease-outbreaks
<http://www.cdcfoundation.org/content/how-cdc-saves-lives-controlling-re\
al-global-disease-outbreaks> - A website created by the CDC Foundation to help separate fact from fiction and to highlight CDC's role in preparedness and response
* CDC 24/7 http://www.cdc.gov/24-7/ <http://www.cdc.gov/24-7/> - A CDC website that includes information you may find useful on how public health protects Americans from outbreaks

Thank you for your help in spreading the word about the critically important role emergency preparedness plays in protecting the health of people in this country and around the world.

Sincerely,
Judith A. Monroe, MD, FAAFP
Deputy Director, Centers for Disease Control and Prevention
Director, Office for State, Tribal, Local and Territorial Support

971. Emergency Alert System (EAS) Test

Yahoo group: EC_EmComm
Date: 2011-11-04 14:37:43 UTC
From: Bob
Topic: 971 Message: 971

Essex EmComm Radio operators,

This is not specifically amateur radio, however please
be aware of the test described below. There are many people that are not
emergency comms savvy. Please help set them straight if you see that
they are confused, or worse worried, by the test. Also monitor any or
all of the methods mentioned and email me with your impressions of the
test.

On November 9, the Federal Emergency Management Agency (FEMA) will
conduct the first ever simultaneous test of the nation's Emergency
Alert System (EAS) at 2 p.m. The test will last for 30 seconds, during
which time an alert tone will precede a message announcing the test on
broadcast media outlets, including radio, TV and, National Weather
Service alert radios. The EAS is a national warning system to rapidly
and widely broadcast emergency information. It is often used during
times of severe weather and other emergencies, but has never been
activated nationwide.

And you as well, Frank

From: EC_EmComm@yahoogroups.com [mailto:EC_EmComm@yahoogroups.com] On Behalf Of Frank
Sent: Thursday, November 24, 2011 8:17 AM
To: EC_EmComm@yahoogroups.com
Subject: [EC_EmComm] Happy Thanksgiving...

Once again this year, we get the opportunity to offer our appreciation and thanks or what our forefathers made possible, more than 235 years ago.

Thanksgiving, one of Americas greatest holidays is upon us. It's a time for gathering with our family and friends and for celebrating the gifts that God has bestowed upon us... our lives, our freedom and others in our lives.

So, from my family to all of you and your families, Happy Thanksgiving to you all...

Frank, Peggy and Anthony...

Date: 2011-12-07 12:44:49 UTC
From: Frank
Topic: 980 Message: 980

...HEAVY RAIN POSSIBLE THROUGH TONIGHT...

WESTERN PASSAIC-EASTERN PASSAIC-HUDSON-WESTERN BERGEN-
EASTERN BERGEN-WESTERN ESSEX-EASTERN ESSEX-WESTERN UNION-
EASTERN UNION-
WED DEC 7 2011

...FLOOD WATCH IN EFFECT FROM 10 AM EST THIS MORNING THROUGH LATE
TONIGHT...

THE NATIONAL WEATHER SERVICE IN UPTON HAS ISSUED A

* FLOOD WATCH FOR A PORTION OF NORTHEAST NEW JERSEY...INCLUDING
THE FOLLOWING AREAS...EASTERN BERGEN...EASTERN ESSEX...EASTERN
PASSAIC...EASTERN UNION...HUDSON...WESTERN BERGEN...WESTERN
ESSEX...WESTERN PASSAIC AND WESTERN UNION.

* FROM 10 AM EST THIS MORNING THROUGH LATE TONIGHT.

* AN AREA OF LOW PRESSURE WILL PASS JUST SOUTHEAST OF THE REGION
LATER THIS AFTERNOON AND TONIGHT...BRINGING A PERIOD OF MODERATE
TO LOCALLY HEAVY RAINFALL. RAINFALL AMOUNTS WILL GENERALLY RANGE
FROM TWO TO TWO AND ONE HALF INCHES...WITH LOCALLY HIGHER
AMOUNTS POSSIBLE. THE HEAVIEST RAINFALL IS EXPECTED TO FALL
DURING THE FIRST HALF OF TONIGHT.

* THE RAIN MAY LEAD TO FLOODING OF SMALL STREAMS...POOR DRAINAGE
AND URBAN AREAS...AND ROADWAYS. THE LARGER RIVERS ARE NOT
EXPECTED TO REACH FLOOD STAGE AT THIS TIME.

PRECAUTIONARY/PREPAREDNESS ACTIONS...

A FLOOD WATCH MEANS THERE IS A POTENTIAL FOR FLOODING BASED ON
CURRENT FORECASTS. YOU SHOULD MONITOR LATER FORECASTS AND BE
ALERT FOR POSSIBLE FLOOD WARNINGS. THOSE LIVING IN AREAS PRONE TO
FLOODING SHOULD BE PREPARED TO TAKE ACTION SHOULD FLOODING
DEVELOP.

983. Let□s get the year started right !!

Yahoo group: EC_EmComm
Date: 2011-12-25 03:02:26 UTC
From: Bob
Topic: 983 Message: 983

Happy Holiday and Happy New Year!

Our first Net of the year is coming up on Tuesday the 3rd at 8:00 PM.

Our first Quarterly Meeting is on Saturday the 7th at 9:00 AM.

Let's get the year started right and make it a big one. Please get
on the net and plan to attend the meeting. We have a lot cooking in the
county and this will be an important year. There are many issues to
discuss and many tasks to work on. It looks like this will be a pivotal
time for us. If you have any questions or just want to talk, contact me
by email or phone.

Bob Crifasi KC2RFC

Essex County Emergency Communications Coordinator (ARES)

984. Our first Net and Quarterly Meeting of 2012

Yahoo group: EC_EmComm
Date: 2011-12-26 20:28:57 UTC
From: Bob
Topic: 984 Message: 984

Hey folks,

Don't forget Tuesday January 3rd at 8:00PM WA2JSB
repeater. It will be our first Net of 2012. Let's make it a good
start to the New Year for Essex County Emergency Communications. I will
be monitoring the repeater most of the day today and as much as I can
between now and the Net. Any one that wants to do a radio check or talk
EmComm, get on and give a shout. Plan to be at our first Quarterly
meeting of the year on Saturday January 7th at 9:00AM at the West Orange
First Aid Squad HQ building on Mountain Place in West Orange. Remind
your fellow radio operators about the Net and bring them with you to our
Quarterly Meeting the first weekend of 2012.

992. Winter Weather Advisory now in effect...

Yahoo group: EC_EmComm
Date: 2012-01-21 10:33:16 UTC
From: Frank
Topic: 992 Message: 992

... Winter Weather Advisory remains in effect until 4 PM EST this
afternoon...

* locations... Northeast & Central New Jersey... and most of western
Long Island.

* Hazard types... mainly snow. Precipitation should mix with sleet
around midday into the early afternoon before ending.

* Accumulations... 4 to 5 inches of snow... topped a by light
coating of sleet mainly in the lower boroughs of New York City
and along the South Shore of western Long Island. Some spots
along the North Shore of western Long Island could receive up to
6 inches of accumulation.

* Winds... northeast 5 to 15 mph with gusts up to 25 mph.

* Temperatures... around 30.

* Visibilities... one half mile at times.

* Timing... snow will begin before daybreak. The heaviest snow
should occur from about 6 am until noon... with snowfall rates
of one half to one inch per hour.

* Impacts... travel difficulties due to snow covered roads and
limited visibilities.

Precautionary/preparedness actions...

A Winter Weather Advisory for snow means that periods of snow
will cause primarily travel difficulties. Be prepared for snow
covered roads and limited visibilities... and use caution while
driving.

994. Sit in Net Control

Yahoo group: EC_EmComm
Date: 2012-02-05 03:53:39 UTC
From: kc2sou
Topic: 994 Message: 994

To all members,

I would like to announce some good news for me in my personal life.
Because of the recent change in the price of homes, I was able to purchase my first home. This, to me, is great news! With this good news,
I must now get ready to move in. So I will not be able to be net control for at least a short time. Bob,KC2RFC, has agreed to be net control for period of time. I would ask all members if they could help and be net control until I can set up my station and get back on the air.

There is no guarantee that I can hit the machine from my new location. I will now be located in lower Sussex County New Jersey. The good part is my elevation will be approximately 800 feet above sea level. I am hoping, if I put my beam on my roof vertically polarized, I will be able to hit the West Orange machine. Either way this will take some time.

I would ask all Ecomm members if they could help or even be net control
that would be a great help. Again I am hoping I can resume net control responsibilities within the next two months. It would be great if someone else could take this job so, Bob does not have to. If anybody, or even a few would like to take turns as net control, that would be a great help. I think this would also help us as an Ecomm group. Sooner or later we never know where we may find ourselves. You may needed ton be net control.

If anybody could help, or several people could fill in that would be a great help. Please contact me Ron B.(KC2SOU) or Bob C.(KC2RFC)
as soon as you can. I would like to thank you all for reading this. And I am hoping to hear from some of the group soon.

Thanks again to all 73! Ron Boucher net control.

1004. Freeze Warning..

Yahoo group: EC_EmComm
Date: 2012-03-30 04:14:48 UTC
From: Frank
Topic: 1004 Message: 1004

FREEZE WARNING REMAINS IN EFFECT FROM 3 AM TO 9 AM EDT
FRIDAY.

* TEMPS.IN THE LWR 30S WITH SOME UPPER 20S IN THE
NORMALLY COLDER LOCATIONS INCLUDING THE PINE BARRENS IN NEW
JERSEY.

* IMPACTS.DUE TO AN UNUSUALLY WARM WINTER & EARLY SPRING.
THE GROWING SEASON HAS BEGUN AROUND THE REGION. ANY VEGETATION
SUSCEPTIBLE TO FREEZING TEMPS OVER A PERIOD OF THREE OR
MORE HRS WOULD BE AT RISK.

PRECAUTIONARY/PREPAREDNESS ACTIONS.

A FREEZE WARNING MEANS SUB-FREEZING TEMPS ARE IMMINENT OR
HIGHLY LIKELY. THESE CONDITIONS WILL KILL CROPS & OTHER
SENSITIVE VEGETATION. IF POSSIBLE BRING TEMP SENSITIVE
VEGETATION INDOORS & PROVIDE PROTECTIVE COVERING FOR OTHERS.

1006. Cherry Blossom Run

Yahoo group: EC_EmComm
Date: 2012-04-02 16:35:50 UTC
From: Ray Linke
Topic: 870 Message: 1006

April 15th is the Annual Essex County Cherry Blossom Run and we have been asked to provide communications again this year.

For those of you who are new, we meet at the Branch Brook Park Field House in Belleville (across from Clara Maas Hospital) at 8:30 am. Our job is to monitor the race course with the split timers at each mile marker and the turn-around point. We are usually finished just before 12 noon. Also, for those who enjoy breakfast, we meet at the State Street Diner in Bloomfield at 7:00 am.

We will be using the 447.875 MHz repeater in West Orange which has excellent coverage over the whole park.

Please let me know by email if you are able to join us. Race shirts will be provided so I will need your size (s,m,l,xl) and also if you would like a parking pass to be able to park your car inside the park.

Thanks

Ray, K2DEE

1008. EC EmComm Members and Leadership

Yahoo group: EC_EmComm
Date: 2012-04-03 13:46:44 UTC
From: Bob
Topic: 1008 Message: 1008

EC EmComm Members and Leadership,

In the next couple of months we have two significant events coming up.

The Cherry Blossom Run in Branch Brook Park

And

The Race for the Cure being organized by the Susan G. Komen organization

And Head Quartered at the South Mountain Reservation

Both of these events give us the opportunity to interface with the County Sheriff's Department and other supporting agencies. We need to be sure of our man power and be fully prepared. As always Ray (K2DEE) is in charge of the Cherry Blossom Run and I urge everyone to follow his instructions and requests. We are gathering all the logistical information on the Race for the Cure so that we may prepare and test in advance.

Please take part in the Monthly Net tonight.

Also

Make it a priority to attend our Quarterly Meeting on Saturday morning so we can get started planning. The Race for the Cure will be a first for us. Both are very large events and well attended. We need to perform well for both.

When is the race for the cure? I will be returnining to NJ on April 26th.
Last Sunday I helped with The Tour for the Cure with 14 hams from the Sarasota Emergency Radio Club.
Two weeks ago we also helped The Sarasota half Marathon also with 14 hams.
I would like to help if I am in town.

1013. Re: [EC_EmComm] EC EmComm Members and Leadership

Yahoo group: EC_EmComm
Date: 2012-04-10 13:22:01 UTC
From: Matt Dragon
Topic: 1008 Message: 1013

We've gotten more details about the Race for the Cure that we wanted to share. I want to emphasize the scope of this event. The numbers are large enough that we really do need anyone who is able to help to participate. This is a great opportunity for the group and we appreciate everyone who can make it. Ray has gotten coverage for the Cherry Blossom Run, so if you are looking for an event to participate in this is a good opportunity.

1. We will need between 12 and 16 operators to support this event.
2. We are being asked to shadow 8 leadership positions for the organization/race as well as staffing 7 fixed post locations.
3. This event will run between approximately 6am and noon.
4. There will be a large media presence at the event and this presents a good opportunity to get the Essex County EmComm name out there and get noticed.
5. The Essex County Sheriff's Department will be involved since the Race runs through South Mountain Reservation which also represents a great opportunity for the group to demonstrate what we can do and make a good impression.

Please reply to me mdragon@... or 908-303-3890 if you can work this event. Please also share this information with any other HAMs who may not be on this list or any other radio clubs or other groups you may participate in. Even if you can't make the event you may be able to help us connect with operators who can.

Let me know if you have any questions and thank you to anyone who can assist with the event or share the request for operators.
Matt

1016. Operators still needed, Sunday, May 6th, West Orange NJ

Yahoo group: EC_EmComm
Date: 2012-04-25 19:57:16 UTC
From: Matt Dragon
Topic: 1016 Message: 1016

We are still in need of several additional operators for this event. Any help is greatly appreciated. Even if you cannot attend please try to think of clubs or other groups you might be able to share the request with.

Some details:
Sunday, May 6th
Approximately 7am to noon
West Orange, NJ
HAMs are needed to shadow key race leadership and relay information on their behalf

Thanks,
Matt

Matt,

I had already confirmed with Bob but I have myself and one other member from the Roseland Club available to help with the Sunday May 6th event. The Township of East Hanover passed a resolution at the last town council meeting to support the event So you will have me as both an Operator and an OEM participant.

73's.

Mark A. Curcio
OEM Coordinator/RACES Officer
East Hanover Township NJ
973-216-1982

1022. Fwd: FW: WALK with us. RUN with us. HAVE FUN with us.

Yahoo group: EC_EmComm
Date: 2012-04-27 21:27:23 UTC
From: Matt Dragon
Topic: 1022 Message: 1022

In case any of you are on the fence about helping out May 6th. This is a major event with the potential a lot of exposure for Essex County EmComm and your individual clubs by helping out. I'm forwarding the marketing email below just to give everyone an idea of the scope of this event and hopefully convince a few more of you to help us out. This is not a "race deployment" of calling in times and mile posts, it will be much more providing communications to coordinate a very large multi-agency/group event with a command structure that closely mirrors ICS (without Komen's leadership even knowing what ICS was).

Thanks,
Matt

1025. Fwd: [nnjares] Info on SKYWARN Spotter Training Classes in the NNJ Section

Yahoo group: EC_EmComm
Date: 2012-05-01 18:34:19 UTC
From: Matt Dragon
Topic: 1025 Message: 1025

NWS New York has just added a Class in the NNJ Section (Bergen County). If you or anyone needs to re-train or to become first time trained as an NWS SKYWARN Spotter, there is no requirement that a person only attend a Class in their County of Residence...or even within the County Warning Area of their residence. All Spotters (both with NWS New York and NWS Mt Holly) are required to re-train at least once every 3 years!)

Info on the Class in Bergen County NJ is:

May 15 2012
7:00 Pm to 9:30 PM
Bergen County Law and Public Service Institute
281 Campgaw Road
Mahwah, NJ
Maps and Driving Directions at: http://g.co/maps/ka7gx and http://www.co.bergen.nj.us/bclpsi/directions.html

PRE-REGISTRATION IS REQUIRED and can be done online at: http://www.erh.noaa.gov/er/okx/Skywarn/spottertraining2012.html

And as a reminder...the SKYWARN Class on May 9 in Morris County NJ has been filled and no additional registrations are being taken at this time...so if you or someone you know needs to become trained or to re-train...the Bergen County Class is the only one currently on the NWS schedules in the NNJ Section . More info on NWS Mt Holly taught classes is at: http://www.erh.noaa.gov/er/phi/skywarn/training.html#sched

1026. SGK Run Sunday May 6

Yahoo group: EC_EmComm
Date: 2012-05-02 15:00:01 UTC
From: Bob
Topic: 1026 Message: 1026

Good Morning,

The meeting last night with SGK went well. They changed the scheme from combined shadow/ fixed radio positions to straight fixed positions. Their "VIPs" will now be assigned to fixed zones. The team we have assembled can be assigned and will be able to cover the new situation as soon as we know what it actually is. We have an onsite meeting scheduled for Saturday at 3:00PM and they want our comms team onsite Sunday morning by 6:00am not 6:30-7:00 am as they indicated previously. The comms were the only thing that was still a snag last year and we are providing the stimulus for them to rethink their strategy. The rest of the event is very well planned so I have hope that it will all fall into place and will all run smoothly in the end. They have done this before and have the rest of it pretty well debugged.

Please get the meeting time and other pertinent info out to anyone that will be working the event with you. Everyone is invited to the Saturday walk through at 3:00pm but this is only necessary for leadership. Everyone needs to be on site by 6:00am Sunday because County Sheriff's Dept will be shutting down vehicular access to parking at the Arena from 6:00 on. We may be able to get you in to park later; but you will probably have to park at the prearranged area at the Livingston Mall and take the event shuttle bus to the Arena.

We will be operating the event on the 70cm (440) repeater. The 70 cm repeater's output frequency is 447.875 Mhz with an input of 442.875 Mhz. The PL is 156.7 Hz. We will use 446.000 simplex as a talk-in frequency.

Roseland Amateur Radio Club will be using the 2M repeater for their event. Please do not use it to try to contact anyone for the SGK event (147.415/146.415).

If you have any questions please feel free to contact me directly.

Topic: 1026 Message: 1027

Bob,

Did you get the NARSS Yahoo approval in your e mail? You can post to the site if you want to.

Frank

In a message dated 5/2/2012 11:00:10 A.M. Eastern Daylight Time, CrifasiRF@... writes:

Good Morning,
The meeting last night with SGK went well. They changed the scheme from combined shadow/ fixed radio positions to straight fixed positions. Their "VIPs" will now be assigned to fixed zones. The team we have assembled can be assigned and will be able to cover the new situation as soon as we know what it actually is. We have an onsite meeting scheduled for Saturday at 3:00PM and they want our comms team onsite Sunday morning by 6:00am not 6:30-7:00 am as they indicated previously. The comms were the only thing that was still a snag last year and we are providing the stimulus for them to rethink their strategy. The rest of the event is very well planned so I have hope that it will all fall into place and will all run smoothly in the end. They have done this before and have the rest of it pretty well debugged.
Please get the meeting time and other pertinent info out to anyone that will be working the event with you. Everyone is invited to the Saturday walk through at 3:00pm but this is only necessary for leadership. Everyone needs to be on site by 6:00am Sunday because County Sheriff's Dept will be shutting down vehicular access to parking at the Arena from 6:00 on. We may be able to get you in to park later; but you will probably have to park at the prearranged area at the Livingston Mall and take the event shuttle bus to the Arena.
We will be operating the event on the 70cm (440) repeater. The 70 cm repeater's output frequency is 447.875 Mhz with an input of 442.875 Mhz. The PL is 156.7 Hz. We will use 446.000 simplex as a talk-in frequency.
Roseland Amateur Radio Club will be using the 2M repeater for their event. Please do not use it to try to contact anyone for the SGK event (147.415/146.415).
If you have any questions please feel free to contact me directly.

Essex County Emergency Communications Operators:

The Susan G. Komen Race for the Cure went off well. Fantastic job today. Thank you all for your good work.

Thanks to Nutley Amateur Radio Society and Roseland Amateur Radio Club for their help today. We were able come together to form the manpower of Essex County EmComm.

Please let you clubs know they were well represented by your efforts today.

In addition West Orange CERT contributed in a very significant way to make our involvement a real success. Thank you to each of you and I hope this was just the beginning of our collaboration.

Bob KC2RFC

1037. HEAT ADVISORY

Yahoo group: EC_EmComm
Date: 2012-06-21 14:02:59 UTC
From: Frank
Topic: 1037 Message: 1037

HEAT ADVISORY REMAINS IN EFFECT UNTIL 8 PM EDT THIS EVENING.

* HEAT INDEX VALUES.98 TO 107 DEGREES.

* TEMPS.HIGHS IN THE UPPER 90S THIS AFTERNOON.

* IMPACTS.THE WORST WOULD BE FELT BY THOSE WHO LIVE AND/OR
WORK IN THE MORE URBAN AREAS & AWAY FROM THE IMMEDIATE
COAST. THOSE WHO ARE AT A GREATER RISK INCLUDE THE ELDERLY.
THE INFIRM. CHILDREN & ANYONE WITHOUT AIR CONDITIONING.

PRECAUTIONARY/PREPAREDNESS ACTIONS.

A HEAT ADVISORY MEANS THAT A PERIOD OF HOT TEMPS IS
EXPECTED. THE COMBINATION OF HOT TEMPS & HIGH HUMIDITY
WILL COMBINE TO CREATE A SITUATION IN WHICH HEAT ILLNESSES ARE
POSSIBLE. DRINK PLENTY OF FLUIDS. STAY IN AN AIR-CONDITIONED
ROOM. STAY OUT OF THE SUN. & CHECK UP ON RELATIVES AND
NEIGHBORS.

TAKE EXTRA PRECAUTIONS IF YOU WORK OR SPEND TIME OUTSIDE. WHEN
POSSIBLE. RESCHEDULE STRENUOUS ACTIVITY TO EARLY MORNING OR
EVENING. KNOW THE SIGNS & SYMPTOMS OF HEAT EXHAUSTION & HEAT
STROKE. WEAR LIGHT WEIGHT & LOOSE FITTING CLOTHING WHEN
POSSIBLE & DRINK PLENTY OF WATER.

TO REDUCE RISK DURING OUTDOOR WORK. THE OCCUPATIONAL SAFETY AND
HEALTH ADMINISTRATION RECOMMENDS SCHEDULING FREQUENT REST BREAKS
IN SHADED OR AIR CONDITIONED ENVIRONMENTS. ANYONE OVERCOME BY
HEAT SHOULD BE MOVED TO A COOL & SHADED LOCATION. HEAT STROKE
IS AN EMERGENCY - CALL 9 1 1.

1038. If anyone is around their radio Tomorrow, Saturday around 10am on 147.415

Yahoo group: EC_EmComm
Date: 2012-06-22 21:55:11 UTC
From: Matt Dragon
Topic: 1038 Message: 1038

Mark, KC2OWQ, is running a drill as part of his role in East Hanover OEM. I'll be on site observing the drill, but he would like to check in via HAM radio to exercise that part his response plan. He will try and raise someone on the WA2JSB 2m repeater 147.415.

So if anyone is around tomorrow morning around 10am and can respond when Mark reaches out on the repeater I'd appreciate it and I know he would appreciate it as well.

Thanks in advance,
Matt

1051. Cancelling the Net this month

Yahoo group: EC_EmComm
Date: 2012-09-01 14:24:13 UTC
From: Matt Dragon
Topic: 1051 Message: 1051

We only had one check in last month and a lot of people are still wrapping up their summer, so we are cancelling the Net for September, which would have been on this coming Tuesday, Sept. 4th.
We are looking for someone who can do Net Control now that KC2SOU's new location doesn't allow him to get into the machine. If you're interested please let me know.
We will be making a push in the Fall to get people back into the swing of things, so we appreciate anyone who can make the Nets moving forward. If you have any thoughts about increasing membership and/or participation, clubs who are looking for a speaker topic, or any general feedback please let me know.

Thanks,
Matt, KD2ARL

*PUBLIC SEVERE WEATHER OUTLOOK
NWS STORM PREDICTION CENTER NORMAN OK
0510 AM CDT SAT SEP 08 2012
*
...SIGNIFICANT SEVERE THUNDERSTORMS EXPECTED ACROSS PORTIONS OF THE LOWER GREAT LAKES...NEW ENGLAND AND MID-ATLANTIC STATES THIS AFTERNOON INTO TONIGHT...

THE NWS STORM PREDICTION CENTER IN NORMAN OK IS FORECASTING THE DEVELOPMENT OF WIDESPREAD DAMAGING WINDS AND A FEW TORNADOES OVER PARTS OF THE LOWER GREAT LAKES...NEW ENGLAND AND MID-ATLANTIC STATES THIS AFTERNOON INTO TONIGHT.

*THE AREAS MOST LIKELY TO EXPERIENCE THIS ACTIVITY INCLUDE
*
WESTERN AND CENTRAL CONNECTICUT
NORTHERN DELAWARE
WESTERN AND CENTRAL MASSACHUSETTS
NORTHEASTERN MARYLAND
SOUTHWESTERN NEW HAMPSHIRE
* NEW JERSEY
* CENTRAL AND EASTERN NEW YORK
EASTERN PENNSYLVANIA
CENTRAL AND SOUTHERN VERMONT

ELSEWHERE...SEVERE STORMS ARE ALSO POSSIBLE FROM THE NORTHEASTERN UNITED STATES INTO THE CAROLINAS

A STRONG UPPER-LEVEL WEATHER SYSTEM WILL MOVE INTO THE NORTHEASTERN UNITED STATES TODAY INTERACTING WITH A MOIST AND UNSTABLE AIRMASS. *THUNDERSTORMS WILL DEVELOP ALONG AND AHEAD OF A FAST MOVING COLD FRONT WITH SQUALL-LINE DEVELOPMENT TAKING PLACE THIS AFTERNOON. AS THE LINE INTENSIFIES...THE THREAT FOR WIDESPREAD WIND DAMAGE AND TORNADOES WILL INCREASE AS THE LINE MOVES INTO THE STRONGER INSTABILITY ACROSS THE MODERATE RISK AREA FROM THIS AFTERNOON INTO TONIGHT. DAMAGING WIND GUSTS WILL BE COMMON ACROSS THE MODERATE RISK AREA AND SOME LOCATIONS COULD RECEIVE WIND GUSTS OF OVER 70 MPH.

*STATE AND LOCAL EMERGENCY MANAGERS ARE MONITORING THIS DEVELOPING SITUATION. THOSE IN THE THREATENED AREA ARE URGED TO REVIEW SEVERE WEATHER SAFETY RULES AND TO LISTEN TO RADIO...TELEVISION...AND NOAA WEATHER RADIO FOR POSSIBLE WATCHES...WARNINGS...AND STATEMENTS LATER TODAY.

Good morning, ****

** **

The following weather information has been provided to the Morris County
Office of Emergency Management. This information is being provided to you
for situational awareness.****

* *

SEVERE THREAT: VIOLENT & SEVERE T-STORMS LATE PM / EVENING

TIME FRAME: MAIN THREAT 6 – 8 PM (ISOLATED T-STORMS 12 – 6 PM)

A POTENTIALLY DANGEROUS SITUATION IS DEVELOPING FOR LATE THIS AFTERNOON /
EVENING. A POWERFUL****

COLD FRONT IS EXPECTED TO CROSS THE REGION AND INTERACT WITH A WARM, HUMID AND VERY****

UNSTABLE ENVIRONMENT. AS A RESULT, POP-UP SHOWERS AND T-STORMS WILL BE POSSIBLE ANY TIME****

AFTER NOON TODAY. ALTHOUGH THESE WILL BE HIGHLY ISOLATED IN NATURE, SOME OF THEM COULD BE****

STRONG TO SEVERE. THE MAIN THREAT, HOWEVER, WILL OCCUR LATER THIS EVENING, AS A LINE OF VIOLENT****

AND SEVERE T-STORMS IS EXPECTED TO CROSS THE AREA. THESE WILL LIKELY BE ACCOMPANIED BY****

EXCESSIVE CLOUD TO GROUND LIGHTNING, ALONG WITH HEAVY DOWNPOURS AND DAMAGING WINDS****

(POSSIBLY GUSTING 60 - 70+ MPH). A FEW ISOLATED TORNADOES ARE ALSO POSSIBLE. AREAS OF MODERATEHEAVY****

RAIN WILL CONTINUE BEHIND THE MAIN LINE OF T-STORMS FOR AN ADDITIONAL HOUR OR TWO.****

AFTER THAT, THE RAIN WILL QUICKLY TAPER OFF, WITH PARTIAL CLEARING EXPECTED AFTER MIDNIGHT.****

LIKELIHOOD OF OCCURRENCE

SHORT TERM FORECAST

TODAY

Areas of low clouds, fog and a few showers early on give way to a

few breaks of late-morning/midday sun. Isolated pop-up t-storms

developing after noon, with a line of severe t-storms possible

between 6-8 pm. Main threats: damaging winds/excessive lighting.

Highs: Mid 80’s

TONIGHT

T-storms, followed by an area of moderate to heavy rain continue

through late evening, then tapering off around midnight.

Continued breezy, with partial clearing towards daybreak.

Lows: Near 60

*SUNDAY **Partly sunny skies mix with afternoon cloudy intervals.*

Otherwise, cooler and much less humid.

*Highs: 75 – 80***

351 PM EDT SAT SEP 8 2012

THE NATIONAL WEATHER SERVICE IN UPTON NY HAS ISSUED A

* SEVERE THUNDERSTORM WARNING FOR...
PASSAIC COUNTY IN NORTHEAST NEW JERSEY...
UNION COUNTY IN NORTHEAST NEW JERSEY...
BERGEN COUNTY IN NORTHEAST NEW JERSEY...
ESSEX COUNTY IN NORTHEAST NEW JERSEY...
RICHMOND (STATEN ISLAND) COUNTY IN SOUTHEAST NEW YORK...
HUDSON COUNTY IN NORTHEAST NEW JERSEY...
ROCKLAND COUNTY IN SOUTHEAST NEW YORK...
SOUTHEASTERN ORANGE COUNTY IN SOUTHEAST NEW YORK...

* UNTIL 515 PM EDT...

* AT 345 PM EDT...NATIONAL WEATHER SERVICE DOPPLER RADAR INDICATED A
LINE OF SEVERE THUNDERSTORMS CAPABLE OF PRODUCING DAMAGING WINDS IN
EXCESS OF 60 MPH. THESE STORMS WERE LOCATED ALONG A LINE EXTENDING
FROM 46 MILES WEST OF WEST MILFORD TO 53 MILES WEST OF PLAINFIELD
TO 48 MILES WEST OF PLAINFIELD TO 67 MILES SOUTHWEST OF
PLAINFIELD...OR ALONG A LINE EXTENDING FROM 33 MILES WEST OF
HOPATCONG TO 42 MILES WEST OF SUCCASUNNA-KENVIL TO 32 MILES
NORTHWEST OF EWING TO 39 MILES WEST OF EWING...AND MOVING EAST AT
45 MPH.

PRECAUTIONARY/PREPAREDNESS ACTIONS...

DOPPLER RADAR HAS INDICATED ROTATION WITHIN SOME STORMS IN THE LINE.
WHILE NOT IMMEDIATELY LIKELY...A TORNADO COULD DEVELOP. IF A TORNADO
IS SPOTTED...ACT QUICKLY AND MOVE TO A PLACE OF SAFETY IN A STURDY
STRUCTURE...SUCH AS A BASEMENT OR SMALL INTERIOR ROOM.

THESE STORMS HAVE A HISTORY OF PRODUCING WIND DAMAGE ACROSS EASTERN
PENNSYLVANIA. SEEK SHELTER INSIDE A STURDY STRUCTURE AS THESE STORMS
APPROACH AND STAY AWAY FROM WINDOWS!

FYI - Please let me know if anyone has interest in attending this two day training seminar.

Ray
K2DEE

Subject: TRAINING ANNOUNCEMENT - AUXILIARY COMMUNICATIONS WORKSHOP - Saturday & Sunday, November 3-4, 2012

THE NEW JERSEY OFFICE OF INFORMATION TECHNOLOGY IS PLEASED TO PROVIDE YOU WITH THE FOLLOWING ANNOUNCEMENT:

Auxiliary Communications Workshop - Saturday & Sunday, November 3-4, 2012

To ALL,

This class offering is being sponsored at no cost to students through the Department of Homeland Security, Office of Emergency Communications Technical Assistance Program (OEC-ICTAP). The course focuses on auxiliary communications interoperability, emergency operation center etiquette, on-the-air etiquette, FCC rules and regulations, auxiliary communications training and planning, certification and accreditation and emergency communications deployment. It is intended to supplement and standardize an operator's basic knowledge of emergency amateur radio communications in a public safety context.

The workshop has been designed for newly assigned auxiliary emergency communicators (AuxComm) or groups who provide backup radio communications support for public safety agencies. Typically this would be amateur radio and Radio Emergency Associated Communications Teams (REACT) communicators. It is designed for auxiliary emergency communicators who work with public safety and emergency response professionals and their agencies. This is an intensive two day course with facilitated lecture and student exercises. This course builds in time for interactive discussions and exercises. It has been scheduled over a weekend to accommodate attendees' regular work schedules.

Registration instructions can be found on the Announcement. Deadline to register is Wednesday, October 10, 2012.

Please forward this invitation to individuals in the Amateur Radio Community in your County that may be interested in attending the Workshop.

See attached documents for further details.

Regards,

Jody Nestor
Statewide Interoperability Coordinator

Hi Ron,

The training is being held at the Middlesex Fire Academy in Sayreville, NJ.

Unfortunately the attachments did not go with the announcement. I will
send them to your personal email account.

Roseland Radio Club and Essex County EMMCOM.

Matt -
Not sure if you are having the monthly net tonight or not but here is an
item for you if you do.

I have a request for additional volunteer manpower to assist the East
Hanover Police Dept.

The East Hanover Italian American Club is holding a a Columbus Day 5K run
and Parade on Sunday 10/7. If any of the membership, Roseland, CERT or
ARES/RACES would like to help we could uses a few volunteers to stand posts
during the race. Radio Operators would be great. It is a closed 5k loop
course around Lurker Park in East Hanover. I currently have 3 Cert
Volunteers plus myself but we could use 4 or 5 more

We usually have half of Essex County at this event because we are the only
Columbus Day Parade for 50 miles.

Please let me know if anyone can assist. Sorry for the Short Notice.

Thanks.

1068. Fwd: PSE&G readiness report

Yahoo group: EC_EmComm
Date: 2012-10-25 23:29:33 UTC
From: Ray Linke
Topic: 1068 Message: 1068

>
>
>
> The following was forwarded by Essex County OEM:
>
> PSE&G Prepares for Hurricane Sandy
>
> Additional crews and equipment on hand to restore service
> (October 25, 2012 – Newark, NJ) - Public Service Electric and Gas (PSE&G) Company, New Jersey’s largest electric and gas utility, is closely monitoring the track of Hurricane Sandy and is making emergency preparations should the storm bring heavy rain, strong winds and flooding to our service territory. At this time, the storm is expected to begin impacting New Jersey as early as late Sunday with the full brunt of the storm hitting the area on Monday and/or Tuesday.
>
> In anticipation of Hurricane Sandy, PSE&G is taking the following steps to ensure that the utility is ready to respond to what may be widespread power outages:
>
> • Ensuring that all available personnel are ready to respond beginning this weekend.
> • Arranging for contractors, including tree crews, to assist the utility’s own skilled workforce.
> • Ensuring that additional supplies, such as poles, transformers and other pole-top equipment, are on hand.
> • Ensuring that all vehicles are fueled and ready to go.
> • Testing generators at utility locations.
> • Checking locations for potential flooding and taking precautions, such as using sandbags to help divert water from substation equipment.
> • Coordinating with county OEMs to keep them updated on outages and restoration efforts.
>
> Clearly, a storm like Hurricane Sandy has the potential to interrupt service. High winds might cause trees to brush up against power lines, and lightning could strike and damage trees or pole-top equipment. There also is the potential for trees to be uprooted.
>
> Depending on the severity of the storm, response times for both electric and gas emergency services may be longer than usual. PSE&G asks for our customers’ patience and cooperation as we work to safely restore service as quickly as possible. As the storm gets closer, the utility will provide information about estimated restoration times.
>
> To report downed wires or power outages, customers should call PSE&G’s Customer Service line at 1-800-436-PSEG. PSE&G uses an automated system to handle customer calls as efficiently as possible. Customers who get an automated response when calling PSE&G are encouraged to use it, as it is designed to route their calls to the right destination quickly. The system also provides the option to speak directly to a customer service representative. If you have specific information regarding damage to wires, transformers or poles, we ask that you speak with a representative to provide that information.

>
> Customers with a handheld device, or who are at an alternate location with power, can also report power outages and view the status of their outage by logging in to My Account at pseg.com. General outage activity throughout our service territory is available online atwww.pseg.com/outagecenter and updates are posted on pseg.com during severe weather.
>
> In addition, if outages are widespread, the utility will activate its Twitter page to keep the public informed about our restoration progress. Sign up as a follower at http://twitter.com/psegdelivers to monitor restoration progress.
>
> Public Service Electric and Gas Company (PSE&G) is New Jersey’s oldest and largest regulated gas and electric delivery utility, serving nearly three-quarters of the state’s population. PSE&G is the winner of the ReliabilityOne Award for superior electric system reliability. PSE&G is a subsidiary of Public Service Enterprise Group Incorporated (PSEG) (NYSE:PEG), a diversified energy company (www.pseg.com).

1069. Fwd: Operators

Yahoo group: EC_EmComm
Date: 2012-10-26 05:59:07 UTC
From: Matt Dragon
Topic: 1069 Message: 1069

Newark region of EC EmComm is requesting volunteers to staff key locations to help with communications.

Please read the details and reply to me mdragon@... with the information requested below if you are available. I will pass along the info to Leon but I want to have an idea of who we have going where.

Thanks,
Matt

We will need operators at the Newark EOC and, possibly at up to four other facilities. If anyone is interested in volunteering, they should provide the following information:

NAME:
*
*
CALL SIGN:
*
*
LICENSE CLASS:
*
*
*PHONE NUMBERS:
*
*
*
LOCATIONS YOU ARE AVAILABLE TO OPERATE FROM (EOC, Municipal Building, Shelter):
*
*
*IF AVAILABLE TO OPERATE FROM THE EOC OR OTHER SITE, PLEASE LIST ALL OF THE RADIO EQUIPMENT (Type of radio, antennas, power sources, etc.), THAT YOU WILL BRING:
*
*
*
PLEASE INDICATE ALL BANDS THAT ARE AVAILABLE ON YOUR EQUIPMENT:
*
*
DAYS AND TIME BLOCKS DURING WHICH YOU ARE AVAILABLE TO OPERATE (Sunday - Wednesday):

Thanks for your help.

73,

LEON GRAUER - N0TAZ

There is no effort a man will not expend to avoid work.

1070. Fwd: All NNJ ARES Leaders - IMPORTANT Updated Info from NWS and NHC on SANDY - Re: Potential for High Impact Coastal Storm Sunday - Tuesday, October 28 - 30, 2012

Attachments: 1 described; binary payloads are missing from this source WARC

Please look this over. Make sure you have things charged, supplies on hand, etc. This could have a very significant impact on the area. At this point it looks more and more like there will be A IMPACT it's just a question of where the WORST impacts are felt.

FYI...IMPORTANT late breaking Updated Information from NWS and NHC is in the attached Slides....that is, the info that is being presented during the Conference Call from NWS New York today, to their OEM and Key Partners...includes a SIGNIFICANT change to the Track of SANDY and that is noted in the Slides as well as at:
http://www.nhc.noaa.gov/archive/2012/graphics/al18/loop_5W.shtml

I will be raising the NNJ ARES Alert Status to MONITORING as soon as the Conference Call is over...please begin your local preparations NOW in expectation for the possible SIGNIFICANT impacts to our and neighboring areas from SANDY

Let me know also if you, your Served Agencies or Teams have any questions as well. I've also been in direct contact with ARRL HQ and will relay to you all any info from that side as well

Stay Alert and Stay Safe...this is NOT a DRILL!

To: NNJ ARES Group
Subject: ARRL NNJ Sectionwide ARES Alert Status Raised To MONITORING as of 12:00 Noon 10/25/2012 in preparation for SANDY
Importance: High

Be advised that as of 12:00 Noon today, Thursday, October 25 2012, *the ARRL NNJ Section ARES Alert Status has been raised to MONITORING in expectation of local, possible significant impacts, from SANDY.*

MONITORING: A Heightened State Of Awareness Is Requested Of All NNJ ARES Members By Leadership And Communications To/From Leadership With Local ARES Members Is Initiated

Should the NWS and the NHC continue with their current thinking on the expected track and landfall locations for SANDY (into the NNJ Section and nearby areas), I expect that we will further increase the NNJ ARES Alert Status Sectionwide to higher levels within the next 24-36 hours.
http://www.hudson.arrl.org/nnj/ares/#StatusChart

Local ARES Leadership may also increase the Alert Status within their local jurisdictions as well, to levels higher than what is implemented

Sectionwide!

All NNJ ARES Members are encouraged to being to actively monitor this developing situation and to begin their initial preparations, including being in contact with your local ARES Leadership.

Stay Alert and Stay Safe

The Official NHC Track Forecast for SANDY is at:
http://www.nhc.noaa.gov/archive/2012/graphics/al18/loop_5W.shtml

Information from the 2 NWS Forecast Offices covering the NNJ Section is as follows:

NWS New York (Bergen, Essex, Hudson, Passaic and Union counties):
http://www.erh.noaa.gov/er/okx/
NWS Mt Holly NJ (Hunterdon, Middlesex, Monmouth, Morris, Somerset, Sussex and Warren): http://www.erh.noaa.gov/phi/

Tropical Storm and Hurricane Safety info is at:
http://www.nhc.noaa.gov/prepare/

Subject: [nnjares] ARRL NNJ Section ARES Alert Status Is Now Raised to STANDING BY - Friday, October 26
To: NNJ ARES Group <nnjares@yahoogroups.com>

**

Be advised that in anticipation of possible impacts from a significant weather event both in and nearby to the ARRL NNJ Section, related to Hurricane SANDY,* the ARRL NNJ Section ARES Alert Status is being raised to STANDING BY as of 6:00 PM EDT on Friday October 26 2012.*

STANDING BY: NNJ ARES Members Are Alerted By Leadership To Stand By For Possible Activation And Field Deployments. Meaning Their Personal Preparation Should Be Started. NNJ ARES Members Remain At Home Or Work And No Actual Field Deployments Are Done Under This Level Of Activation

Also be advised, that while the Sectionwide Alert Status is STANDING BY, each ARES DEC/EC may, at their sole discretion, further increase the Alert Status within their individual jurisdictions, to meet any local needs of Served Agencies, etc as per the NNJ ARES Status Alert Chart that is available online at: http://www.hudson.arrl.org/nnj/ares/#StatusChart

Now is the time to undertake your individual preparations, not just for ARES but also to take care of your personal and family needs. DO NOT SELF DEPLOY under any circumstances. Your Local ARES Leadership will advise you of any deployments, etc.. As this has the potential for widespread impacts, both in and outside of the ARRL NNJ Section, ARESMAT deployments for Mutual Aid both inside and outside of the NNJ Section maybe needed if requested by Section Managers.

Thank you all in advance for your attention to this and all ARES and EmComm related situations and Stay Safe!

The Official NHC Track Forecast for SANDY is at:
http://www.nhc.noaa.gov/archive/2012/graphics/al18/loop_5W.shtml

Information from the 2 NWS Forecast Offices covering the NNJ Section is as follows:
NWS New York (Bergen, Essex, Hudson, Passaic and Union counties):
http://www.erh.noaa.gov/er/okx/
NWS Mt Holly NJ (Hunterdon, Middlesex, Monmouth, Morris, Somerset, Sussex and Warren): http://www.erh.noaa.gov/phi/

For Immediate
Release
Saturday, October 27,
2012

Trenton, NJ – Anticipating severe weather conditions including high winds, rain, coastal, stream and river flooding, and the storm's potential to threaten the public's health and safety, Governor Chris Christie today declared a state of emergency throughout the state as a result of severe weather conditions anticipated from Hurricane Sandy. In addition to taking this preemptory step to mobilize government in preparation for the storm, Governor Christie urged New Jerseyans to be vigilant in monitoring conditions of the storm, its effect on their communities, and in making preparations for themselves and their families.

More details are at:

To: n0taz@...

Good afternoon,

As you all know, Hurricane Sandy will be upon us in a number of hours. The City of Newark's Office of Emergency Management needs radio equipment and operators at a few locations to ensure that communications are lost. Here's what we need:

Operators at the Newark EOC and at a minimum of two shelters. Operators should have UHF/VHF mobile or base radios; a power supply; coax; a portable antenna (a J-pole should suffice); and an HT with 2 meter and 70 cm capabilities.

Equipment - We need the following additional equipment at the Newark EOC:

* A power supply capable of supporting two radios (a 50 watt UHF/VHF radio and an HF radio)
* A vertical HF antenna or a wire antenna capable of 80-= 10 meters
* 70 feet of coax
* 2 masts (4-6 feet in length)

If you can lend the equipment, I will be responsible for it and pick it up/drop it off. Please advise as soon as possible if you can serve as an operator and/or loan some equipment. Please be sure to describe what you have to lend and provide a phone number at which you can be reached. If you can assist, please let me know this afternoon, if possible.

Thank you.

LEON GRAUER - N0TAZ

Our primary will actually be the 440 machine for this event since it has backup power. The info is:

The 70 cm repeater's output frequency is 447.875 Mhz with an input of 442.875 Mhz. The PL is 156.7 Hz

We don't have any bodies but we will be trying to get status updates from people where ever they are hunkering down.

Good luck

>

Hi, George, Matt and Fred,

Thank you for circulating our request. We've got an offer for a power
supply and coax and we also have the masts we need. We're in need of an HF
vertical (not too long, as we will have to install it indoors), or someone
familiar with setting up wires. I have a Carolina Windom Compact 80 (69'),
but I've never set up a wire before and I don't even know if I have all the
accessories I need to do it. I have plenty of rope, but, again, this would
be an indoor installation. If someone or two can assist with this sometime
on Monday, preferably in the morning. I can also be reached on the KB2UET
repeater.

We are still very much in need of operators.

Here is our frequency plan for this event:

Thank you.

Please let me know if you might be available. I believe this is located in or near Trenton, so I doubt anyone from this far North could easily make it down there at this point, but if you might be out of the County currently, they are asking for coverage. We may see a request soon to staff the County EOC, since it's likely that the State is doing this to preserve communications with County level EOCs and other agencies.

I'll forward additional info when I get it.

1090. Fwd: Reminder: Essex County EmComm Net (ARES/RACES/SKYWARN) @ Tue Nov 6 8pm - 9pm (Unshared)

Yahoo group: EC_EmComm
Date: 2012-11-06 19:52:56 UTC
From: Matt Dragon
Topic: 1090 Message: 1090

With people still recovering from Sandy and another storm on the way, I'm cancelling the Net for tonight.

Do make sure you restock though. Batteries bought or charged, food, water, etc should be replaced or restocked so that you're ready for the next storm which is due Wednesday into Thursday. This storm is no second Sandy, but given the vulnerable state of a lot of the infrastructure and the fact some people still don't have heat and/or power there is a much higher risk of impact to our area (and much higher complacency now that we "survived" Sandy).

Be safe,
Matt

1092. Fwd: radio installation

Yahoo group: EC_EmComm
Date: 2012-11-10 16:25:29 UTC
From: Matt Dragon
Topic: 1092 Message: 1092

Begin forwarded message:

*From: *Ray Linke <k2dee@...>
*Subject: **radio installation*
*Date: *November 10, 2012 11:07:44 AM EST
*To: *Essex EmComm <EC_EmComm@yahoogroups.com>

This email is a general "heads up" until I learn more details. If I have the story correct, the Red Cross is looking for radio amateurs to install about 7 radios in their vehicles in Newark and Jersey City.

I am told that they have the radios and mag mount antennas. They just need individuals familiar with basic installation to a car electrical system.

I am expecting another call which hopefully will provide more details.

Ray, K2DEE

1093. Happy Thanksgiving...

Yahoo group: EC_EmComm
Date: 2012-11-22 19:14:08 UTC
From: Frank
Topic: 976 Message: 1093

As we gather with our friends and family this Thanksgiving, let us take a moment and remember that today is about more than just turkey and football. Thanksgiving is a time for families and loved ones to gather together and express gratitude for the freedoms we enjoy and all that we have been given. Today, we give thanks for all of the blessings that we enjoy.

As Americans, we are blessed by freedoms that many across the globe can only dream of. It is important on days like today to reflect on how fortunate we are. Too often we find ourselves caught up in the fast pace of our lives and don't take a moment to appreciate how fortunate we truly are. Today is a day for reflection.

As we reflect on our country's humble beginnings, Americans are reminded that we live in a land of many blessings where each person has the right to live, work, and worship in freedom.

Americans are also mindful of the need to share our gifts with others and serve a cause greater than one's self.

On this day, let us all give thanks to God who blessed America's first days and who blesses us today.

Happy Thanksgiving from my family to yours...

Frank...

Cancelling the net, sorry for the short notice, thought today was only Monday.

We will look to reinstate regular nets, and meetings (if there is interest) in 2013. As we celebrate the holidays and the new year with families and friends, a few things to think about:
1. We could use a new regular net control operator as Ron's new location doesn't allow him to perform this role any longer. Thanks to Ron for his time and energy while he was able to handle this for us.
2. If you learn of events that you may need operators for through contacts, friends, or clubs please let me know.
3. If you have ideas, feedback, questions, anything please let me know.
4. If you know anyone who may be interested in joining us please give them the list info or send them my contact info, mdragon@..., 908-303-3890.

Thanks,
Matt, KD2ARL

Subj: [Coat] Reflections On Sandy: Presentation by Gary Szatkowski at Nurture Nature Center

Dear COAT friends: ****

** **

Next Thursday, Dec. 13, Nurture Nature Center is hosting a presentation by Gary Szatkowski, Chief Meteorologist at the National Weather Service Forecast Office in Mt. Holly, NJ/Philadelphia, PA, about Hurricane Sandy and what it means for our region. ****

** **

A flyer for the program, “Reflections on Sandy,” is attached to this email, and you may feel free to circulate or post freely. Gary will use NNC’s Science on a Sphere exhibit to show satellite imagery of the path of the storm, and discuss its impacts. Gary is a fantastic presenter, and this should be an excellent program if you are interested in what happened with this storm, and what it means for future planning. The event is designed for emergency management and public audiences. We will have light refreshments and time for question and answer after the presentation. ****

** **

RSVPS are welcomed but not required to rhogan@.... ****

1099. Winter/Wind storm this afternoon

Yahoo group: EC_EmComm
Date: 2012-12-26 17:34:56 UTC
From: Matt Dragon
Topic: 1099 Message: 1099

Please keep an eye on the weather this afternoon as we're expected to get a strong rain/wind storm after an initial snow fall. While we're currently only forecast to get 1-3 inches of snow, that snow has the potential to fall extremely quickly before the temperatures rise and it changes over to rain. As the storm progresses into the overnight period there could be very strong winds and very heavy rain at times.

1106. Fwd: [nnjares] PLEASE READ this concerns the Friday and Saturday weather event

Yahoo group: EC_EmComm
Date: 2013-02-07 01:03:55 UTC
From: Matt Dragon
Topic: 1106 Message: 1106

There is a lot of stuff still to be determined about the storm Friday into Saturday, but please to be aware, some potentially major winter weather is possible and we should prepare now.

---------- Forwarded message ----------
From: n2smv <n2smv.ec@...>
Date: Wed, Feb 6, 2013 at 5:54 PM
Subject: [nnjares] PLEASE READ this concerns the Friday and Saturday weather event
To: nnjares@yahoogroups.com

Please note the expected conditions...including the up to 0.25 inches of Ice noted in areas within the NNJ Section...that is enough to damage communications and power infrastructures ..including antennas and feedlines...

ARES members should be quickly alerted to prepare for using backup power and possibly antenna systems both at home or at served agencies and to prepare now, well before the storm...

The Winter Storm Watches that cover all 12 counties of the NNJ Section are included below

1107. Major Winter Storm to impact the area

Yahoo group: EC_EmComm
Date: 2013-02-07 21:30:17 UTC
From: Matt Dragon
Topic: 1107 Message: 1107

Make sure you charge batteries, have food and water handy, and avoid travel
if at all possible. If you cannot avoid travelling make sure you have
food, water, blankets and appropriate clothing in your vehicle.

Please note, this starts for 6am Friday, even thought the "strongest winds
and heaviest snows will occur Friday evening"

...MAJOR WINTER STORM TO IMPACT THE TRI-STATE AREA FRIDAY INTO
SATURDAY...

WESTERN PASSAIC-EASTERN PASSAIC-WESTERN BERGEN-WESTERN ESSEX-
WESTERN UNION-
355 PM EST THU FEB 7 2013

...WINTER STORM WARNING IN EFFECT FROM 6 AM FRIDAY TO 1 PM EST
SATURDAY...

THE NATIONAL WEATHER SERVICE IN UPTON HAS ISSUED A WINTER STORM
WARNING FOR HEAVY SNOW ...WHICH IS IN EFFECT FROM 6 AM FRIDAY TO
1 PM EST SATURDAY.

* LOCATIONS...INTERIOR NORTHEAST NEW JERSEY.

* HAZARD TYPES...HEAVY SNOW.

* ACCUMULATIONS...SNOW ACCUMULATION OF 10 TO 14 INCHES...WITH
LOCALIZED HIGHER AMOUNTS WITHIN DEVELOPING SNOW BANDS.

* TEMPERATURES...FALLING INTO THE UPPER 20S BY FRIDAY EVENING.

* VISIBILITIES...ONE QUARTER MILE OR LESS AT TIMES.

* TIMING...THE STRONGEST WINDS AND HEAVIEST SNOW WILL OCCUR FRIDAY
EVENING INTO SATURDAY MORNING.

* IMPACTS...HEAVY SNOW AND WINDS WILL MAKE FOR DANGEROUS DRIVING
CONDITIONS WITH VISIBILITIES NEAR ZERO IN WHITE-OUT CONDITIONS.

PRECAUTIONARY/PREPAREDNESS ACTIONS...

A WINTER STORM WARNING FOR HEAVY SNOW MEANS SEVERE WINTER WEATHER
CONDITIONS ARE EXPECTED OR OCCURRING. SIGNIFICANT AMOUNTS OF SNOW
ARE FORECAST THAT WILL MAKE TRAVEL DANGEROUS. ONLY TRAVEL IN AN
EMERGENCY. IF YOU MUST TRAVEL...KEEP AN EXTRA FLASHLIGHT...FOOD...
AND WATER IN YOUR VEHICLE IN CASE OF AN EMERGENCY.

1114. Cherry Blossom Run

Yahoo group: EC_EmComm
Date: 2013-03-04 20:14:13 UTC
From: Ray Linke
Topic: 870 Message: 1114

The Cherry Blossom Run is Sunday, April 7, 2013

Once again we been asked to provide radio communications for the race.
Anyone interested in helping, please contact Ray, K2DEE.

(ray.k2dee at gmail.com)

Cherry Blossom
Run<http://www.essexcherryblossom.com/index.php/events/cherry-blossom-10k-run>
Branch Brook Park
Belleville, NJ
time: Approx 8:30 am - 12 noon.

We will use the W2QR repeater: 447.875 (-5)

Meet for breakfast at 7:00 am at the State Street Grill on State Street
just off Bloomfield Ave, Bloomfield, NJ.

1115. Re: [EC_EmComm] Essex County EmComm Net (ARES/RACES/SKYWARN), 3/5/2013, 8:00 pm

No net this month HOWEVER, a few things to be aware of.

K2DEE is looking for operators for the Cherry Blossom Run, Sunday, April 7, 2013, 8:30am-12pm. Contact (ray.k2dee at gmail.com) if you are available.

There's the potential for a winter storm to impact the area tomorrow, Wednesday, afternoon through some time on Friday. The computer models are all over the place with this one, in the past 2 days they have predicted anywhere from nothing, to rain, to 8 inches or a foot of snow. So prepare like it's going to be the worst case, and then be happy if it's 50 and sunny out on Thursday. If it does snow it may be very heavy wet snow and windy so power outages could be an issue. Charge your batteries and make sure you have supplies at home and in your car if you must travel during the bad weather.

And on the nets front, if anyone could become our new regular Net Control please let me know.

Let me know if you have any questions,
Matt

1120. Operators needed for Cherry Blossom Run

Yahoo group: EC_EmComm
Date: 2013-03-25 21:30:07 UTC
From: Matt Dragon
Topic: 1120 Message: 1120

If we don't get 5 more people by Thursday we will need to cancel our assistance to the county.

Here are the particulars:

The Cherry Blossom Run is Sunday, April 7th.

Cherry Blossom Run
Branch Brook Park Welcome Center
Belleville, NJ
time: Approx 8:30 am - 12 noon.

We will use the W2QR repeater: 447.875 (-5)

For those who like to eat we will meet for breakfast at 7:00 am at the State Street Grill on State Street just off Bloomfield Ave, Bloomfield, NJ.

Please reply directly to Ray(ray dot k2dee@...) if you can help.
Also contact me if you have any questions. Directions will be provided next week.

Thanks to those of you eho are able to work the Cherry Blossom run with Ray. No net tomorrow. We are still looking for a new regular net control (or a team). Also if your club is interested in a presentation/talk/discussion about EmComm please let me know.

The quarterly meeting would fall on this month but I'm canceling that as well.

1128. Fwd: [nnjares] NWS Mt Holly Mow Offering An Online Basic SKYWARN Spotter Training Class - May 22 2013

Yahoo group: EC_EmComm
Date: 2013-05-09 16:59:34 UTC
From: Matt Dragon
Topic: 1128 Message: 1128

Note we (Essex) are not in the Mt. Holly area, but I attended a Mt. Holly in person Skywarn class and they had no issue with the fact I didn't live in their area. So in case you are interested, here's the info

---------- Forwarded message ----------
From: George Sabbi <KC2GLG@...>
Date: Thu, May 9, 2013 at 12:42 PM
Subject: [nnjares] NWS Mt Holly Mow Offering An Online Basic SKYWARN Spotter Training Class - May 22 2013
To: NNJ ARES Group <nnjares@yahoogroups.com>

NWS Mt Holly NJ will have a SKYWARN Basic Training Webinar (online class) on May 22, 2013 at 7PM. Note...this class is for residents of the NWS Mt Holly NJ County Warning Area (CWA).

The training will last until approximately 10PM. (approximately a 3 hour session)

After registering you will receive a confirmation email containing information about joining the Webinar. You must be at least 16 years of age or have parent supervision to join the network.

Use the Link below for more info and/or to Register (required) for this event. Note Space Is Limited...signup ASAP!

http://www.erh.noaa.gov/phi/webinar.html

If you have any questions please email Larry.Nierenberg@... for more information.

1132. Last night's noise

Yahoo group: EC_EmComm
Date: 2013-05-11 11:06:57 UTC
From: Bob
Topic: 1132 Message: 1132

Hey Frank,
I don't tend to scare easily but that noise last night had me wondering where my bug out bag was! It seemed like it went on for several minutes but realistically it was at least 30 seconds. It sounded like a loud clap of rolling thunder but I've never heard it last so long. Do you know where I can buy rosary beads? Were you up late or getting up early?
Let me know when NARC might agree to have me attend a meeting. Id like to talk to you guys some night. By the way I'm back. I resumed the title of County Emergency Coordinator.

1133. Invitation from West Orange CERT to participate in a Wilderness Search Exercise, June 22nd

Yahoo group: EC_EmComm
Date: 2013-05-11 15:29:36 UTC
From: Matt Dragon
Topic: 1133 Message: 1133

On June 22nd starting around 8am the West Orange CERT team will be doing a Wilderness Search Exercise in the South Mountain Reservation. We will be running several scenarios for lost and injured hikers. I am the Deputy Director of the West Orange CERT team and I want to extend an invitation to any HAM operators who are interested in participating. I know it's the morning that Field Day starts, but I think if you could spare 1-2 hours both sides could get a lot out of it.

The objectives I'd like to see HAM operators achieve are:

1. Provide communications from the search command post to the town EOC
2. Shadow CERT members on their search to provide simplex communications with the command post
3. I saved the best for last, use direction finding equipment to locate an FRS radio user lost in the woods.

I think the #3 could be very cool to attempt on the HAM side, and even the CERT members were excited at the idea that HAMs could help by doing something like that. As Bob said to me it's basically a fox hunt and I know the town would love to know that we have that capability available to us in CERT by way of the members of this group.

So I am reaching out for available HAM operators, probably about 4-6 people, and in particular anyone who has direction finding gear, or any experience working with such equipment. I know it might be a tough squeeze with Field Day but I think we could get people out of there by 10 or 11am and if you need to leave at a given time, then we will accommodate you.

If you can forward this request to any clubs or other radio groups you are involved with I would appreciate it. EmComm or similar experience is a plus but not a requirement.

If people are interested they can contact me at mdragon@...,
908-303-3890, or on WA2JSB West Orange: 146.415

Thanks,
Matt Dragon, KD2ARL
Central Unit EC, Essex County EmComm
Deputy Director, West Orange CERT

Harold,
Hi and welcome. Glad you tried to make it. It was short because I had to be reminded to get on the air. When the attendance is there the nets may be longer. Thanks for trying, better luck next time.

Also many county roads in the area have ponding in the low lying
areas, a lot of debris on them and manhole covers popped off from the
water. So use caution in your travels.

Bob & Emcomm members,

There is also part of the IPAWS program which is what FEMA and the Fcc have as a work in progress to get the next generation of alerts out to the public in the age of satellite cable cellular and broadcast communications.

Sent: 8/7/2013 11:13:43 A.M. Eastern Daylight Time
Subj: FW: Ham Radio Training and Licensing Exam

Please see below from the Central West MCC

Good afternoon all!

The CW MCC will be having Ham Radio Training for anyone that has a HAM license, maybe even a HAM radio, and has not used your radio or done anything since getting a license. This training will be held here at the Central-West MCC (Somerset Medical Center) on August 21, 2013 at 10:00am. If you or any of your constituents has not used a HAM radio since receiving a license, or if you want a refresher on the use of a HAM radio, this course is for you. Feel free to bring your radios. The instructors will go over the radio frequencies and repeaters that the MCC has.

For anyone who does not have a HAM license and is looking to obtain a HAM technician's license, a licensing examination will be held here at the MCC on August 16, 2013. A review will be at 9:30am and the examination is at 12:30pm.

Here are a few online sites for materials and practice examination questions:

www.arrl.org

www.hamradiolicenseexam.com

www.hamradiolicenseprep.com

Again, the August 21st training is for those who have a license and would like a refresher on the use of a HAM radio or has never used a HAM radio since receiving a license. The online sites all have approximately 350 practice test questions. The examination is 35 questions taken from the 350 practice test pool.

Please feel free to contact me if you need further information.

Best regards,

Marlin

FYI

From: ROIC@...
To: ROIC@...
Sent: 10/10/2013 2:17:04 P.M. Eastern Daylight Time
Subj: STATEWIDE WEATHER WARNING//Prolonged Coastal Storm

MESSAGE TYPE: WARNING

INCIDENT TYPE: HAZARDOUS WEATHER OUTLOOK

INCIDENT DATE/TIME: 10 October 2013 through 12 October 2013

SOURCE: NATIONAL WEATHER SERVICE MOUNT HOLLY, NJ

HANDLING: FOUO

SUMMARY: The New Jersey Regional Operations Intelligence Center (NJ ROIC) reports that the National Weather Service, Mt. Holly, has issued a hazardous weather outlook for NJ.

- A slow-moving coastal storm will linger near the mid-Atlantic States through the next several days.
- Minor coastal flooding at the time of high tide are likely continuing into Saturday. Some locations may reach moderate coastal flooding levels today (Thursday) & Friday.
- Minor to moderate beach erosion is possible during the times of high tide due to the coastal flooding and heavy wave action.
- Gale force wind conditions are likely along portions of the Atlantic Coast.

- Winds will gust in the 40 to 45 miles an hour range near the Atlantic Coast.
- Wind gusts inland will be generally in the 20 to 35 mile an hour range, with the higher values closer to the coast.
- Peak winds will be occurring today. Winds on Friday will be a little lower.

Additional rainfall amounts of 2 to 4 inches are expected, with the heaviest amounts closest to the coast.
IMPACT: The strongest impacts of the storm will be felt in Southern NJ. Minor coastal flooding is occurring. Moderate coastal flooding is possible.

ROIC DUTY OFFICER: A/Lt. Rochinski #4570, 609-963-6951

Information contained within this message should be considered preliminary and is intended to provide receivers with information about potential weather patterns that are emerging.

Hello everybody.

I hope all are well. I have been doing net control for Sussex County races for the last six months. Its good to get back in to the NCS chair ... I did enjoy working with you folk in Essex county emcomm ... but life moves on.... If someone could take me me off the this group as NCS. I would be grateful... thanks. Happy Holiday's!
Ron Boucher kc2sou.

1182. Fwd: STATEWIDE WEATHER WARNING//Potential for Significant River Flooding/Loca...

Yahoo group: EC_EmComm
Date: 2014-01-10 20:19:52 UTC
From: Ray Linke
Topic: 1182 Message: 1182
Attachments: 1 described; binary payloads are missing from this source WARC

Weather Bulletin from the "ROIC"

Ray

--

MESSAGE TYPE: WARNING

INCIDENT TYPE: HAZARDOUS WEATHER OUTLOOK

INCIDENT DATE/TIME: 11 & 12 Jan. 2014

SOURCE: NATIONAL WEATHER SERVICE MOUNT HOLLY, NJ

HANDLING: FOUO

The New Jersey Regional Operations Intelligence Center (NJ ROIC) reports the State Office of Emergency Management (NJ OEM) is monitoring a weather event in coordination with the National Weather Service (NWS).

SUMMARY: A storm system this weekend will bring the potential for heavy rainfall. Area rivers are currently choked with ice, and combined with heavy rainfall, there is a high risk of significant ice jam flooding. In addition, there may be some strong damaging winds gusts with the storms on Saturday.

EXECUTIVE SUMMARY AS FOLLOWS:

A storm system forecast to affect the area this weekend will bring warmer temperatures, heavy rainfall, and the potential for significant river flooding due to the combination of heavy rainfall and ice clogged rivers. Strong damaging wind gusts are also a risk.

Rainfall amounts over 2 inches are possible with this storm system. Local flooding due to heavy rainfall and frozen ground conditions is likely.

Significant river flooding is likely due to the combination of runoff from the heavy rainfall on frozen ground and the ice clogged conditions of most rivers. Moderate to major river flooding is possible where ice jams form, but it is impossible to predict in advance where these may occur.

Residents along all rivers and streams are encouraged to monitor river forecasts closely & be prepared to react if ice jam flooding should develop.

Some of the storms this weekend may bring strong damaging wind gusts to southern portions of the area, as well as a rumble or two of thunder.

Unless there is a major change in the threat, no additional briefing packages are scheduled for this event.

Please access our website for up-to-date information:
http://www.erh.noaa.gov/phi/

IMPACT: Travel conditions will be affected by the weather conditions. Due caution should be exercised while traveling through the affected areas.

More information can be found in the attached briefing package.

ROIC DUTY OFFICER: A/SFC V. Onofrio #5304, 609-963-6951

Information contained within this message should be considered preliminary and is intended to provide receivers with information about potential weather patterns that are emerging.

1186. A Call to Service Essex County operators please take note!

Yahoo group: EC_EmComm
Date: 2014-02-07 01:13:20 UTC
From: Robert Crifasi
Topic: 1186 Message: 1186

I am passing this message on to you all from Leon Grauer. Please respond to both of us if you are interested.

Begin forwarded message:

> From: Leon Grauer <n0tazradio@...>
> Date: February 6, 2014 at 12:17:55 AM EST
> To: Leon Grauer <N0TAZRADIO@...>
> Subject: A Call to Service
>
> Greetings,
>
> Here is a recent article from NJ.com regarding a communications system failure in Jersey City. http://www.nj.com/hudson/index.ssf/2014/02/jersey_city_police_and_fire_communications_nerve_center_crashes.html In July of 2008, the City of Philadelphia, Pennsylvania, suffered the fifteenth communications failure of its $68 million digital truncated radio system. Several high-priority incidents, including a shooting and the Police Commissioner trying to call for back-up while breaking up a fight involving a large crowd, had to be dealt with by way of cell phone calls to dispatchers. The system was down for nearly one hour. If this were to happen in Newark, I believe that we are substantially better prepared to handle a more rapid transition to a back-up system. The reality is that there is always some delay between the system failure and the deployment of a back-up system, which is usually off-site in another facility or in a mobile communications vehicle.
>
> The greater the amount of time of a communications black-out, the greater potential for injury, loss of life and property and imperilment of emergency responders The Amateur Radio community is quick to point out that when all other communications systems fail, Amateur Radio works. We cite example after example of Amateur Radio saving the day in major disasters, from 9/11 to Hurricane Katrina. It is true that in large-scale disasters, radio amateurs volunteer numerous hours providing communications support to facilitate shelter, transportation, medical and relief aid being deployed smoothly.
>
> In the more common urban scenario, however, this is not frequently the case. Some amateurs are unable to take time from work or family obligations. Others will not. Some in suburban areas will not travel to urban areas out of unrealistic fear. There are, to be sure, other reasons why so few radio amateurs volunteer for sudden, unpredicted communications emergencies. The lack of lead time and the lack of glory (such as newspaper and magazine coverage), in these situations are, undoubtedly, factors. Whatever the reasons, an effective response from the Amateur Radio community in urban areas is woefully deficient.
>
> In communications emergencies, such as those that occurred in Philadelphia or Jersey City, there is a system in place to notify Amateur Radio coordinators within a few minutes of the need for operators to be deployed. While there is a wealth of operators who reside in the City and many more who work in the City, there is a need for the current small group

of volunteers to expand into a 24/7/365 group of communicators ready to be deployed on a moment's notice.
>
> The City's Office of Emergency Management and Homeland Security has been welcoming to Amateur Radio operations and considers Amateur Radio as an essential component of the City's emergency operations. Plans are being developed to install various amateur radios in the new City/Regional Emergency Operations Center (this EOC is similar to the State EOC at the ROIC in West Trenton), and in other key locations in the City. These plans include installation of repeaters and digital modes, as well as portable communications kits. The City's vision of Amateur Radio operations in Newark is ideal for the effective deployment for all sorts of emergencies and disasters. I will add this: The City's plan for Amateur Radio involvement is exciting and one that provides equipment for all types of operations.
>
> Newark is the state's largest city. It is robust with vehicular, pedestrian and commuter traffic. Four interstate highways run through Newark. In addition to being the county seat of Essex County, Newark is home to an international airport and seaport; two major universities with an abundance of student housing; a county college campus; three hospitals; several senior and disabled-persons housing complexes; a major interstate train and bus station; federal, state and municipal courts; a federal building; a large county jail complex; a state prison; two major performing arts venues; and a professional sports arena. Whether directly affected by a major emergency or disaster, or providing resources for others in affected areas, the role of the City of Newark will be vital to management and recovery of any major incident that affects Northern New Jersey and even beyond.
>
> Effective deployment of Amateur Radio operations is a critical part of any response or recovery operation. If you live, work or attend school in or near Newark, this is a call for you to become a part of the Amateur Radio team that will ensure that the City and the region (Newark's EOC is a regional EOC), has timely and adequate Amateur Radio resources in operation on very short notice. If you would like to be a part of this core group of operators who will respond to locations in the City of Newark, please contact me by return e-mail. Once enough operators respond, we will set up a meeting and request a tour of the EOC facility for the group. (Permission for a tour is at the discretion of the City).
>
> Please contact me as soon as possible if you or any other hams that you know are interested in participating. I look forward to hearing from you.
>
> --

1209. Feng Shui

Yahoo group: EC_EmComm
Date: 2014-07-19 23:09:32 UTC
From: Sam Houston
Topic: 1209 Message: 1209

Feng Shui

This is without a doubt one of the nicest good luck forwards I have received.. Hope it works for you -- and me!

Lotus Touts: You have 6 minutes

There's some mighty fine advice in these words, even if you're not superstitious. This Lotus Touts has been sent to you for good luck from the Anthony Robbins organization. It has been sent around the world ten times so far.

Do not keep this message.

The Lotus Touts must leave your hands in 6 MINUTES. Otherwise you will get a very unpleasant surprise. This is true, even if you are not superstitious, agnostic, or otherwise faith impaired.

ONE.
Give people more than they expect and do it cheerfully.

TWO.
Marry a man/woman you love to talk to. As you get older, their conversational skills will be as important as any other.

THREE.
Don't believe all you hear, spend all you have or sleep all you want.

FOUR.
When you say, 'I love you,' mean it.

FIVE..
When you say, 'I'm sorry,' look the person in the eye..

SIX.
Be engaged at least six months before you get married.

SEVEN..
Believe in love at first sight.

EIGHT.
Never laugh at anyone's dreams.
People who don't have dreams don't have much.

NINE....
Love deeply and passionately.
You might get hurt but it's the only way to live life completely

TEN..
In disagreements, fight fairly. No name calling.

ELEVEN.
Don't judge people by their relatives.

TWELVE.
Talk slowly but think quickly.

THIRTEEN.
When someone asks you a question you don't want to answer, smile and ask,
'Why do you want to know?'

FOURTEEN.
Remember that great love and great achievements involve great risk.

FIFTEEN.
Say 'bless you' when you hear someone sneeze.

SIXTEEN.
When you lose, don't lose the lesson.

SEVENTEEN.
Remember the three R's: Respect for self; Respect for others; and
Responsibility for all your actions.

EIGHTEEN.
Don't let a little dispute injure a great friendship.

NINETEEN.
When you realize you've made a mistake, take immediate steps to correct it.

TWENTY
Smile when picking up the phone. The caller will hear it in your voice

TWENTY- ONE.
Spend some time alone.

Now, here's the FUN part!

Send this to at least 5 people and your life will improve..

1-4 people: Your life will improve slightly.
5-9 people: Your life will improve to your liking.
9-14 people: You will have at least 5 surprises in the next 3 weeks
15 and above: Your life will improve drastically and everything you ever
dreamed of will begin to take shape.

A true friend is someone who reaches for your hand and touches your heart.

Do not keep this message.

1233. Prep for Essex County EmComm Updates

Yahoo group: EC_EmComm
Date: 2015-01-28 14:29:20 UTC
From: CrifasiRF@...
Topic: 1233 Message: 1233

Hi all,
I know this message may be coming out of the blue, considering you haven't heard from me in so long. Please forgive my absence. There is news that may interest many of you and I am putting together the information to fill you all in. I don't mean to be cryptic, but I do need to get all my facts straight first.
In the meantime let's begin here (Essex County EmComm Yahoo Group forum) because it is where most of our information was previously disseminated from. I would appreciate it if you refreshed your contact information for me. In addition many of the others still appear as members, but their email addresses may have changed. That being the case they will not see this message. Please mention it to them individually or at club meetings, and have them check in on this forum and register or update their information.
We have a LinkedIn group established and a Face Book page is under construction and will be published soon. These additional social media sites are to make as many avenues of communication and discussion available to you as possible. Some may be more comfortable with one than another and this will give you choices.
I don't mean to be cryptic about the information I mentioned but it may rekindle your interest in EC EmComm. I will put it together ASAP and get it out to you soon.

Bob KC2RFC

Hi all,   Iknow this message may be coming out of the blue, considering you haven't heardfrom me in so long. Please forgive my absence. There is news that may interestmany of you and I am putting together the information to fill you all in. Idon't mean to be cryptic, but I do need to get all my facts straight first.   Inthe meantime let's begin here (Essex County EmComm Yahoo Group forum) becauseit is where most of our information was previously disseminated from. I wouldappreciate it if you refreshed your contact information for me. In additionmany of the others still appear as members, but their email addresses may havechanged. That being the case they will not see this message.
Please mention it to them individually or at club meetings,and have them check in on this forum and register or update theirinformation.   Wehave a LinkedIn group established and a Face Book page is under constructionand will be published soon. These additional social media sites are to make asmany avenues of communication and discussion available to you as possible. Somemay be more comfortable with one than another and this will give youchoices.   I don't mean to be cryptic about the information I mentioned but it mayrekindle your interest in EC EmComm. I will put it together ASAP and getit out to you

soon.
Bob KC2RFC

1250. MARS/ARES MOU Initiated by Pentagon

Yahoo group: EC_EmComm
Date: 2015-02-06 20:21:15 UTC
From: CrifasiRF@...
Topic: 1250 Message: 1250

Essex County Radio Operators,

I know Essex County EmComm has been dormant for quite some time. I apologize for that. There has been no activity for several reasons but that may not continue. I have been contacted recently by our new Section Emergency Coordinator for Northern New Jersey, Lance Andrew (N2UUS). The monthly Section Nets are resuming and I will be taking part along with the other County EC's.

I have also been contacted directly by William Fitzsimmons (N2LMU). Bill is the former Army MARS Region 2 Director and is currently the Civil Affairs Officer for Region 2 (AAA2R9). He has informed me that there was an MOU drawn up between the Pentagon and ARRL/ARES. This is not breaking news and actually happened a while ago. However we are being asked to establish and strengthen that relationship between MARS and ARES, on a county level, from this point on.

I have included a document, in the files section of the Yahoo site, that outlines the formation of the relationship I am talking about. From the dates in it you can clearly see this is not a new development. That is not really a disappointment because we all know it takes time for things to reach us at the volunteer level of emergency radio. It's possible that the request for our involvement so long from its inception signals the continued impact of the MOU, and a true effort to include us.

This is an excerpt:
While informal cooperation is nothing new to ARES, RACES and MARS members--many of whom participate in all three organizations--the focus of the Castle Point gathering was on launching more formal regional and national collaboration. ARRL Field Organization/Public Service Team Leader Steve Ewald, WV1X, said he was pleased to be able to participate. "I thought it was an excellent meeting, and it should lay a foundation for further cooperation between ARRL and our Field Organization and MARS," he said afterward. (Please check the Files in the Yahoo Group site for the full document and a related article from February QST. They are both in the MARS MOU folder. The QST article is about an exercise that happened in October.)

From the point of the 9/11 terrorist strike, our involvement in government emergency operations and particularly drills, has dwindled to nothing. I'm sure your expectation was, as was mine, that our involvement would grow and strengthen because of that tragic national event. Sadly that was not the case. The exercising of this MOU (which actually preceded 9/11) may be a conscious effort to reverse that previous trend. Let us begin to slowly rebuild what we all had worked to establish, with the goal of keeping pace with any growing requests. Some of you have responded to my last message and I thank you. Right now I need to hear from the rest of you that are willing to respond to emergency nets and exercises as they are established. I don't have complete information to disseminate yet and am contacting you in an attempt to stay ahead of the curve, should there be one. I want to refresh your contact information just to start the ball rolling.

Please bring this information to your clubs and discuss it on your nets. Our clubs in Essex have always been the strength of the continuing ham radio activity in our county. We still need a structure on the county level that can collect local information and pass it on up the chain to the upper levels connecting us with the nation as a whole. Army MARS will be our link. This is exactly the way SKYWARN has operated for many years and continues to sustain the interest of many operators. There is a chance the same can happen here. We need to revive our county structure. Please contact me and let’s begin the dialogue to slowly rebuild Essex County Emergency Communications.

1267. Moving on. Update

Yahoo group: EC_EmComm
Date: 2015-06-21 02:29:27 UTC
From: Bob Crifasi
Topic: 1267 Message: 1267

Essex County EmComm Members,

I thought the message had gone out on the forum several weeks ago. I have looked and now see no evidence of it. I believe there was some failure in my own email system so I am re-printing it here. An update follows below it.

As recently as two (and a half now) months ago I had expected to continue living in West Orange for the foreseeable future and working at Rutgers University in Piscataway for at least two more years. In concert with that I expected to remain your Essex County EC and possibly rebuild the group to better serve the county in its designed function. To that end I began to move on the opportunity presented by our new SEC (Lance Andrew) and our Army MARS Region 2 contact (Bill Fitzsimmons), as the touch point for fresh activity. At that point my life began to take a very different trajectory.

The last month has been very eventful for me personally. My life and expectations for the future have taken several unexpected turns. I became more fully aware of the financial advantages that existed for us if we moved to Pennsylvania. My wife and I explored a community in an area there that held some interest for us, and came upon a home that held great promise for the future. All the financial pieces of the puzzle fell into place for us at an unexpected pace. In short we close on the sale of the home in Pennsylvania in mid-May and our home in West Orange at the end of May. I have given notice at Rutgers and my last day is mid July. The speed at which all this has taken place still has my head spinning!

I am happy with all aspects of this new scenario, but one. That being the impact it means for my continuing as EC of Essex County. That has been a big piece of my life since taking the responsibility in 2005. It has had many ups and downs along the way. Most of you have been there for the ride. I am very unhappy leaving things on what I had hoped would be a new beginning for the group. Hopefully all that it will mean is that up turn will be delayed until a new EC takes my place. If any of you have suggestions to that end please do not hesitate to contact me or Lance to discuss it. I will still be open to discussion on any of this as I consider all of you friends an EmComm coworkers. My email address is still CrifasiRF@... <mailto:CrifasiRF@...> . However that will change over the next month and I intend to get back to you via this forum when it does.

Well it has been a few weeks and I have sold one house in NJ and purchased another in PA. We are beginning to settle in here, but my head is still spinning from the pace of the transition. I love it but it was FAST! I'm still working full time until mid-July.

I still have not heard from anyone of a viable candidate to take the helm of Essex County Emcomm. Please think long and hard about this and find someone that is willing and capable of taking the title. If anyone feels awkward contacting me with it please get in contact with the NNJ SEC Lance Andrew N2UUS (nnjsec@... <mailto:nnjsec@...>) and let him know. I know Lance would be very happy to hear from you, and welcome the chance to mentor anyone recommended.

Bob Crifasi (KC2RFC)

Subject: [nnjares] Registration for the 2015 TCS NYC Marathon!!! ~ TIME IS RUNNING OUT! [2 Attachments]
To: <nnjares@yahoogroups.com>, <pcaresraces@...m>

[Attachment(s) <#msg-f:1513154716664362301_TopText> from Michael Hoeft included below]

Good evening,

This year's New York City Marathon is Sunday, November 1, and is fast approaching.

We are still seeking ham radio operators for this very large event through the five boroughs of New York City.

If you've volunteered in the past, we need you to come back and share your experience.

If you've never volunteered for this event, please consider doing so. This event is a great way to showcase what amateur radio can do in the interests of public safety.

Personally, I have been involved in this event in one way or another for over 30 years and have always found it to be challenging and rewarding at the same time.

Please consider joining us! Groups of operators can be accomodated so carpooling and working with other operators you are familiar with is usually possible.

The two attachments thoroughly explain the registration process.

Thanks and 73,

Mike K2MPH

*Please read the attached Welcome Letter for Registration Instructions *

*& attached NYRR website instructions as well! *

*PLEASE FOLLOW THESE INSTRUCTIONS AND REGISTER ON **BOTH** LINKS!*

PLEASE TAKE THE TIME TO READ BOTH ATTACHMENTS!

*IF YOU DO NOT REGISTER ON BOTH LINKS THIS WILL DELAY YOUR REGISTRATION *

AND YOU MAY NOT GET A CREDENTIAL

Happy Reading!

-73,

Deborah M Kerr (Rumore), KC2GPV(formerly WX3RHW)

2015 TCS NYC Marathon Amateur Radio Communications Director

*ARES - Amateur Radio Emergency Services, Amateur Radio Operator *

Vice President ARCECS - Amateur Radio Club Emergency Communication Service
Amateur Radio Communications Director for the NYC Marathon, NYC Half Marathon and the NYC Triathlon
Amateur Radio, When Normal Communications Fail
